Translation of a report originally issued in Spanish based on our work performed in accordance with generally accepted auditing standards in Spain and of consolidated financial statements originally issued in Spanish and prepared in accordance with IFRSs as adopted by the European Union (Notes 1 and 60). In the event of a discrepancy, the Spanish-language version prevails.

AUDITORS' REPORT ON CONSOLIDATED FINANCIAL STATEMENTS

To the Shareholders of Banco Bilbao Vizcaya Argentaria, S.A.:

- 1. We have audited the interim consolidated financial statements of BANCO BILBAO VIZCAYA ARGENTARIA, S.A. (the "Bank") and COMPANIES composing the BANCO BILBAO VIZCAYA ARGENTARIA Group (the "Group" Note 3), which consist of the consolidated balance sheet at 30 June 2010, and the related consolidated income statement, consolidated statement of recognized income and expense, consolidated statement of changes in equity, consolidated cash flow statement and notes to the interim consolidated financial statements for the six months period then ended. The preparation of these interim consolidated financial statements is the responsibility of the Bank's directors. Our responsibility is to express an opinion on the interim consolidated financial statements taken as a whole based on our audit work performed in accordance with generally accepted auditing standards in Spain, which require examination, by means of selective tests, of the evidence supporting the interim consolidated financial statements and evaluation of their presentation, of the accounting policies applied and of the estimates made.
- 2. For comparison purposes the Bank's directors present, in addition to the figures for the six months period ended 30 June 2010 for each item in the consolidated balance sheet, consolidated income statement, consolidated statement of recognized income and expense, consolidated statement of change in equity, consolidated cash flow statement and notes to the consolidated financial statements, the figures for 2009. Thus for each item in the consolidated balance sheet the figures at 31 December 2009 are presented and for each item in the consolidated income statement, consolidated statement of change in equity, consolidated statement of income and expense, and consolidated cash flow statement the figures for the six months period ended 30 June 2009 are presented. On 30 July 2009, we issued our auditors' reports on the interim consolidated financial statements for the six months period ended 30 June 2009, in which we expressed unqualified opinion. Therefore on 4 February 2010, we issued our auditor's report on the consolidated financial statements for the year ended 31 December 2009, in which we expressed unqualified opinion.
- 3. In our opinion, the accompanying interim consolidated financial statements for the six months period ended 30 June 2010 present fairly, in all material respects, the consolidated equity and consolidated financial position of the Banco Bilbao Vizcaya Argentaria Group at 30 June 2010, and the consolidated results of its operations, the changes in the consolidated equity, the changes in the recognized income and expense and its consolidated cash flows for the six months period then ended, and contain the required information, sufficient for their proper interpretation and comprehension, in conformity with the International Financial Reporting Standards adopted by the European Union applied on a basis consistent with that of the preceding periods.
- 4. The accompanying consolidated directors' report for the six months period ended 30 June 2010 contains the explanations which the Bank's directors consider appropriate about the Group's situation, the evolution of its business and other matters, but is not an integral part of the interim consolidated financial statements. We have checked that the accounting information in the consolidated directors' report is consistent with that contained in the interim consolidated financial statements for the six months period ended 30 June 2010. Our work as auditors was confined to checking the consolidated directors' report with the aforementioned scope, and did not include a review of any information other than that drawn from the consolidated companies' accounting records.

BANCO BILBAO VIZCAYA ARGENTARIA, S.A.

AND COMPANIES COMPOSING THE BANCO BILBAO VIZCAYA ARGENTARIA GROUP

EXPLANATORY NOTES FOR THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS CORRESPONDING TO THE SIX-MONTH PERIOD ENDED JUNE 30, 2010

1. INTRODUCTION, BASIS FOR PRESENTATION OF THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS AND OTHER INFORMATION

1.1 INTRODUCTION

Banco Bilbao Vizcaya Argentaria, S.A. (hereinafter, the Bank or BBVA) is a private-law entity, subject to the rules and regulations governing banking institutions operating in Spain. The Bank conducts its business through branches and offices located throughout Spain and abroad.

The Bylaws and other public information about the Bank are available for consultation at its registered address (Plaza San Nicolás, 4 Bilbao) and on its official website: www.bbva.com.

In addition to the transactions it carries out directly, the Bank heads a group of subsidiaries, jointly-controlled and associated entities which perform a wide range of activities and which together with the Bank constitute the Banco Bilbao Vizcaya Argentaria Group (hereinafter, "the Group" or "BBVA Group"). In addition to its own individual financial statements, the Bank is therefore obliged to prepare the Group's consolidated financial statements.

As of June 30, 2010, the Group was made up of 328 companies accounted for under the full consolidation method and 7 under the proportionate consolidation method. A further 70 companies are accounted for using the equity method (see Notes 3 and 17 and Appendices II to VII of these interim consolidated financial statements).

The Group's consolidated financial statements as of December 31, 2009 were approved by the shareholders at the Bank's Annual General Meeting on March 12, 2010.

1.2. BASIS FOR THE PRESENTATION OF THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS

The Group's accompanying interim consolidated financial statements are presented in accordance with the International Financial Reporting Standards endorsed by the European Union (hereinafter, IFRS-EU) applicable at June 30, 2010, and additionally considering the Bank of Spain Circular 4/2004, of December 22, 2004 (and as amended thereafter). This Bank of Spain Circular is the regulation that implements and adapts the IFRS-EU for Spanish banks.

The BBVA Group's interim consolidated financial statements were prepared by the Bank's directors (at the Board Meeting held on July 27, 2010) by applying the principles of consolidation, accounting policies and valuation criteria described in Note 2, so that they present fairly the Group's consolidated equity and financial position as of June 30, 2010, together with the consolidated results of its operations, the changes in the consolidated equity, consolidated recognized income and expenses and consolidated cash flows in the Group in the six-month period ended June 30, 2010. These interim consolidated financial statements and their explanatory notes were prepared on the basis of the accounting records kept by the Bank and by each of the other companies in the Group and include the adjustments and reclassifications required to harmonize the accounting policies and valuation criteria used by the Group (see Note 2.2).

All accounting policies and valuation criteria with a significant effect in the interim consolidated financial statements were applied in their preparation.

The amounts reflected in the accompanying consolidated financial statements are presented in millions of euros, except as stated otherwise due to the need for a smaller unit. Therefore, there may be occasions when a balance does not appear in the financial statements because it is in units of euros. In addition, the percentage changes are calculated using thousands of euros. The accounting balances have been rounded to present the amounts in millions of euros. As a result, the amounts appearing in some tables may not be the arithmetical sum of the preceding figures.

1.3. COMPARATIVE INFORMATION

The information contained in these interim consolidated financial statements and in the explanatory notes referring to December 31, 2009 and June 30, 2009 is presented, solely for comparison purposes, with information relating to June 30, 2010.

1.4. SEASONAL NATURE OF INCOME AND EXPENSES

The nature of the most significant activities and transactions carried out by the Group is mainly related to traditional activities carried out by financial institutions, which are not significantly affected by seasonal factors.

1.5. RESPONSIBILITY FOR THE INFORMATION AND FOR THE ESTIMATES MADE

The information contained in these BBVA Group interim consolidated financial statements is the responsibility of the Group's Directors.

Estimates were occasionally made by the Bank and the consolidated companies in preparing these interim consolidated financial statements in order to quantify some of the assets, liabilities, income, expenses and commitments reported. These estimates relate mainly to the following:

- Impairment on certain financial assets (see Notes 7, 8, 12, 13 and 14).
- Assumptions used in the actuarial calculation of the post-employment benefit liabilities and commitments (see Note 26).
- The useful life and impairment losses of tangible and intangible assets (see Notes 16, 19, 20 and 22).
- The valuation of consolidation goodwill (see Notes 17 and 20).
- The fair value of certain unlisted financial assets and liabilities (see Notes 7, 8, 10, 11, 12 and 15).

Although these estimates were made on the basis of the best information available as of June 30, 2010 on the events analyzed, events that take place in the future might make it necessary to change them (upwards or downwards) in the coming years.

1.6. BBVA GROUP INTERNAL CONTROL OVER FINANCIAL REPORTING MODEL

The BBVA Group Internal Control over Financial Reporting Model ("ICFR Model") includes a set of processes and procedures that the Group's Management has designed to reasonably guarantee fulfillment of the Group's set control targets. These control targets have been set to ensure the reliability and integrity of the consolidated financial information, as well as the efficiency and effectiveness of transactions and fulfillment of applicable standards.

The ICFR Model is based on the Committee of Sponsoring Organizations of the Treadway Commission (hereinafter, COSO) international standards. The five components that COSO establishes to determine whether an internal control system is effective and efficient are:

- Evaluate all of the risks that could arise during the preparation of the financial information.
- Design the necessary control activities to mitigate the most critical risks.
- Monitor the control activities to ensure they are fulfilled and they are effective over time.
- Establish the right reporting circuits to detect and report system weaknesses or flaws.
- Set up a suitable control area to track all of these activities.

The BBVA Group ICFR Model is summarized in the following chart:

2. 3. 4. 5. 1. Companies Evaluation of **Processes** Review of ICFR Formalisation / Formalisation / Formalisation / the design and documentation of documentation documentation effectiveness of scope Risks of risks of process control model the controls. models models **Controls** Selection of Definition nad Identification of Identification of companies and documentation of riodic review of relevant risks linked to key mitigating the processes the model. information to be processes controls. covered.

BBVA'S INTERNAL CONTROL OVER FINANCIAL REPORTING MODEL

ICFR Model is implemented in the Group's main entities using a common and uniform methodology.

To determine the scope of the ICFR Model annual evaluation, the main companies, headings and most significant processes are identified based on quantitative criteria (probability of occurrence, economic impact and materiality) and qualitative criteria (related to typology, complexity, nature of risks and the business structure), ensuring coverage of critical risks for the BBVA Group consolidated financial statements. As well as the evaluation that the Internal Control Units performs, ICFR Model is subject to regular evaluations by the Internal Audit Department and is supervised by the Group's Audit and Compliance Committee.

2. PRINCIPLES OF CONSOLIDATION, ACCOUNTING POLICIES AND MEASUREMENT BASES APPLIED AND IFRS RECENT PRONOUNCEMENTS

The Glossary (see Appendix X) includes the definition of financial and economic terms used in this Note 2 and subsequent explanatory notes.

2.1. PRINCIPLES OF CONSOLIDATION

The accounting principles and valuation criteria used to prepare the Group's interim consolidated financial statements may differ from those used by certain companies in the Group. For this reason, the required adjustments and reclassifications were made on consolidation to harmonize the principles and criteria used and to make them compliant with IFRS-EUs.

The results of subsidiaries acquired during the period are included taking into account only the period from the date of acquisition to the end of the period. The results of companies disposed of during any year are included only taking into account the period from the start of the year to the date of disposal.

The Group consolidated companies are classified into three types, according to the method of consolidation: subsidiaries, jointly controlled entities and associates entities.

Subsidiaries

Subsidiaries (see the Glossary) are those companies which the Group has the capacity to control. Control is presumed to exist when the parent owns, either directly or indirectly through other subsidiaries, more than one half of an entity's voting power, unless, in exceptional cases, it can be clearly demonstrated that ownership of more than one half of an entity's voting rights does not constitute control of it.

The financial statements of the subsidiaries are consolidated with those of the Bank using the global integration method.

The share of minority interests from subsidiaries in the Group's consolidated equity is presented under the heading "Non-controlling interest" in the accompanying consolidated balance sheets and their share in the

profit or loss for the year is presented under the heading "Net income attributed to non-controlling interests" in the accompanying consolidated income statements (see Note 32).

Note 3 include information on the main companies in the Group as of June 30, 2010. Appendix II includes the most significant information on these companies.

Jointly controlled entities

These are entities that, while not being subsidiaries, fulfill the definition of "joint business" (see the Glossary).

Since the implementation of IFRS-EU, the Group has applied the following policy in relation to investments in jointly controlled entities:

Jointly controlled financial entities: Since it is a financial entity, the best way of reflecting its activities
within the Group's consolidated financial statements is considered to be the proportionate method of
consolidation.

As of June 30, 2010 and December 31, 2009, the contribution of jointly controlled financial entities to the main figures in the Group's consolidated financial statements under the proportionate consolidation method, calculated on the basis of the Group's holding in them, is shown in the table below:

	Millions of Euros		
Contribution to the Group by Entities Accounted for	June	December	
Under the Proportionate Method	2010	2009	
Assets	1,080	869	
Liabilities	1,019	732	
Equity	36	38	
Net income	14	17	

Additional disclosure is not provided as these investments are not significant.

Appendix III shows the main figures for jointly controlled entities consolidated by the Group under the proportionate method.

• Jointly controlled non-financial entities: It is considered that the effect of distributing the balance sheet and income statement amounts belonging to jointly controlled non-financial entities would distort the information provided to investors. For this reason, the equity method is considered the most appropriate way of reflecting these investments.

Appendix IV shows the main figures for jointly controlled entities consolidated using the equity method. Note 17 details the impact, if any, that application of the proportionate consolidation method on these entities would have had on the consolidated balance sheet and income statement.

Associate entities

Associates are companies in which the Group is able to exercise significant influence, without having total or joint control. Significant influence is deemed to exist when the Group owns 20% or more of the voting rights of an investee directly or indirectly.

However, certain entities in which the Group owns 20% or more of the voting rights are not included as Group associates, since it is considered that the Group does not have the capacity to exercise significant influence over these entities. Investments in these entities, which do not represent significant amounts for the Group, are classified as available-for-sale investments.

Moreover, some investments in entities in which the Group holds less than 20% of the voting rights are accounted for as Group associates, as the Group is considered to have the power to exercise significant influence over these entities.

Investments in associates are accounted for using the equity method (see Note 17). Appendix IV shows the most significant information on the associates consolidated using the equity method.

2.2. ACCOUNTING POLICIES AND VALUATION CRITERIA APPLIED

The following accounting policies and valuation criteria were used in preparing these interim consolidated financial statements were as follows:

2.2.1. FINANCIAL INSTRUMENTS

a) Valuation of financial instruments and recognition of changes in valuations

All financial instruments are initially accounted for at fair value which, unless there is evidence to the contrary, shall be the transaction price.

All the changes during the year, except in trading derivatives, arising from the accrual of interests and similar items are recognized under the headings "Interest and similar income" or "Interest and similar expenses", as appropriate, in the accompanying consolidated income statement for this year (see Note 39). The dividends accrued in the year are recognized under the heading "Dividend income" in the accompanying consolidated income statement for the year (see Note 40).

The changes in the valuations after the initial recognition, for reasons other than those included in preceding paragraph, are described below according to the categories of financial assets and liabilities:

- "Financial assets held for trading" and "Other financial assets and liabilities designated at fair value through profit or loss"

Assets and liabilities recognized under these headings in the accompanying consolidated balance sheets are valued at fair value.

Changes arising from the valuation at fair value (gains or losses) are recognized as their net value under the heading "Net gains (losses) on financial assets and liabilities" in the accompanying consolidated income statements (see Note 44). Changes resulting from variations in foreign exchange rates are recognized under the heading "Net exchange differences" in the accompanying consolidated income statements.

The fair value of the financial derivatives included in the held for trading portfolios is calculated by their daily quoted price if there is an active market. If, under exceptional circumstances, their quoted price cannot be established on a given date, these derivatives are valued using methods similar to those used in over-the-counter ("OTC") markets.

The fair value of OTC derivatives ("present value" or "theoretical price") is equal to the sum of future cash flows arising from the instrument, discounted at the measurement date; these derivatives are valued using methods recognized by the financial markets: the net present value (NPV) method, option price calculation models, etc.(see Note 8).

- "Available-for-sale financial assets"

Assets and liabilities recognized under these headings in the accompanying consolidated balance sheets are valued at fair value.

Changes arising from the valuation at fair value (gains or losses) are recognized temporarily, for their net amount, under the heading "Valuation adjustments - Available-for-sale financial assets" in the accompanying consolidated balance sheets.

Valuation adjustments arising from non-monetary items by changes in foreign exchange rates are recognized temporarily under the heading "Valuation adjustments - Exchange differences" in the accompanying consolidated balance sheets. Valuation adjustments arising from monetary items by changes in foreign exchange rates are recognized under the heading "Net exchange differences" in the accompanying consolidated income statements.

The amounts recognized under the headings "Valuation adjustments - Available-for-sale financial assets" and "Valuation adjustments - Exchange differences" continue to form part of the Group's consolidated equity until the asset is derecognized from the consolidated balance sheet or until an impairment loss is recognized in it. If these assets are sold, these amounts are recognized under the headings "Net gains (losses) on financial assets and liabilities" or "Net exchange differences", as appropriate, in the consolidated income statement for the period in which they are derecognized.

In the particular case of gains from sales of other equity instruments considered strategic investments registered under "Available-for-sale financial assets" are recognized under the heading "Gains (losses) in non-current assets held-for-sale not classified as discontinued operations" in the consolidated income statement, although they had not been classified in a previous balance sheet as non-current assets held for sale (see note 52).

The net impairment losses in the "Available-for-sale financial assets" during the year are recognized under the heading "Impairment losses on financial assets (net) – Other financial instruments not at fair value through profit or loss" in the consolidated income statements for that year.

- "Loans and receivables", "Held-to-maturity investments" and "Financial liabilities at amortized cost"

Assets and liabilities recognized under these headings in the accompanying consolidated balance sheets are measured at "amortized cost" using the "effective interest rate" method, as the consolidated entities has the intention to hold such financial instruments to maturity.

Net impairment losses of assets under these headings arising in a particular year are recognized under the heading "Impairment losses on financial assets (net) – Loans and receivables" or "Impairment losses on financial assets (net) – Other financial instruments not valued at fair value through profit or loss" in the income statement for that year.

- "Hedging derivatives" and "Fair value changes of the hedged items in portfolio hedges"

Assets and liabilities recognized under these headings in the accompanying consolidated balance sheets are valued at fair value.

Changes produced subsequent to the designation of hedging in the valuation of financial instruments designated as hedged items as well as financial instruments under hedge accounting are recognized according to the following criteria:

• In fair value hedges, the changes in the fair value of the derivative and the hedged item attributable to the hedged risk are recognized under the heading "Net gains (losses) on financial assets and liabilities" in the consolidated income statement, with a balancing item under the headings where hedging items ("Hedging derivatives") and the hedged items are recognized, as applicable.

In fair value hedges of interest rate risk of a portfolio of financial instruments, the gains or losses that arise in the valuation of the hedging instrument are recognized in the consolidated income statement, and the gains or losses that arise from the change in the fair value of the hedged item (attributable to the hedged risk) are recognized in the consolidated income statement, using, as a balancing item, the headings "Fair value changes of the hedged items in portfolio hedges of interest rate risk" in the consolidated balance sheets, as applicable.

- In cash flow hedges and hedges of net investments in a foreign operations, the differences in valuation in the effective hedging of hedging items are recognized temporarily under the heading "Valuation adjustments Cash flow hedging" and "Valuation adjustments Hedging of net investments in foreign transactions" respectively. These valuation changes are recognized under the heading "Net gains (losses) on financial assets and liabilities" in the accompanying consolidated income statement at the time when the gain or loss in the hedged instrument affects profit or loss, when the forecast transaction takes place or at the maturity date of the hedged item. Almost all of the hedges used by the Group are for interest rate risks. Therefore, the valuation changes are recognized under the headings "Interest and similar income" or "Interest and similar expenses" as appropriate, in the accompanying consolidated income statement (see Note 39). Differences in the valuation of the hedging items corresponding to the ineffective portions of cash flow hedges and hedges of net investments in foreign operations are recognized directly in the heading "Net gains (losses) on financial assets and liabilities" in the accompanying consolidated income statement.
- In the hedges of net investments in foreign operations, the differences produced in the effective portions of hedging items are recognized temporarily under the heading "Valuation adjustments Hedging of net investments in foreign transactions". These differences in valuation are recognized under the heading "Net exchange differences" in the consolidated income statement when the investment in a foreign operation is disposed of or derecognized.

- Other financial instruments

The following exceptions have to be highlighted with respect to the above general criteria:

- Equity instruments whose fair value cannot be determined in a sufficiently objective manner and
 financial derivatives that have those instruments as their underlying asset and are settled by delivery
 of those instruments are measured at acquisition cost adjusted, where appropriate, for any
 impairment loss.
- Valuation adjustments arising from financial instruments classified at balance sheet date as noncurrent assets held for sale are recognized with a balancing entry under the heading "Valuation adjustments - Non-current assets held for sale" in the accompanying consolidated balance sheets.

b) Impairment on financial assets

Definition of impaired financial assets

A financial asset is considered to be impaired – and therefore its carrying amount is adjusted to reflect the effect of its impairment – when there is objective evidence that events have occurred which:

- In the case of debt instruments (loans and debt securities), give rise to a negative impact on the future cash flows that were estimated at the time the transaction was arranged.
- In the case of equity instruments, mean that the carrying amount of these instruments cannot be recovered.

As a general rule, the carrying amount of impaired financial instruments is adjusted with a charge to the consolidated income statement for the period in which the impairment becomes known. The recoveries of previously recognized impairment losses are recorded, if appropriate, in the consolidated income statement for the period in which the impairment is reversed or reduced, with the exception that any recovery of previously recognized impairment losses for an investment in an equity instrument classified as financial assets available for sale which are not recognized through consolidated profit or loss but recognized under the heading "Valuation Adjustments – Available-for-sale financial assets" in the consolidated balance sheet.

Balances are considered to be impaired, and accrual of the interest thereon is suspended, when there are reasonable doubts that the balances will be recovered in full and/or the related interest will be collected for the amounts and on the dates initially agreed upon, taking into account the guarantees received by the consolidated entities to assure (in part or in full) the performance of transactions. Amounts collected in relation to impaired loans and receivables are used to recognize the related accrued interest and any excess amount is used to reduce the principal not yet paid.

When the recovery of any recognized amount is considered to be remote, this amount is removed from the consolidated balance sheet, without prejudice to any actions taken by the consolidated entities in order to collect the amount until their rights extinguish in full through expiry, forgiveness or for other reasons.

Calculation of impairment on financial assets

The impairment on financial assets is determined by type of instrument and the category in which they are recognized. The BBVA Group recognizes impairment charges directly against the impaired asset when the likelihood of recovery is deemed remote, and uses an offsetting or allowance account when it records non-performing loan provisions.

The amount of impairment losses of debt securities at amortized cost is measured as a function of whether the impairment losses are determined individually or collectively.

Impairment losses determined individually

The quantification of impairment losses on assets classified as impaired is done on an individual basis in connection with customers whose operations are equal to or exceed €1 million.

The amount of the impairment losses incurred on these instruments relates to the positive difference between their respective carrying amounts and the present values of their expected future cash flows.

The following is to be taken into consideration when estimating the future cash flows of debt instruments:

• All the amounts that are expected to be obtained over the residual life of the instrument; including, where appropriate, those which may result from the collaterals and other credit enhancements

provided for the instrument (after deducting the costs required for foreclosure and subsequent sale).

- The various types of risk to which each instrument is subject.
- The circumstances in which collections will foreseeably be made.

These cash flows are discounted using the original effective interest rate. If a financial instrument has a variable interest rate, the discount rate for measuring any impairment loss is the current effective rate determined under the contract.

As an exception to the rule described above, the market value of quoted debt instruments is deemed to be a fair estimate of the present value of their future cash flows.

Impairment losses determined collectively

The quantification of impairment losses is determined on a collective basis in the following two cases:

- Assets classified as impaired of customers in which the amount of their operations is less than €1
 million.
- Asset portfolio not impaired currently but which presents an inherent loss.

Inherent loss, calculated using statistical procedures, is deemed equivalent to the portion of losses incurred at the date of preparing the accompanying interim consolidated financial statements that has yet to be allocated to specific transactions.

The Group estimates collectively the inherent loss of credit risk corresponding to operations realized by Spanish financial entities of the Group (approximately 57% on "Loans and receivables" of the Group as of June 30, 2010), using the parameters set by Annex IX of the Circular 4/2004 from Bank of Spain (in force as of June 30, 2010 on the base of its experience and the Spanish banking sector information in the quantification of impairment losses and provisions for insolvencies for credit risk.

Notwithstanding the above, the Group can avail of the proprietary historic records used in its internal ratings models (IRBs), which were approved by the Bank of Spain for some portfolios in 2008, albeit only for the purposes of estimating regulatory capital under the new Basel Accord (BIS II). It uses these internal ratings models to calculate the economic capital required in its activities and uses the expected loss concept to quantify the cost of credit risk for incorporation into its calculation of the risk-adjusted return on capital of its operations.

The provisions required under Circular 4/2004 from Bank of Spain standards fall within the range of provisions calculated using the Group's internal ratings models.

To estimate the collective loss of credit risk corresponding to operations with nonresident in Spain registered in foreign subsidiaries, are applied methods and similar criteria, taking like reference the Bank of Spain parameters but adapting the default's calendars to the particular circumstances of the country. However, in Mexico for consumer loans, credit cards and mortgages portfolios, as well as for credit investment maintained by the Group in the United States are using internal models for calculating the impairment losses based on historical experience of the Group (approximately 15.55% of the "Loans and receivables" of the Group as of June 30, 2010).

Following is a description of the methodology used to estimate the collective loss of credit risk corresponding to operations with resident in Spain:

1. Impaired financial assets

The debt instruments, whoever the obligor and whatever the guarantee or collateral, that have past-due amounts with more than three months, taking into account the age of the past-due amounts, the guarantees or collateral provided and the economic situation of the customer and the guarantors.

In the case of unsecured transactions and taking into account the age of the past-due amounts, the allowance percentages are as follows:

Age of the Past-due Amount	Allowance Percentage Range
Up to 6 months	4.5% - 5.3%
Over 6 months and up to 12 months	27.4% - 27.8%
Over 12 months and up to 18 months	60.5% - 65.1%
Over 18 months and up to 24 months	93.3% - 95.8%
Over 24 months	100%

In the case of transactions secured by completed houses when the total exposure is equal or inferior 80% of the value of the guarantee or collateral and taking into account the age of the past-due amounts, the allowance percentages are as follows:

Age of the Past-due Amount	Allowance Percentage Range
Less than 3 years	2%
Over 3 years and up to 4 years	25%
Over 4 years and up to 5 years	50%
Over 5 years and up to 6 years	75%
Over 6 years	100%

In the rest of transactions secured by real property in which the entity has began the process to take possession of the pledge and taking into account the age of the past-due amounts, the allowance percentages are as follows:

Age of the Past-due Amount	Allowance Percentage Range
Up to 6 months	3.8% - 4.5%
Over 6 months and up to 12 months	23.3% - 23.6%
Over 12 months and up to 18 months	47.2% - 55.3%
Over 18 months and up to 24 months	79.3% - 81.4%
Over 24 months	100%

Regarding the coverage level to be applied to defaulting transactions secured by property (homes, offices and completed multi-use sites, as well as rural properties), the value of the collateral must be taken into account, applying the previous percentages to the amount of those transactions exceeding 70% of the property value.

Debt instruments for which, without qualifying as doubtful in terms of criteria for classification as past-due, there is reasonable doubt that they will be recovered on the initially agreed terms, are analyzed individually.

2. Not individually impaired assets

The debt instruments, whoever the obligor and whatever the guarantee or collateral, that do not have individually objective of impairment are collectively assesses, including the assets in a group with similar credit risk characteristics, including sector of activity of the debtor or the type of guarantee.

The allowance percentages of hedge are as follows:

Type of Risk	Allowance Percentage Range
Negligible risk	0%
_ow risk	0.06% - 0.75%
Medium-low risk	0.15% - 1.88%
Medium risk	0.18% - 2.25%
Medium-high risk	0.20% - 2.50%
High risk	2.50% - 3.13%

3. Country Risk Allowance or Provision

Country risk is understood as the risk associated with customers resident in a specific country due to circumstances other than normal commercial risk. Country risk comprises sovereign risk, transfer risk and other risks arising from international financial activity. On the basis of the economic performance, political situation, regulatory and institutional framework, and payment capacity and record, the Group classifies the transactions in different groups, assigning to each group the provisions for insolvencies percentages, which are derived from those analyses.

However, due to the dimension Group, and to risk-country management, the provision levels are not significant in relation to the balance of the provisions by constituted insolvencies (as of June 30, 2010, this provision represents a 0.37% in the provision for insolvencies of the Group).

Impairment of other debt instruments

The impairment losses on debt securities included in the "Available-for-sale financial asset" portfolio are equal to the positive difference between their acquisition cost (net of any principal repayment) and their fair value after deducting any impairment loss previously recognized in the consolidated income statement.

When there is objective evidence that the negative differences arising on measurement of these assets are due to impairment, they are no longer considered as "Valuation adjustments - Available-for-sale financial assets" and are recognized in the consolidated income statement. If all, or part of the impairment losses are subsequently recovered, the amount is recognized in the consolidated income statement for the year in which the recovery occurred.

Impairment of equity instruments

The amount of the impairment in the equity instruments is determinated by the category where is recognized:

- Equity instruments measured at fair value: The criteria for quantifying and recognizing impairment losses on equity instruments are similar to those for other debt instruments, with the exception that any recovery of previously recognized impairment losses for an investment in an equity instrument classified as available for sale which are not recognized through profit or loss but recognized under the heading "Valuation adjustments Available-for-sale financial assets" in the accompanying consolidated balance sheet (Note 31).
- Equity instruments measured at cost: The impairment losses on equity instruments measured at acquisition cost are equal to the difference between their carrying amount and the present value of expected future cash flows discounted at the market rate of return for similar securities. These impairment losses are determined taking into account the equity of the investee (except for valuation adjustments due to cash flow hedges) for the last approved (consolidated) balance sheet, adjusted for the unrealized gains at the measurement date.

Impairment losses are recognized in the consolidated income statement for the period in which they arise as a direct reduction of the cost of the instrument. These losses may only be reversed subsequently in the event of the sale of these assets.

2.2.2. TRANSFERS AND DERECOGNITION OF FINANCIAL ASSETS AND LIABILITIES

The accounting treatment of transfers of financial assets depends on the extent to which the risks and rewards associated with the transferred assets are transferred to third parties.

Financial assets are only derecognized the consolidated balance sheet when the cash flows they generate have extinguished or when their implicit risks and benefits have been substantially transferred out to third parties. Similarly, financial liabilities are derecognized from the consolidated balance sheet only if their obligations are extinguished or acquired (with a view to subsequent cancellation or renewed placement).

When the risks and benefits of transferred assets are substantially transferred to third parties, the financial asset transferred is derecognized the consolidated balance sheet, and any right or obligation retained or created as a result of the transfer is simultaneously recognized.

The Group is considered to have transferred substantially all the risks and benefits if such risks and benefits account for the majority of the risks and benefits involved in ownership of the transferred assets.

If all the risks and benefits associated with the transferred financial asset are substantially retained:

- The transferred financial asset is not derecognized and continues to be measured in the consolidated balance sheet using the same criteria as those used before the transfer.
- A financial liability is recognized at the amount of compensation received, which is subsequently
 measured at amortized cost and included under the heading "Financial liabilities at amortized cost —
 Debt certificates" in the accompanying consolidated balance sheet (see Note 23). As these liabilities
 do not constitute a current obligation, when measuring such a financial liability the Group deducts
 those financial instruments owned by it which constitute financing for the entity to which the financial
 assets have been transferred, to the extent that these instruments are deemed to specifically finance
 the assets transferred.
- Both the income generated on the transferred (but not derecognized) financial asset and the
 expenses of the new financial liability are recognized in the accompanying consolidated income
 statements.

Purchase and sale commitments

Financial instruments sold with a repurchase agreement are not derecognized from the consolidated balance sheets and the amount received from the sale is considered financing from third parties.

Financial instruments acquired with an agreement to subsequently resell them are not recognized in the accompanying consolidated balance sheets and the amount paid for the purchase is considered credit given to third parties.

Securitization

In the specific instance of the securitization funds to which the Group's entities transfer their loan portfolios, the following indications of the existence of control are considered for the purpose of analyzing the possibility of consolidation:

- The securitization funds' activities are undertaken in the name of the entity in accordance with its specific business requirements with a view to generating benefits or gains from the securitization funds' operations.
- The entity retains decision-making power with a view to securing most of the gains derived from the securitization funds' activities or has delegated this power in some kind of "auto-pilot" mechanism (the securitization funds are structured so that all the decisions and activities to be performed are pre-defined at the time of their creation).
- The entity is entitled to receive the bulk of the profits from the securitization funds and is accordingly
 exposed to the risks inherent in their business activities. The entity retains the bulk of the
 securitization funds' residual profit.
- The entity retains the bulk of the securitization funds' asset risks.

If there is control based on the preceding guidelines, the securitization funds are integrated into the consolidated Group.

The consolidated Group is deemed to transfer substantially all risks and rewards if its exposure to the potential variation in the future net cash flows of the securitized assets following the transfer is not significant. In this instance, the consolidated Group may derecognize the securitized assets.

The BBVA Group has applied the most stringent prevailing criteria in determining whether or not it retains the risks and rewards on such assets for all securitizations performed since 1 January 2004. As a result of this analysis, the Group has concluded that none of the securitizations undertaken since that date meet the prerequisites for derecognizing the underlying assets from the consolidated balance sheets (see Note 13.3 and Appendix VII) as it retains substantially all the risks embodied by expected loan losses or associated with the possible variation in net cash flows, as it retains the subordinated loans and lines of credit extended by the BBVA Group to these securitization funds.

2.2.3. FINANCIAL GUARANTEES

Financial guarantees are considered those contracts that oblige their issuer to make specific payments to reimburse the lender for a loss incurred when a specific borrower breaches its payment obligations on the terms – whether original or subsequently modified – of a debt instrument, irrespective of the legal form it may take. These guarantees may take the form of a deposit, financial guarantee, insurance contract or credit derivative, among others.

Financial guarantees, irrespective of the guarantor, instrumentation or other circumstances, are reviewed periodically so as to determine the credit risk to which they are exposed and, if appropriate, to consider whether a provision is required for them. The credit risk is determined by application of criteria similar to those established for quantifying impairment losses on debt instruments measured at amortized cost (see Note 2.2.1).

The provisions made for financial guarantees classified as substandard are recognized under the heading "Provisions - Provisions for contingent exposures and commitments" in the liability side in the accompanying consolidated balance sheets (see Note 25). These provisions are recognized and reversed with a charge or credit, respectively, to "Provisions" in the accompanying consolidated income statements (see Note 48).

Income from guarantee instruments is recorded under the heading "Fee and commission income" in the consolidated income statement and is calculated by applying the rate established in the related contract to the nominal amount of the guarantee (see Note 42).

2.2.4. NON-CURRENT ASSETS HELD FOR SALE AND LIABILITIES ASSOCIATED WITH NON-CURRENT ASSETS HELD FOR SALE

The heading "Non-current assets held-for-sale" in the accompanying consolidated balance sheets recognized the carrying amount of financial or non-financial assets that are not part of operating activities of the Group. The recovery of this carrying amount is expected to take place through the price obtained on its disposal (see Note 16). The assets included under this heading are assets where an active sale plan has been initiated and approved at the appropriate level of management and it is highly probable they will be sold in their current condition within one year from the date on which they are classified as such.

This heading includes individual items and groups of items ("disposal groups") and disposal groups that form part of a major business unit and are being held for sale as part of a disposal plan ("discontinued operations"). The individual items include the assets received by the subsidiaries from their debtors in full or partial settlement of the debtors' payment obligations (assets foreclosed or donated in repayment of debt and recovery of lease finance transactions), unless the Group has decided to make continued use of these assets. The Group has units that specialize in real estate management and the sale of this type of asset.

Symmetrically, the heading "Liabilities associated with non-current assets held for sale" in the accompanying consolidated balance sheets reflects the balances payable arising from disposal groups and discontinued operations.

Non-current assets held for sale are generally measured at fair value less sale costs or their carrying amount upon classification within this category, whichever is the lower. Non-current assets held for sale are not depreciated while included under this heading.

The fair value of non-current assets held for sale from foreclosures or recoveries is determined taking into consideration valuations performed by companies of authorized values in each of the geographical areas in which the assets are located. The BBVA Group requires that these valuations be no more than one year old, or less if there are other signs of impairment losses. In the case of Spain, the main independent valuation and appraisal companies authorized by the Bank of Spain, that are not related parties with the BBVA Group and entrusted with the appraisal of these assets are: Sociedad de Tasación, S.A., Valtecnic, S.A., Krata, S.A., Gesvalt, S.A., Alia Tasaciones, S.A., Tasvalor, S.A. and Tinsa, S.A.

As a general rule, gains and losses generated on the disposal of assets and liabilities classified as noncurrent held for sale, and related impairment losses and subsequent recoveries, where pertinent, are recognized in "Gains(losses) on non-current assets held for sale not classified as discontinued operations" in the accompanying consolidated income statements (see Note 52). The remaining income and expense items associated with these assets and liabilities are classified within the relevant consolidated income statement headings.

2.2.5. TANGIBLE ASSETS

Tangible assets - Property, plants and equipment for own use

The heading "Tangible assets – Property, plants and equipment – For own use" relates to the assets under ownership or acquired under lease finance, intended for future or current use by the Group and that it expects hold for more than one year. It also includes tangible assets received by the consolidated entities in full or part settlement of financial assets representing receivables from third parties and those assets expected to be held for continuing use.

Tangible assets – property, plants and equipment for own use are presented in the consolidated balance sheets at acquisition cost, less any accumulated depreciation and, where appropriate, any estimated impairment losses resulting from comparing this net value of each item with its corresponding recoverable value.

Depreciation is calculated, using the straight-line method, on the basis of the acquisition cost of the assets less their residual value; the land on which the buildings and other structures stand is considered to have an indefinite life and is therefore not depreciated.

The tangible asset depreciation charges are recognized in the accompanying consolidated income statements under the heading "Depreciation and amortization" (see Note 47) and are based on the application of the following depreciation rates (determined on the basis of the average years of estimated useful life of the various assets):

Amortization Rates for Tangible Assets	
Type of Assets	Annual Percentage
Buildings for own use	1.33% - 4.00%
Furniture	8% - 10%
Fixtures	6% - 12%
Office supplies and hardware	8% - 10%

The BBVA Group's criteria for determining the recoverable amount of these assets is based on up-to-date independent appraisals that are no more than 3-5 years old at most, unless there are other indications of impairment.

At each accounting close, the entities analyze whether there are internal or external indicators that a tangible asset may be impaired. When there is evidence of impairment, the entity then analyzes whether this impairment actually exists by comparing the asset's carrying amount with its recoverable amount. When the carrying amount exceeds the recoverable amount, the carrying amount is written down to the recoverable amount and depreciation charges going forward are adjusted to reflect the asset's remaining useful life.

Similarly, if there is any indication that the value of a tangible asset has been recovered, the consolidated entities will estimate the recoverable amounts of the asset and recognize it in the consolidated income statement, recording the reversal of the impairment loss registered in previous years and thus adjusting future depreciation charges. In no circumstances may the reversal of an impairment loss on an asset raise its carrying amount above that which it would have if no impairment losses had been recognized in prior years.

Upkeep and maintenance expenses relating to tangible assets held for own use are recognized as an expense in the year they are incurred and recognized in the accompanying consolidated income statements under the heading "General and administrative expenses - Property, fixtures and equipment " (see Note 46.2).

Other assets leased out under an operating lease

The criteria used to recognize the acquisition cost of assets leased out under operating leases, to calculate their depreciation and their respective estimated useful lives and to record the impairment losses on them, are the same as those described in relation to tangible assets for own use.

Investment properties

The heading "Tangible assets - Investment properties" in the accompanying consolidated balance sheets reflects the net values of the land, buildings and other structures held either to earn rentals or for capital appreciation through sale and are neither expected to be sold off in the ordinary course of business nor are destined for own use (see Note 19).

The criteria used to recognize the acquisition cost of investment properties, calculate their depreciation and their respective estimated useful lives and record the impairment losses on them, are the same as those described in relation to tangible assets for continued use.

The criteria used by the BBVA Group to determine their recoverable value is based on independent appraisals no more than 1 year old, unless there are other indications of impairment.

2.2.6. INVENTORIES

The balance of "Other assets - Inventories" in the accompanying consolidated balance sheets mainly reflects the land and other properties that Group's real estate companies hold for sale as part of their property development activities (see Note 22).

The BBVA Group recognized inventories at their cost or net realizable value, whichever is lower:

- The cost value of inventories includes the costs incurred for their acquisition and transformation, as well as other direct and indirect costs incurred in giving them their current condition and location.
 - The cost value real estate assets accounted for as inventories is comprised of: the acquisition cost of the land, the cost of urban planning and construction, non-recoverable taxes and costs corresponding to construction supervision, coordination and management. The financial expenses incurred during the year increase by the cost value provided that the inventories need a period of more than a year to be in a condition to be sold.
- The net realizable value is the estimated selling price of inventories in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

In the case of real estate assets accounted for as inventories, the BBVA Group's criteria for obtaining their net realizable value is mainly based on independent appraisals of no more than 1 year old, or less if there are other indications of impairment. In the case of Spain, the main independent valuation and appraisal companies included in the Bank of Spain's official register and entrusted with the appraisal of these assets are: Gesvalt, S.A., Eurovalor, S.A., Krata, S.A., Sociedad de Tasación, S.A., Tinsa, S.A.

The amount of any inventory valuation adjustment for reasons such as damage, obsolescence, reduction in sale price to its net realizable value, as well as losses for other reasons and, if appropriate, subsequent recoveries of value up to the limit of the initial cost value, are registered under the heading "Impairment losses on other assets (net) – Other assets" in the accompanying consolidated income statements (see Note 50) for the year in which they are incurred.

In the sale transactions, the carrying amount of inventories is derecognized from the balance sheet and recognized as an expense under the heading "Other operating expenses – Changes in inventories" in the year which the income from its sale is recognized. This income is recognized under the heading "Other operating income – Financial income from non-financial services" in the consolidated income statements (see Note 45).

2.2.7. BUSINESS COMBINATIONS

The result of a business combination is that the Group obtains control of one or more entities. It is accounted for by the purchase method.

The purchase method records business combinations from the point of view of the acquirer, who has to recognize the assets acquired and the liabilities and contingent liabilities assumed, including those that the acquired entity had not recognized. The purchase method can be summed up as a measurement of the cost of the business combination and its allocation to the assets, liabilities and contingent liabilities measured according to their fair value, at the purchase date.

The positive differences between the cost of business combinations and the amount corresponding to the acquired percentage of the net fair value of the assets (including possible intangible assets identified in the acquisition), liabilities and contingent liabilities of the acquired entity are recognized under the heading "Intangible assets - Goodwill" in the accompanying consolidated balance sheets. The negative differences are credited to "Negative goodwill" in the accompanying consolidated income statements.

The purchase of non-controlling interests subsequent to the takeover of the entity is recognized as capital transactions. In other words, the difference between the price paid and the carrying amount of the percentage of non-controlling interests acquired is charged directly to equity.

2.2.8. INTANGIBLE ASSETS

Goodwill

Goodwill represents payment in advance by the acquiring entity for the future economic benefits from assets that cannot be individually identified and separately recognized. It is only recognized as goodwill when the business combinations are acquired at a price. Goodwill is never amortized. It is subject periodically to an impairment analysis, and impaired goodwill is written off if appropriate.

For the purposes of the impairment analysis, goodwill is allocated to one or more cash-generating units expected to benefit from the synergies arising from business combinations. The cash-generating units represent the Group's smallest identifiable asset groups that generate cash flows for the entity and that are largely independent of the flows generated from other assets or groups of assets. Each unit or units to which goodwill is allocated:

- Is the lowest level at which the entity manages goodwill internally.
- Is not larger than an operating segment.

The cash-generating units to which goodwill has been allocated are tested for impairment by including the allocated goodwill in their carrying amount. This analysis is performed at least annually and always if there is any indication of impairment.

For the purpose of determining the impairment of a cash-generating unit to which a part of goodwill has been allocated, the carrying amount of that unit, adjusted by the theoretical amount of the goodwill attributable to the non-controlling interests, is compared with its recoverable amount.

The recoverable amount of a cash-generating unit is equivalent to its value in use. Value in use is calculated as the discounted value of the cash flow projections that the division estimates and is based on the latest budgets approved for the next three years. The principal hypotheses are a sustainable growth rate to extrapolate the cash flows indefinitely, and the discount rate used to discount the cash flows is equal to the cost of the capital assigned to each cash-generating unit, which is made up of the risk-free rate plus a risk premium.

If the carrying amount of the cash-generating unit exceeds the related recoverable amount the entity recognizes an impairment loss; the resulting loss is apportioned by reducing, first, the carrying amount of the goodwill allocated to that unit and, second, if there are still impairment losses remaining to be recognized, the carrying amount of the rest of the assets. This is done by allocating the remaining loss in proportion to the carrying amount of each of the assets in the unit. No impairment of goodwill attributable to the non-controlling interests may be recognized.

In any case, impairment losses on goodwill can never be reversed. Impairment losses on goodwill are recognized under the heading "Impairment losses on other assets (net) – Goodwill and other intangible assets" in the accompanying consolidated income statements (see Note 50).

Other intangible assets

These assets may have an indefinite useful life if, based on an analysis of all relevant factors, it is concluded that there is no foreseeable limit to the year over which the asset is expected to generate net cash flows for the consolidated entities. In all other cases they have a finite useful life.

The Group has not recognized any intangible assets with an indefinite useful life.

Intangible assets with a finite useful life are amortized according to this useful life, using methods similar to those used to depreciate tangible assets. The depreciation charge of these assets is recognized in the accompanying consolidated income statements under the heading "Depreciation and amortization" (see Note 47).

The consolidated entities recognize any impairment loss on the carrying amount of these assets with charge to the heading "Impairment losses on other assets (net) - Goodwill and other intangible assets" in the accompanying consolidated income statements (see Note 50). The criteria used to recognize the impairment losses on these assets and, where applicable, the recovery of impairment losses recognized in prior years are similar to those used for tangible assets.

2.2.9. INSURANCE AND REINSURANCE CONTRACTS

In accordance with standard accounting practice in the insurance industry, consolidated insurance entities credit the amounts of the premiums written to the income statement and charge the cost of the claims incurred on final settlement thereof to income. Insurance entities are therefore required to accrue the unearned loss and profit credited to their income statements and the accrued costs not charged to income at the end of the period.

The most significant accruals that consolidated entities recognized in relation to direct insurance contracts that they arranged relate to the following (see Note 24):

- Life insurance provisions: Represents the value of the net obligations undertaken with the life insurance policyholder. These provisions include:
 - Provision for unearned premiums: These are intended for the accrual, at the date of calculation, of the premiums written. Their balance reflects the portion of the premiums accrued up to the end of the period that has to be allocated to the period from the reporting date to the end of the policy period.
 - Mathematical provision: Represents the value of the life insurance obligations of the insurance companies at the year-end, net of the policyholder's obligations.
- Non-life insurance provisions:
 - Provisions for unearned premiums: Provisions for unearned premiums intended for the accrual, at the date of calculation, of the premiums written. Their balance reflects the portion of the premiums accrued up to the end of the period that has to be allocated to the period from the reporting date to the end of the policy period.
 - Provisions for unexpired risks: The provision for unexpired risks supplements the provision for unearned premiums by the amount by which that provision is not sufficient to reflect the assessed risks and expenses to be covered by the insurance companies in the policy period not elapsed at the year-end.
- Provision for claims: This reflects the total amount of the outstanding obligations arising from claims incurred prior to the end of the period. Insurance companies calculate this provision as the difference between the total estimated or certain cost of the claims not yet reported, settled or paid, and the total amounts already paid in relation to these claims.
- Provision for bonuses and rebates: This provision includes the amount of the bonuses accruing to
 policyholders, insurees or beneficiaries and the premiums to be returned to policyholders or

insurees, as the case may be, based on the behavior of the risk insured, to the extent that such amounts have not been individually assigned to each of them.

- Technical provisions for reinsurance ceded: Calculated by applying the criteria indicated above for direct insurance, taking account of the assignment conditions established in the reinsurance contracts in force.
- Other technical provisions: Insurance companies have recognized provisions to cover the probable mismatches in the market reinvestment interest rates with respect to those used in the valuation of the technical provisions.

The Group controls and monitors the exposure of the insurance companies to financial risk and, to this end, uses internal methods and tools that enable it to measure credit risk and market risk and to establish the limits for these risks.

Reinsurance assets and liabilities under insurance contracts

The heading "Reinsurance assets" in the accompanying consolidated balance sheets includes the amounts that the consolidated entities are entitled to receive under the reinsurance contracts entered into by them with third parties and, more specifically, the share of the reinsurer in the technical provisions recognized by the consolidated insurance entities (see Note 18).

The heading "Liabilities under insurance contracts" in the accompanying consolidated balance sheets includes the technical provisions for direct insurance and inward reinsurance recognized by the consolidated entities to cover claims arising from insurance contracts in force at period-end (see Note 24).

The income or expense reported by the Group's insurance companies on their insurance activities is recognized, attending to it nature in the corresponding items of the accompanying consolidated income statements.

2.2.10. TAX ASSETS AND LIABILITIES

Corporation tax expense in Spain and the expense for similar taxes applicable to the consolidated entities abroad are recognized in the consolidated income statement, except when they result from transactions on which the profits or losses are recognized directly in equity, in which case the related tax effect is also recognized in equity.

The current income tax expense is calculated by aggregating the current tax arising from the application of the related tax rate to the taxable profit (or tax loss) for the year (after deducting the tax credits allowable for tax purposes) and the change in deferred tax assets and liabilities recognized in the consolidated income statement.

Deferred tax assets and liabilities include temporary differences, measured at the amount expected to be payable or recoverable on future fiscal years for the differences between the carrying amount of assets and liabilities and their tax bases, and tax loss and tax credit carry forwards. These amounts are measured applying to each temporary difference the tax rates that are expected to apply when the asset is realized or the liability settled (Note 21).

The "Tax assets" heading in the accompanying consolidated balance sheets includes the amount of all tax assets, divided into: "Current" (amounts recoverable by tax in the next twelve months) and "Deferred" (including taxes recoverable in future years, including loss carryforwards or tax credits for deductions and tax rebates pending application).

The "Tax liabilities" heading in the accompanying consolidated balance sheets includes the amount of all tax liabilities, except for provisions for taxes, are broken down into: "Current" (income tax payable on taxable profit for the year and other taxes payable in the next twelve months) and "Deferred" (income taxes payable in subsequent years).

Deferred tax liabilities in relation to taxable temporary differences associated with investments in subsidiaries, associates or jointly controlled entities are recognized as such, except where the Group can control the timing of the reversal of the temporary difference and it is unlikely that it will reverse in the foreseeable future.

Deferred tax assets are recognized to the extent that it is considered probably that the consolidated entities will have sufficient taxable profits in the future against which the deferred tax assets can be utilized and are

not from the initial recognition (except in the case of a combination of business) of other assets or liabilities in a transaction that does not affect the fiscal outcome or the accounting result.

The deferred tax assets and liabilities recognized are reassessed by the consolidated entities at each balance sheet date in order to ascertain whether they are still current, and the appropriate adjustments are made on the basis of the findings of the analyses performed.

The income and expenses directly recognized in equity that do not increase or decrease taxable income are accounted as temporary differences.

2.2.11. PROVISIONS, CONTINGENT ASSETS AND CONTINGENT LIABILITIES

The heading "Provisions" in the accompanying consolidated balance sheets includes amounts recognized to cover the Group's current obligations arising as a result of past events. These are certain in terms of nature but uncertain in terms of amount and/or cancellation date. The settlement of these obligations is deemed likely to entail an outflow of resources embodying economic benefits (see Note 25). The obligations may arise in connection with legal or contractual provisions, valid expectations formed by Group companies relative to third parties in relation to the assumption of certain responsibilities or through virtually certain developments of particular aspects of applicable regulation, specifically draft legislation to which the Group will certainly be subject.

Provisions are recognized in the balance sheet when each and every one of the following requirements is met: The Group has an existing obligation resulting from a past event and, at the consolidated balance sheet date, it is more likely than not that the obligation will have to be settled; it is probable that to settle the obligation the entity will have to give up resources embodying economic benefits; and a reliable estimate can be made of the amount of the obligation. This heading includes provisions for tax and legal litigation.

Contingent assets are possible assets that arise from past events and whose existence is conditional on, and will be confirmed only by the occurrence or non-occurrence of, events beyond the control of the Group. Contingent assets are not recognized in the consolidated balance sheet or in the consolidated income statement; however, they are disclosed in the notes to financial statements, provided that it is probable that these assets will give rise to an increase in resources embodying economic benefits (see Note 36).

Contingent liabilities are possible obligations of the Group that arise from past events and whose existence is conditional on the occurrence or non-occurrence of one or more future events beyond the control of the entity. They also include the existing obligations of the entity when it is not probable that an outflow of resources embodying economic benefits will be required to settle them or when, in extremely rare cases, their amount cannot be measured with sufficient reliability.

2.2.12. POST-EMPLOYMENT BENEFITS AND OTHER LONG-TERM COMMITMENTS TO EMPLOYEES

Below is a description of the most significant accounting criteria relating to the commitments to employees, related to post-employment benefits and other long term commitments, of certain Group companies in Spain and abroad (see Note 26).

Commitments valuation: actuarial assumptions and gains/losses recognition

The present values of the commitments are quantified on a case-by-case basis. The valuation method used for current employees is the projected unit credit method, which views each year of service as giving rise to an additional unit of benefit entitlement and measures each unit separately.

In adopting the actuarial assumptions, the following are taken into account:

- They are unbiased, in that they are neither imprudent nor excessively conservative.
- They are mutually compatible, reflecting the economic relationships between factors such as inflation, rates of salary increase, discount rates and expected return of assets. The expected return of plan assets in the post-employment benefits is estimated taking into account the market expectations and the distribution of such assets in the different portfolios.
- The future levels of salaries and benefits are based on market expectations at the balance sheet date for the period over which the obligations are to be settled.

 The discount rate used is determined by reference to market yields at the balance sheet date on high quality corporate bonds or debentures.

The Group recognizes all actuarial differences under the heading "Provisions (net)" (see Note 48) in the accompanying consolidated income statements for the period in which they arise in connection with commitments assumed by the Group for its staff's early retirement schemes, benefits awarded for seniority and other similar concepts.

The Group recognizes the actuarial gains or losses arising on all other defined benefit post-employment commitments directly under the heading "Reserves" (see Note 29) in the accompanying consolidated balance sheets.

The Group does not apply the option of deferring actuarial gains and losses in equity to any of its employee commitments using the so-called corridor approach.

Post-employment benefits

- Pensions

Post-employment benefits include defined-contribution and defined-benefit commitments.

- Defined-contribution commitments

The amounts of these commitments are determined as a percentage of certain remuneration items and/or as a pre-established annual amount. The contributions made each period by the Group's companies for defined-contribution retirement commitments, which are recognized with a charge to the heading "Personnel expenses- Contribution to external pension funds" in the accompanying consolidated income statements (see Note 46).

- Defined-benefit commitments

Some of the Group's companies have defined-benefit commitments for permanent disability and death of certain current employees and early retirees; and defined-benefit retirement commitments applicable only to certain groups of serving employees, or early retired employees and retired employees. Defined benefit commitments are funded by insurance contracts and internal provisions.

The amounts recognized in the heading "Provisions – Provisions for pensions and similar obligations" (see Note 25) are the differences between the present values of the vested obligations for defined obligation retirement commitments at balance sheet date, adjusted by the prior service cost and the fair value of plan assets, if applicable, which are to be used directly to settle employee benefit obligations.

These retirement commitments are charged to the heading "Provisions (net)" in the accompanying consolidated income statements (see Note 48).

The current contributions made by the Group's companies for defined-benefit retirement commitments covering current employees are charged to the heading "Administration costs - Personnel expenses" in the accompanying consolidated income statements (see Note 46).

- Early retirements

In the first half of 2010, as in previous years, the Group offered some employees in Spain the possibility of taking early retirement before the age stipulated in the collective labor agreement then in force. The corresponding provisions by the Group were recognized with a charge to the heading "Provisions (net)" in the accompanying consolidated income statements (see Note 48). The present values for early retirement are quantified on a case-by-case basis and they are recognized in the heading "Provisions – Provision for pensions and similar obligations" in the accompanying consolidated balance sheets (see Note 25).

The commitments to early retirees include the compensation and indemnities and contributions to external pension funds payable during the year of early retirement. The commitments relating to this group of employees after they have reached normal retirement age are included in the previous section "Pensions".

- Other post-employment welfare benefits

Some of the Group's companies have welfare benefit commitments whose effects extend beyond the retirement of the employees entitled to the benefits. These commitments relate to certain current employees and retirees, depending upon the employee group to which they belong.

The present values of the vested obligations for post-employment welfare benefits are quantified on a case-by-case basis. They are recognized in the heading "Provisions – Provision for pensions and similar obligations" in the accompanying consolidated balance sheets (see Note 25) and they are charged to the heading "Personnel expenses – Other personnel expenses" in the accompanying consolidated income statements (see Note 46).

Other long-term commitments to employees

Some of the Group's companies are obliged to deliver goods and services. The most significant, in terms of the type of compensation and the event giving rise to the commitments are as follows: loans to employees, life insurance, study assistance and long-service bonuses.

Some of these commitments are measured according to actuarial studies, so that the present values of the vested obligations for commitments with personnel are quantified on a case-by-case basis. They are recognized in the heading "Provisions – Other provisions" in the accompanying consolidated balance sheets (see Note 25).

The welfare benefits delivered by the Spanish companies to active employees are recognized in the heading "Personnel expenses - Other personnel expenses" in the accompanying income statements (see Note 46).

Other commitments for current employees accrue and are settled on a yearly basis, so it is not necessary to record a provision in this connection.

2.2.13. EQUITY-SETTLED SHARE-BASED PAYMENT TRANSACTIONS

Equity-settled share-based payment transactions, when the instruments granted do not vest until the counterparty completes a specified period of service, shall be accounted for those services as they are rendered by the counterparty during the vesting period, with a corresponding increase in equity. The entity measures the goods or services received and the corresponding increase in equity, directly, at the fair value of the goods or services received, unless that fair value cannot be estimated reliably. If the entity cannot estimate reliably the fair value of the goods or services received, the entity measures their value and the corresponding increase in equity indirectly, by reference to the fair value of the equity instruments granted, at grant date.

When the initial compensation agreement includes what may be considered market conditions among its terms, any changes in these conditions will not be reflected on the profit and loss account, as these have already been accounted for in calculating their initial fair value. Non-market vesting conditions are not taken into account when estimating the initial fair value of instruments, but they are taken into account when determining the number of instruments to be granted. This will be recognized on the income statement with the corresponding increase in equity.

2.2.14. TERMINATION BENEFITS

Termination benefits must be recognized when the Group is committed to severing its contractual relationship with its employees and, to this end, has a formal detailed redundancy plan. There were no redundancy plans in the Group entities, so it is not necessary to recognize a provision for this item.

2.2.15. TREASURY STOCK

The amount of the equity instruments that the Group's entities own is recognized under "Stockholders' funds - Treasury stock" in the accompanying consolidated balance sheets. The balance of this heading relates mainly to Bank shares held by some of its consolidated companies (see Note 30).

These shares are recognized at acquisition cost, and the gains or losses arising on their disposal are credited or debited, as appropriate, to the heading "Stockholders' funds - Reserves" in the accompanying consolidated balance sheets (see Note 29).

2.2.16. FOREIGN CURRENCY TRANSACTIONS AND EXCHANGE DIFFERENCES

The Group's functional currency is the euro. Therefore, all balances and transactions denominated in currencies other than the euro are deemed to be denominated in "foreign currency". The balances in the financial statements of consolidated entities whose functional currency is not the euro are converted to euros as follows:

- Assets and liabilities: at the average spot exchange rates as of the date of each of the accompanying consolidated balance sheets.
- Income and expenses and cash flows: at the average exchange rates for the period from January 1,
 2010 to the date of each of the accompanying consolidated income statements.
- Equity items: at the historical exchange rates.

The exchange differences arising from the conversion of foreign currency balances to the functional currency of the consolidated entities and their branches are generally recognized in the "Net exchange differences" heading of the consolidated income statement. Exceptionally, the exchange differences arising on non-monetary items whose fair value is adjusted with a balancing item in equity are recognized under the heading "Valuation adjustments - Exchange differences" in the consolidated balance sheet.

The exchange differences arising from the conversion to euros of balances in the functional currencies of the consolidated entities whose functional currency is not the euro are recognized under the heading "Valuation adjustments – Exchange differences" in the consolidated balance sheet. Meanwhile, the differences arising from the conversion to euros of the financial statements of entities accounted for by the equity method are recognized under the heading "Valuation adjustments - Entities accounted for using the equity method" until the item to which they relate is derecognized, at which time they are recognized in the income statement.

The breakdown of the main balances in foreign currencies of the accompanying consolidated balance sheets, with reference to the most significant foreign currencies, are set forth in Appendix IX.

2.2.17. RECOGNITION OF INCOME AND EXPENSES

The most significant criteria used by the Group to recognize its income and expenses are as follows:

Interest income and expenses and similar items

As a general rule, interest income and expenses and similar items are recognized on the basis of their period of accrual using the effective interest rate method. Specifically, the financial fees and commissions that arise on the arrangement of loans, basically origination and analysis fees, must be deferred and recognized in the income statement over the expected life of the loan. The direct costs incurred in arranging these transactions can be deducted from the amount thus recognized. Also, dividends received from other companies are recognized as income when the consolidated companies' right to receive them arises.

However, when a debt instrument is deemed to be impaired individually or is included in the category of instruments that are impaired because of amounts more than three months past-due, the recognition of accrued interest in the consolidated income statement is interrupted. This interest is recognized for accounting purposes as income, as soon it is received, from the recovery of the impairment loss.

Commissions, fees and similar items

Income and expenses relating to commissions and similar fees are recognized in the consolidated income statement using criteria that vary according to the nature of such items. The most significant income and expense items in this connection are:

- Those relating to financial assets and liabilities measured at fair value through profit or loss, which
 are recognized when collected.
- Those arising from transactions or services that are provided over a period of time, which are recognized over the life of these transactions or services.
- Those relating to single acts, which are recognized when this single act is carried out.

Non-financial income and expenses

These are recognized for accounting purposes on an accrual basis.

Deferred collections and payments

These are recognized for accounting purposes at the amount resulting from discounting the expected cash flows at market rates.

2.2.18. SALES AND INCOME FROM THE PROVISION OF NON-FINANCIAL SERVICES

The heading "Other operating income - Financial income from non-financial services" in the accompanying consolidated income statements includes the carrying amount of the sales of assets and income from the services provided by the consolidated Group companies that are not financial institutions. In the case of the Group, these companies are mainly real estate and services companies (see Note 45).

2.2.19. LEASES

Lease contracts are classified as finance from the start of the transaction, if they transfer substantially all the risks and rewards incidental to ownership of the asset forming the subject-matter of the contract. Leases other than finance leases are classified as operating leases.

When the consolidated entities act as the lessor of an asset in finance leases, the aggregate present values of the lease payments receivable from the lessee plus the guaranteed residual value (normally the exercise price of the lessee's purchase option on expiration of the lease agreement) are recognized as financing provided to third parties and, therefore, are included under the heading "Loans and receivables" in the accompanying consolidated balance sheets.

When the consolidated entities act as lessors of an asset in operating leases, the acquisition cost of the leased assets is recognized under "Tangible assets – Property, plants and equipment – Other assets leased out under an operating lease" in the accompanying consolidated balance sheets (see Note 19). These assets are depreciated in line with the criteria adopted for items of tangible assets for own use, while the income arising from the lease arrangements is recognized in the accompanying consolidated income statements on a straight line basis within "Other operating income - Rest of other operating income " (see Note 45).

If a fair value sale and leaseback results in an operating lease, the profit or loss generated is recognized at the time of sale. If such a transaction gives rise to a finance lease, the corresponding gains or losses are amortized over the lease period.

The assets leased out under operating lease contracts to other entities in the Group are treated in the consolidated financial statements as for own use, and thus rental expense and income is eliminated and the corresponding depreciation is registered.

2.2.20. CONSOLIDATED STATEMENTS OF RECOGNIZED INCOME AND EXPENSES

The consolidated statements of recognized income and expenses reflect the income and expenses generated each year. It distinguishes between those recognized as results in the consolidated income statements from "Other recognized income (expenses)" recognized directly in the total equity.

"Other recognized income (expenses)" include the changes that have taken place in the year in the "Valuation adjustments" broken down by item.

The sum of the changes to the heading "Valuation adjustments" of the total equity and the income of the year forms the "Total recognized income/expenses".

2.2.21. CONSOLIDATED STATEMENTS OF CHANGES IN EQUITY

The consolidated statements of changes in equity reflect all the movements generated in each year in each of the headings of the consolidated equity, including those from transactions undertaken with shareholders when they act as such, and those due to changes in accounting criteria or corrections of errors, if any.

The applicable regulations establish that certain categories of assets and liabilities are recognized at their fair value with a charge to equity. These charges, known as "Valuation adjustments" (see Note 31), are included in the Group's total consolidated equity net of tax effect, which has been recognized as deferred tax assets or liabilities, as appropriate.

2.2.22. CONSOLIDATED STATEMENTS OF CASH FLOWS

The indirect method has been used for the preparation of the consolidated statement of cash flows. This method starts from the entity's consolidated net income and adjusts its amount for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments, and items of income or expense associated cash flows classified as investment or finance.

For these purposes, in addition to cash on hand, cash equivalents include very short term, highly liquid investments subject to very low risk of impairment.

The composition of component of cash and equivalents with respect to the headings of the consolidated balance sheets is shown in the accompanying consolidated cash flow statements.

To prepare the consolidated cash flow statements, the following items are taken into consideration:

- Cash flows: Inflows and outflows of cash and cash equivalents, the latter being short-term, highly
 liquid investments subject to a low risk of changes in value, such as balances with central banks,
 short-term Treasury bills and notes, and demand deposits with other credit institutions.
- Operating activities: The typical activities of credit institutions and other activities that cannot be classified as investing or financing activities.
- Investing activities: The acquisition, sale or other disposal of long-term assets and other investments not included in cash and cash equivalents.
- Financing activities: Activities that result in changes in the size and composition of equity and of liabilities that do not form part of operating activities.

2.2.23. ENTITIES AND BRANCHES LOCATED IN COUNTRIES WITH HYPERINFLATIONARY ECONOMIES

In accordance with the IFRS-EU criteria, to determine whether an economy has a high inflation rate the country's economic situation is examined, analyzing whether certain circumstances are fulfilled, such as whether the population prefers to keep its wealth or save in non-monetary assets or in a relatively stable foreign currency, whether prices can be set in that currency, whether interest rates, wages and prices are pegged to a price index or whether the accumulated inflation rate over three years reaches or exceeds 100%. The fact that any of these circumstances is fulfilled will not be a decisive factor in considering an economy hyperinflationary, but it does provide some reasons to consider it as such.

Since the end of 2009, the Venezuelan economy is considered to be hyperinflationary as defined by the aforementioned criteria. Accordingly, as of June 30, 2010 and December 31, 2009, it was necessary to adjust the financial statements of the Group's subsidiaries based in Venezuela to correct for the effect of inflation. Pursuant to the requirements of IAS 29, the monetary headings (mainly loans and credits) have not been re-expressed, while the non-monetary headings (mainly tangible fixed assets) have been re-expressed in accordance with the change in the country's Consumer Price Index.

The historical differences as of January 1, 2009 between the re-expressed costs and the previous costs in the non-monetary headings were credited to "Reserves" on the consolidated balance sheet for 2009, while the differences for 2009, and the re-expression of the income statement as of December 31, 2009 were recognized in the consolidated income statement for 2009.

The effects of inflation accounting in Venezuela in the consolidated income statement corresponding to the six months ended June 30, 2010 were not significant.

In January 2010, the Venezuelan authorities announced the devaluation of the Venezuelan bolivar with regard to the main foreign currencies and that other economic measures will be adopted. The effects of this devaluation in the consolidated income statement corresponding to the six months ended June 30, 2010 and on consolidated equity were not significant.

2.3 RECENT IFRS PRONOUNCEMENTS

a) STANDARDS AND INTERPRETATIONS EFFECTIVE DURING THE SIX MONTHS PERIOD ENDED JUNE 30, 2010

The following modifications to the IFRS or their interpretations (IFRIC) came into force in the first half of 2010. Their integration in the Group has not had a significant impact on these interim consolidated financial statements:

Second IFRS annual improvements project

The IASB published its second annual improvements project, which includes small amendments in the IFRS. These are mostly applicable for the annual period starting after January 1, 2010.

The amendments are focused mainly on eliminating inconsistencies between some IFRS and on clarifying terminology.

IFRS 2 Amended - Share-based payment

The IASB published an amendment to IFRS 2 - "Share-based payment" on how a subsidiary is to account, in its individual financial statements, for share-based payment arrangements of the group (for both creditors and employees) in the event the payment is made with another Group subsidiary or the parent company.

The amendments made clarify that the entity receiving the goods and services in a share-based payment transaction must, in its financial statements, account for said goods and services in accordance with IFRS 2, regardless of which group entity makes the payment or of the payment being made in shares or cash. Under IFRS 2, the Group includes the parent company and its subsidiaries, in line with that stipulated in IAS 27 - Consolidate and separate financial statements.

Furthermore, the contents of IFRIC 8 - "Scope of IFRS 2" and IFRIC 11- "Group and Treasury Share Transactions" are incorporated into IFRS 2, thus nullifying them.

IFRS 3 Revised – Business combinations, and Amendment to IAS 27 - Consolidated and separate financial statements

The amendments to IFRS 3 and IAS 27 represent some significant changes to various aspects related to accounting for business combinations. They generally place more emphasis on using the fair value. Some of the main changes are: acquisition costs will be recognized as expense instead of the current practice of considering them at the greater the cost of the business combination; acquisitions in stages, in which at the time of the takeover the acquirer will revalue its investment at fair value or there is the option of valuing the non-controlling interests in the acquired company at fair value, instead of the current practice of only valuing the proportional share of the fair value of the acquired net assets.

For the six months ended June 30, 2010, no significant business combination has required the application of the modifications established in the IFRS 3 and IAS 27 standards.

IAS 39 Amended - Financial Instruments: Recognition and valuation. Eligible hedged items

The amendment to IAS 39 introduces new requirements on eligible hedged items.

The amendment stipulates that:

- Inflation may not be designated as a hedged item unless it is identifiable and the inflation portion is a
 contractually specified portion of cash flows of an inflation-linked financial instrument, and the rest of
 the cash flows are not affected by the inflation-linked portion.
- When changes in cash flows or the fair value of an item are hedged above or below a specified price
 or other variable (a one-side risk) via a purchased option, the intrinsic value and time value
 components of the option must be separated and only the intrinsic value may be designated as a
 hedging instrument.

IFRIC 17 - Distributions of non-cash assets to owners

This new interpretation stipulates that all distributions of non-cash assets to owners must be valued at fair value, clarifying that:

- The dividend payable should be recognized when the dividend is appropriately authorized and is no longer at the discretion of the entity.
- An entity should recognize the difference between the dividend paid and the carrying amount of the net assets distributed in profit or loss.

IFRIC 18 -Transfer of assets from customers

This clarifies the requirements for agreements in which an entity receives an item of property, plant, and equipment from a customer which the entity must then use either to connect the customer to a network or to provide the customer with ongoing access to a supply of goods or services, or both.

The basic principle of IFRIC 18 is that when the item of property, plant and equipment meets the definition of an asset from the perspective of the recipient, the recipient must recognize the asset at its fair value on the date of the transfer with a balancing entry in ordinary income in accordance with IAS 18.

b) STANDARDS AND INTERPRETATIONS ISSUED BUT NOT YET EFFECTIVE FOR THE GROUP AS OF JUNE 30, 2010

New International Financial Reporting Standards together with their interpretations (IFRIC) had been published at the date of close of these consolidated financial statements. These were not obligatory as of June 30, 2010. Although in some cases the IASB permits early adoption before they enter into force, the Group has not done so as of this date.

The future impacts that the adoption of these standards could have not been analyzed to date.

IAS 24 Revised - Related party disclosures

This amendment to IAS 24 refers to the disclosures of related parties in the financial statements. There are two main new features. One of them introduces a partial exemption for some disclosures when the relationship is with companies that depend on or are related to the State (or an equivalent governmental institution) and the definition of related party is revised, establishing some relations that were not previously explicit in the standard.

This amendment will apply for years beginning after January 1, 2011. Early adoption is permitted.

IAS 32 - Classification of preferred subscription rights

The amendment to IAS 32 clarifies the classification of preferred subscription rights (instruments that entitle the holder to acquire instruments from the entity at a fixed price) when they are in a currency other than the issuer's functional currency. The proposed amendment establishes that the rights to acquire a fixed number of own equity instruments for a fixed amount will be classified as equity regardless of the currency of the exercise price and whether the entity gives the tag-along rights to all of the existing shareholders (in accordance with current standards they must be posted as liability derivatives).

This amendment will apply for years beginning after February 1, 2010. Early adoption is permitted.

IFRIC 14 Amended - Prepayment of Minimum Funding Contributions

The IASB issued an amendment to IFRIC 14 to correct the fact that, under the current IFRIC 14, in certain circumstances it is not permitted to recognize some prepayments of minimum funding contributions as assets.

This amendment will apply for years beginning after January 1, 2011. Early adoption is permitted.

IFRIC 19- Settlement of financial liabilities through equity instruments

In the current market situation, some entities are renegotiating conditions regarding financial liabilities with their creditors. There are cases in which creditors agree to receive equity instruments that the debtor has issued to cancel part or all of the financial liabilities. IFRIC 19 has issued an interpretation that clarifies the posting of these transactions from the perspective of the instruments issuer, and states that these securities must be valued at fair value. If this value cannot be calculated, they will be valued at the fair value of the

cancelled liability. The difference between the cancelled liability and the issued instruments will be recognized in the income statement.

This amendment will apply for years beginning after July 1, 2010. Early adoption is permitted.

IFRS 9 - Financial Instruments

On November 12, 2009, the IASB published IFRS 9 – Financial Instruments as the first stage of its plan to replace IAS 39 – Financial Instruments: Recognition and Valuation. IFRS 9, which introduces new requirements for the classification and valuation of financial assets, is compulsory from January 1, 2013 onwards, although voluntary adoption is permitted from December 31, 2009 onwards. The European Commission has decided not to adopt IFRS 9 for the time being. The possibility of early adoption of this first part of the standard ended for European entities.

The IASB intends to extend IFRS 9 during 2010 to add new requirements for the classification and valuation of financial liabilities, derecognize financial instruments, impairment methodology and hedge accounting. By the end of 2010 IFRS 9 will have completely replaced IAS 39.

Third annual improvements project for the IFRS

The IASB has published its third annual improvements project, which includes small amendments in the IFRS. These will mostly be applicable for annual periods starting after January 1, 2011.

The amendments are focused mainly on eliminating inconsistencies between some IFRS and on clarifying terminology.

3. BANCO BILBAO VIZCAYA ARGENTARIA GROUP

The BBVA Group is an international diversified financial group with a significant presence in retail banking, wholesale banking, asset management and private banking. The Group also engages in business activity in other sectors, such as insurance, real estate and operational leasing.

The following table sets forth information related to the Group's total assets as of June 30, 2010 and December 31, 2009 the Group's income attributed to parent company for the six months ended June 30, 2010 and year ended December 31, 2009, broken down by the companies in the group according to their activity:

		Millions of Euros/Percentages					
Contribution to Consolidated Group. Entities by Main Activities June 2010	Total Assets Contributed to the Group	% of the Total Assets of the Group	Net Income Attributed to Parent Company	% of the Net Income Attributed to Parent Company			
Banks	528,189	92.85%	2,196	86.91%			
Financial services	8,618	1.51%	136	5.39%			
Portfolio, securities dealers and mutual funds management companies	11,903	2.09%	(216)	(8.55%)			
Insurance and pension fund managing company	17,598	3.09%	410	16.23%			
Real Estate, services and other entities	2,609	0.46%	1	0.02%			
Total	568.917	100.00%	2.527	100.00%			

		Millions of Euros/ Percentage					
Contribution to Consolidated Group. Entities by Main Activities	Total Assets Contributed to the Group December 2009	% of the Total Assest of the Group December 2009	Net Income Attributed to Parent Company June 2009	% of the Net Income Attributed to Parent Company June 2010			
Banks	505,398	94.46%	2,566	91.68%			
Financial services	7,980	1.49%	135	4.82%			
Portfolio, securities dealers and mutual funds management							
companies	3,053	0.57%	(252)	(9.00%)			
Insurance and pension fund managing company	16,168	3.02%	373	13.32%			
Real Estate, services and other entities	2,466	0.46%	(23)	(0.82%)			
Total	535.065	100.00%	2.799	100,00%			

The Group's activity is mainly located in Spain, Mexico, the United States and Latin America, with an active presence in Europe and Asia (see Note 17).

As of June 30, 2010, and December 31, 2009, the total assets of the Group's most significant subsidiaries, broken down by countries in which the Group operates, were as follows:

	Millions of E	Millions of Euros		
otal Assets by Countries	June 2010	December 2009		
Spain	379,000	370,621		
Mexico	73,242	61,655		
The United States	58,056	49,576		
Chile	12,333	10,253		
Venezuela	8,315	11,410		
Colombia	8,286	6,532		
Peru	9,150	7,311		
Argentina	5,949	5,030		
Rest	14,586	12,677		
otal	568,917	535,065		

For the six months ended June 30, 2010 and 2009, the "Interest and similar income" of the Group's most significant subsidiaries, broken down by countries where Group operates, were as follows:

	Millions of Eur	Millions of Euros		
nterest and Similar Income by Countries	June 2010	June 2009		
Spain	4,759	6,826		
Mexico	2,704	2,863		
The United States	1,046	1,011		
Chile	387	235		
Venezuela	444	722		
Colombia	345	401		
Peru	280	305		
Argentina	285	298		
Rest	207	250		
otal	10,457	12,911		

Appendix II shows relevant information on the Group's subsidiaries as of June 30, 2010.

Appendix III shows relevant information on the consolidated jointly controlled entities accounted for using the proportionate consolidation method, as of June 30, 2010.

Appendix V shows the main changes in ownership interests for the six months ended June 30, 2010.

Appendix VI shows details of the subsidiaries under the full consolidation method and which, based on the information available, were more than 10% owned by non-Group shareholders as of June 30, 2010.

- Spain

The Group's activity in Spain is fundamentally through BBVA, which is the parent company of the BBVA Group. Appendix I shows BBVA's interim individual financial statements as of June 30, 2010.

The following table sets forth BBVA's total assets and income before tax as a proportion of the total assets and consolidated income before tax of the Group, as of June 30, 2010 and December 31, 2009:

	Millions of E	uros
Percentage of BBVA, S.A. of the Total Assets and Pre-Tax Profit	June 2010	December 2009
% BBVA Assets over Group Assets	63%	67%
% BBVA Income before tax over consolidated income before tax	42%	49%

The Group also has other companies in Spain's banking sector, insurance sector, real estate sector and service and operating lease companies.

- Mexico

The Group's presence in Mexico dates back to 1995. It operates mainly through Grupo Financiero BBVA Bancomer, both in the banking sector through BBVA Bancomer, S.A. and in the insurance and pensions business through Seguros Bancomer S.A. de C.V., Pensiones Bancomer S.A. de C.V. and Administradora de Fondos para el Retiro Bancomer, S.A. de C.V.

- United States and Puerto Rico

In recent years, the Group has expanded its presence in the United States through the acquisition of several financial groups operating in various southern states. In 2007 the Group acquired Compass Bancshares Inc. and State National Bancshares Inc., taking control of these entities and the companies in their groups. The merger between the three banks based in Texas owned by the Bank (Laredo National Bank, Inc., Texas National Bank, and State National Bank) and Compass Bank, Inc. took place in 2008.

In 2009, through its subsidiary BBVA Compass, the Group acquired certain assets and liabilities of Guaranty Bank, Inc. (hereinafter, "Guaranty Bank") from the Federal Deposit Insurance Corporation (hereinafter, "FDIC"). At the date of acquisition, Guaranty Bank operated 105 branches in Texas and 59 in California.

The BBVA group also has a significant presence in Puerto Rico through its subsidiary BBVA Puerto Rico, S.A.

- Latin America

The Group's activity in Latin America is mainly focused on the banking, insurance and pensions sectors, in the following countries: Chile, Venezuela, Colombia, Peru, Argentina, Panama, Paraguay and Uruguay. It is also active in Bolivia and Ecuador in the pensions sector.

The Group owns more than 50% of most of the companies in these countries. Below is a list of the companies which, although less than 50% owned by the BBVA Group, as of June 30, 2010, are fully consolidated at this date as a result of agreements between the Group and the other shareholders giving the Group effective control of these entities (see Note 2.1):

Companies with a Less than a 50% Share but that have entered into Agreements for Control with other Shareholders	% Controlled Voting Rights	V₂ ()wn≙rehin
Banco Continental, S.A.	92.2	46.1
Comercializadora Corporativa SAC	100.0	50.0
Continental Bolsa, Sociedad Agente de Bolsa, S.A.	100.0	46.1
Continental DPR Finance Company	100.0	46.1
Continental Sociedad Titulizadora, S.A.	100.0	46.1
Continental, S.A. Sociedad Administradora de Fondos	100.0	46.1
Inmuebles y Repercusiones Continental, S.A.	100.0	46.1
Banco Provincial Overseas N.V.	100.0	48.0

Changes in the Group

The most significant changes in subsidiaries during the six months ended June 30, 2010 and 2009 are as follows:

In the six months period ended June 30, 2010

• Purchase of Credit Uruguay Banco

In May 2010, the Group announced that it has reached an agreement to acquire, through its subsidiary BBVA Uruguay, the Credit Uruguay Banco, from a French financial group for an approximate total of 100 million US dollars. This acquisition has not yet been formalized, as it was still pending the corresponding authorizations at the time these accompanying interim consolidated financial statements were prepared.

In 2009

Purchase of assets and liabilities of Guaranty Bank

On August 21, 2009, through its subsidiary BBVA Compass, the Group acquired certain Guaranty Bank assets and liabilities from FDIC through a public auction for qualified investors.

BBVA Compass acquired assets, mostly loans, for approximately \$11,441 million (approximately €8,016 million) and assumed liabilities, mostly customer deposits, for \$12,854 million (approximately €9,006 million). These acquired assets and liabilities represented 1.5% and 1.8% of the Group's total assets and liabilities, respectively, on the acquisition date.

In addition, the purchase included a loss-sharing agreement with the U.S. supervisory body FDIC under which the latter undertook to assume 80% of the losses of the loans purchased by the BBVA Group up to the first \$2,285 million, and up to 95% of the losses if they exceeded this amount. This commitment has a maximum term of 5 or 10 years, based on the portfolios.

4. DIVIDENDS PAID BY THE BANK

The dividends paid per share during the six months ended June 30, 2010 and 2009, respectively, were as follows:

		June 2010			June 2009	
Dividends Paid	% Over Nominal	Euros per Share	Amount (Millions of Euros)	% Over Nominal	Euros per Share	Amount (Millions of Euros)
Ordinary shares	31%	0.150	562	34%	0.167	626
Rest of shares	-	-	-	-	-	
Total dividends paid	31%	0.150	562	34%	0.167	626
Dividends with charge to income	31%	0.150	562	34%	0.167	626
Dividends with charge to reserve or share premium	-	-	-	-	-	
Dividends in kind	-	-	-	-	-	

On April 12, 2010, the complementary dividend for the year 2009 was paid for a gross amount of €0.150 per share (€0.1215 net per share).

The Board of Directors of Banco Bilbao Vizcaya Argentaria, S.A. at a meeting held on June 30, 2010, resolved to distribute the first dividend against the profit of 2010, amounting to a total of €0.090 gross (€0.0729 net) per share. The aggregate amount of the interim dividends declared as of June 30, 2010 that was paid as of July 10, 2010, net of the amount collected by the Group companies, was €332 million and was recognized under the heading "Stockholders' funds - Dividends and remuneration" in the consolidated balance sheet (Note 23).

The provisional financial statement prepared as of May 31, 2010 by Banco Bilbao Vizcaya Argentaria, S.A. in accordance with legal requirements evidencing the existence of sufficient liquidity for the distribution of the amounts to the interim dividend was as follows:

Available Amount for Interim Dividend Payments	May 31, 2010
Profit at each of the dates indicated, after the provision for income	
tax	1,432
Less -	
Estimated provision for Legal Reserve	
Interim dividends paid	
Maximum amount distributable	1,432

The AGM held on March 13, 2009 approved an additional shareholder remuneration to complement the 2008 cash dividend in the form of an in-kind distribution of a portion of the share premium reserve, €317 million, by giving Banco Bilbao Vizcaya Argentaria, S.A. stockholders shares in the common stock from the treasury stock.

5. EARNINGS PER SHARE

The calculation for earning per share for the six months ended June 30, 2010 and 2009 was as follows:

Basic and Diluted Earnings per Share	June 2010	June 2009
Net income attributed to parent company	2,527	2,799
Adjustment: Mandatory convertible bonds interest expenses	35	
Net income adjusted (Base de cálculo beneficio básico y diluido por a	2,562	2,799
Denominator for earnings per share		
Weighted average number of shares outstanding (*)	3,697	3,703
Average number of estimated shares to be converted	212	
Adjusted number of shares		
(Denominator for basic earnings per share)	3,909	3,703
Basic earnings per share (Euros per share)	0.66	0.76
Diluted earnings per share (Euros per share)	0.66	0.76

Basic earnings per share are determined by dividing the "Net income attributed to parent company" from the accompanying consolidated income statements by the weighted average number of shares outstanding during the period.

Diluted earnings per share are determined using a method similar to that used to calculate basic earnings per share; however, the weighted average number of shares outstanding is adjusted to take into account the potential dilutive effect of certain financial instruments that could generate the issue of new Bank shares (share option commitments with employees, warrants on parent company shares, convertible debt instruments) or for discontinued operations.

Therefore, in 2009, the Bank issued convertible bonds amounting to €2,000 million, which did not significantly affect the calculation of diluted earnings (see Note 23.4). Since the conversion is obligatory on the date of their final maturity, in accordance with the IAS 33 criteria, the adjustments must be applied to both the calculation of the diluted earnings per share as well as the basic earnings per share.

These adjustments require that, in both the basic earnings and the diluted earnings per share:

In the numerator, the Net income attributed to Parent Company is increased by the amount of the coupon that it would stop paying, generating the so-call "Net income adjusted" from the table above.

- In the denominator, the average number of shares in circulation is increased by the estimated number of shares after the conversion if done that day, generating the so-called "Average adjusted number of shares" in the table above.

As of June 30, 2010 and 2009, except for the aforementioned convertible bonds, there were no other financial instruments, share option commitments with employees or discontinued transactions that could potentially affect the calculation of the basic earnings per share.

6. BASIS AND METHODOLOGY FOR SEGMENT REPORTING

Segment reporting represents a basic tool in the oversight and management of the Group's various businesses. The Group compiles reporting information on as disaggregated a level as possible, and all data relating to the businesses these units manage is recognized in full. These disaggregated units are then amalgamated in accordance with the organizational structure preordained by the Group into higher level units and, ultimately, the business segments themselves. Similarly, all the companies making up the Group are also assigned to the different segments according to their activity.

Once the composition of each business segment has been defined, certain management criteria are applied, noteworthy among which are the following:

• Economic capital: Capital is allocated to each business based on capital at risk (CaR) criteria, in turn predicated on unexpected loss at a specific confidence level, determined as a function of the Group's target capital ratio. This target level is applied at two levels: the first is adjusted core capital, which determines the allocated capital. The Bank uses this amount as a basis for calculating the return generated on the equity in each business (ROE). The second level is total capital, which determines the additional allocation in terms of subordinate debt and preferred securities. The calculation of the CaR combines credit risk, market risk, structural risk associated with the balance sheet equity positions, operational risk, fixed assets and technical risks in the case of insurance companies. These calculations are carried out using internal models that have been defined following the guidelines and requirements established under the Basel II Capital Accord, with economic criteria prevailing over regulatory ones.

Due to its sensitivity to risk, CaR is an element linked to management policies in the businesses themselves. It standardizes capital allocation between them in accordance with the risks incurred and makes it easier to compare profitability. In other words, it is calculated in a way that is standard and integrated for all kinds of risks and for each operation, balance or risk position, allowing its risk-adjusted return to be assessed and an aggregate to be calculated for the return by client, product, segment, unit or business area.

- Internal transfer prices: the calculation of the net interest income of each business is performed
 using rates adjusted for the maturities and rate reset clauses in effect on the various assets and
 liabilities making up each unit's balance sheet. The allocation of profits across business units is
 performed at market prices.
- Allocation of operating expenses: Both direct and indirect expenses are allocated to the segments, except for those items for which there is no clearly defined or close link with the businesses, as they represent corporate/institutional expenses incurred.
- **Cross selling**: On certain occasions, consolidation adjustments are made to eliminate overlap accounted for in the results of one or more units as result of cross-selling focus.

Description of the Group's business segments

The business areas described below are considered the Group's business segments. The composition of the Group's business areas as of June 30, 2010 was as follows:

- Spain and Portugal, which includes: the Retail Banking network in Spain, including the segments of
 individual customers, private banking and small business and retailer banking in the domestic
 market; Corporate and Business Banking, which encompasses the segments of SMEs, corporations,
 institutions and developers in the domestic market; and all other units, among which are Consumer
 Finance, BBVA Seguros and BBVA Portugal.
- Mexico: includes the banking, pensions and insurance businesses in the country.

- **South America**: includes the banking, pensions and insurance businesses in South America.
- United States: includes the banking and insurance businesses in the U.S., as well as those in Puerto Rico.
- Wholesale Banking & Asset Management ("WB&AM"), made up of: Corporate and Investment Banking, which includes the work of offices in Europe and Asia with large corporations and companies; Global Markets, responsible for liquidity assets management and distribution services in the same markets; Asset Management, which includes the management of investment and pension funds in Spain; Project Management, which includes the development of long-term business projects and private equity business developed through Valanza; and Asia, with the participation in the CITIC Group. In addition, WB&AM is present in the above businesses both in Mexico and South America, but its activity and results are included in those business areas for the purposes of these consolidated financial statements.

Corporate Activities: performs management functions for the Group as a whole, essentially management of asset and liability positions in euro-denominated interest rates and in exchange rates, as well as liquidity and capital management functions. The management of asset and liability interest-rate risks in currencies other than the euro is recognized in the corresponding business areas. It also includes the Industrial and Financial Holdings unit and the Group's non-international real estate businesses.

In 2010, certain changes were made in the criteria applied in 2009 in terms of the composition of some of the different business areas, such as:

- The United States and WB&AM: in order to give a global view of the Group's business in the United States, we decided to include the New York office, formerly in WB&AM, in the United States area. This change is consistent with BBVA's current method of reporting its business units.
- **South America**: The adjustment for the hyperinflation is included in 2010 in the accounting statements for Banco Provincial (Venezuela); this will also be carried out for the 2009 statements to make them comparable. At year-end 2009, said impact was included under Corporate Activities.

The data for 2009 have been reworked to ensure that the different years are comparable.

The total breakdown of the Group's assets by business areas as of June 30, 2010 and December 31, 2009 was as follows:

	Millions of Euros		
Total Assets by Bussiness Areas	June 2010	December 2009	
Spain and Portugal	219,440	215,823	
Mexico	73,758	62,855	
South America	48,631	44,378	
The United States	75,011	77,896	
WB&AM	137,454	106,563	
Corporate Activities	14,623	27,550	
Total	568,917	535,065	

The breakdown of the consolidated net income for the six months ended June 30, 2010 and 2009 by business area was as follows:

	Millions of Eur	os	
Net Income attributed by Bussiness Areas	June	June	
Net income attributed by bussiness Areas	2010	2009	
Spain and Portugal	1,186	1,212	
Mexico	798	726	
South America	453	421	
The United States	144	138	
WB&AM	532	477	
Corporate Activities	(586)	(175)	
Subtotal	2,527	2,799	
Non-assigned income	-	-	
Elimination of interim income (between segments)	-	-	
Other gains (losses)	183	243	
Income tax and/or income from discontinued operations	941	961	
INCOME BEFORE TAX	3,651	4,003	

For the six months ended June 30, 2010 and 2009, the breakdown of the ordinary income for each business area, which is made up of the "Interest and similar income", "Dividend income", "Fee and commission income", "Net gains (losses) on financial assets and liabilities" and "Other operating income", is as follows:

	Millions of Eur	ros
otal Ordinary Income by Bussiness Areas	June 2010	June 2009
Spain and Portugal	5,056	5,688
Mexico	4,108	4,05
South America	1,583	1,672
The United States	2,732	2,934
WB&AM	1,102	1,822
Corporate Activities	1,649	1,827
Adjustments and eliminations of ordinary income between segments	_	
otal	16,230	17,998

7. RISK EXPOSURE

Dealing in financial instruments can entail the assumption or transfer of one or more classes of risk by financial institutions. The risks related to financial instruments are:

- Credit risk: credit risk defined as the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.
- Market risks: these are defined as the risks arising from the maintenance of financial instruments whose value may be affected by changes in market conditions. It includes three types of risk:
 - Foreign-exchange risk: this is the risk resulting from variations in foreign exchange rates.
 - Interest rate risk: this arises from variations in market interest rates.
 - Price risk: this is the risk resulting from variations in market prices, either due to factors specific
 to the instrument itself, or alternatively to factors which affect all the instruments traded on the
 market.
- Liquidity risk: this is the possibility that a company cannot meet its payment commitments duly, or, to
 do so, must resort to borrowing funds under onerous conditions, or risking its image and the reputation
 of the entity.

PRINCIPLES AND POLICIES

The general guiding principles followed by the BBVA Group to define and monitor its risk profile are set out below:

- The risk management function is unique, independent and global.
- The assumed risks must be compatible with the target capital adequacy and must be identified, measured and assessed. Monitoring and management procedures and sound control and mitigation systems must likewise be in place.
- All risks must be managed integrally during their life cycle, being treated differently depending on their type and with active portfolio management based on a common measurement (economic capital).
- It is each business area's responsibility to propose and maintain its own risk profile, within their independence in the corporate action framework (defined as the set of risk policies and procedures), using a proper risk infrastructure.
- The risk infrastructure must be suitable in terms of people, tools, databases, information systems and procedures so that there is a clear definition of roles and responsibilities, ensuring efficient assignment of resources among the corporate area and the risk units in business areas.

Building on these principles, the Group has developed an integrated risk management system that is structured around three main components: a corporate risk governance regime, with adequate segregation of duties and responsibilities a set of tools, circuits and procedures that constitute the various different risk management regimes, and an internal risk control system.

- CORPORATE GOVERNANCE SYSTEM

The Group has a corporate governance system which is in keeping with international recommendations and trends, adapted to requirements set by regulators in each country and to the most advanced practices in the markets in which it pursues its business.

In the field of risk management, it is the board of directors that is responsible for approving the risk control and management policy, as well as periodically monitoring internal reporting and control systems.

To perform this function correctly the board is supported by the Executive Committee and a Risk Committee, the main mission of the latter being to assist the board in undertaking its functions associated with risk control and management.

Under Article 36 of the Board Regulations, the Risk Committee is assigned the following functions for these purposes:

- To analyze and evaluate proposals related to the Group's risk management and oversight policies and strategies.
- To monitor the match between risks accepted and the profile established.
- To assess and approve, where applicable, any risks whose size could compromise the Group's capital adequacy or recurrent earnings, or that present significant potential operational or reputational risks.
- To check that the Group possesses the means, systems, structures and resources in accordance with best practices to allow the implementation of its risk management strategy.

The risk management function is distributed into the Risk Units of the business areas and the Corporate Area, which defines the policy, strategies, methodologies and global infrastructure. The Risk Units in the business areas propose and maintain the risk profile of each client independently, but within the corporate framework for action.

The Corporate Risk Area combines the view by risk type with a global view. It is made up of the Corporate Risk Management unit, which covers the different types of risk, the Technical Secretary responsible for technical comparison, which works alongside the transversal units: such as Structural

Management & Asset Allocation, Risk Assessment Methodologies and Technology, and Validation and Control, which include internal control and operational risks.

Using this structure, the risk management system insures the following: first, the integration, control and management of all the Group's risks; second, the application of standardized risk principles, policies and metrics throughout the entire Group; and third, the necessary insight into each geographical region and each business.

This organizational scheme is complemented by different committees, which include the following:

- The task of the Global Internal Control and Operational Risk Committee is to undertake a review at the level of the Group and of each of its units, of the control environment and the running of the Internal Control and Operational Risk Models, and likewise to monitor and locate the main operational risks the Group is subject to, including those that are transversal in nature. This Committee is therefore the highest operational risk management body in the Group.
- This Risk Management Committee is made up of the risk managers from the Risk Units from the business areas and those of the Corporate Risk Area. This body meets monthly and is responsible for establishing the Group's risk strategy (especially as regards policies and structure of the operation of the Group), presenting the risk strategy to the Group's governing bodies for their approval, monitoring the management and control of risks in the Group and, if necessary, adopting the necessary actions.
- The Technical Operations Committee analyzes and approves, if appropriate, transactions and financial programs to the level of its competency, passing on those beyond its scope of power to the Risks Committee.
- The Assets and Liabilities Committee ("ALCO") is responsible for actively managing structural liquidity, interest rate and foreign exchange risks, together with the Group's capital resources base.
- Funding Committee
- The functions of the New Products Committee are to assess, and if appropriate to approve, the
 introduction of new products before the start of activity; to undertake subsequent control and
 monitoring for newly authorized products; and to foster business in an orderly way to enable it to
 develop in a controlled environment.

- Tools, circuits and procedures

The Group has implemented an integral risk management system designed to cater for the needs arising in relation to the various types of risk. This has prompted it to equip the management processes for each risk with measurement tools for risk acceptance, assessment and monitoring and to define the appropriate circuits and procedures, which are reflected in manuals that also include management criteria.

Specifically, the Group's risk management main activities are as follows: calculation of the risk exposures of the various portfolios, considering any related mitigating factors (netting, collateral, etc.); calculation of the probability of default ("PD"), loss severity and expected loss of each portfolio, and assignment of the PD to the new transactions (ratings and scorings); values-at-risk measurement of the portfolios based on various scenarios using historical simulations; establishment of limits to the potential losses based on the various risks incurred; determination of the possible impacts of the structural risks on the income statement; setting of limits and alerts to safeguard the Group's liquidity; identification and quantification of operational risks by business line to enable the mitigation of these risks through corrective measures; and definition of efficient circuits and procedures which contribute to the efficient achievement of the targets set.

- THE INTERNAL CONTROL MODEL

The Group's Internal Control Model is based on the best practices described in the following documents: "Enterprise Risk Management – Integrated Framework" by the COSO (Committee of Sponsoring Organizations of the Treadway Commission) and "Framework for Internal Control Systems in Banking Organizations" by the BIS.

The Internal Control Model therefore comes within the Integral Risk Management Framework. Said framework is understood as the process within an organization involving its Board of Directors, its management and all its staff, which is designed to identify potential risks facing the institution and which enables them to be managed within the limits defined, in such a way as to reasonably assure that the organization meets its business targets.

This Integral Risk Management Framework is made up of Specialized Units (Risks, Compliance, Accounting and Consolidation, Legal Services), the Internal Control Function and Internal Audit.

The Internal Control Model is underpinned by, amongst others, the following principles:

- 1. The "process" is the articulating axis of the Internal Control Model.
- 2. Risk identification, assessment and mitigation activities must be unique for each process.
- 3. The Group's units are responsible for internal control.
- 4. The systems, tools and information flows that support internal control and operational risk activities must be unique or, in any event, they must be wholly administered by a single unit.
- 5. The specialized units promote policies and draw up internal regulations, the second-level development and application of which is the responsibility of the Corporate Internal Control Unit.

One of the essential elements in the model is the Institution-Level Controls, a top-level control layer, whose aim is to reduce the overall risk inherent in its business activities.

Each unit's Internal Control Management is responsible for implementing the control model within its scope of responsibility and managing the existing risk by proposing improvements to processes.

Given that some units have a global scope of responsibility, there are transversal control functions which supplement the previously mentioned control mechanisms.

Lastly, the Internal Control and Operational Risk Committee in each unit is responsible for approving suitable mitigation plans for each existing risk or shortfall. This committee structure culminates at the Group's Global Internal Control and Operational Risk Committee.

RISK CONCENTRATION

In the trading area, limits are approved each year by the Board's Risk Committee on exposures to trading, structural interest rate, structural currency, equity and liquidity risk at the banking entities and in the asset management, pension and insurance businesses. These limits factor in many variables, including economic capital and earnings volatility criteria, and are reinforced with alert triggers and a stop-loss scheme.

In relation to credit risk, maximum exposure limits are set by customer and country; generic limits are also set for maximum exposure to specific deals and products. Upper limits are allocated based on iso-risk curves, determined as the sum of expected losses and economic capital, and its ratings-based equivalence in terms of gross nominal exposure.

There is also an additional guideline in terms of oversight of maximum risk concentration up to and at the level of 10% of equity: stringent requirements in terms of in-depth knowledge of the counterparty, its operating markets and sectors.

For retail portfolios, potential concentrations of risk are analyzed by geographical area or by certain specific risk profiles in relation to overall risk and earnings volatility; where appropriate, the opportune measures are taken, imposing cut-offs using scoring tools, via recovery management and mitigating exposure using pricing strategy, among other approaches.

7.1 CREDIT RISK

Credit risk is defined as the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge a contractual obligation due to the insolvency or incapacity of the natural or legal persons involved.

Maximum exposure to credit risk

The Group's maximum credit exposure as of June 30, 2010 and December 31, 2009 (without including valuation adjustments nor recognizing the availability of collateral or other credit enhancements to guarantee compliance) is broken down by financial instrument and counterparties in the table below:

		Millions of Euros		
Maximum Credit Risk Exposure	Notes	June	December	
<u> </u>		2010	2009	
Financial assets held for trading	10	24,863	34,672

Total off-balance	34	134,167	125,508	
Total maximum credit exposure		648,954	620,338	

For financial assets recognized in the accompanying consolidated balance sheets, credit risk exposure is equal to the carrying amount, except for trading and hedging derivatives. The maximum exposure to credit risk on financial guarantees is the maximum that BBVA would be liable for if these guarantees were called in.

For trading and hedging derivatives, this information reflects the maximum credit exposure better than the amount shown on the balance sheet because it does not only include the market value on the date of the transactions (the carrying amount only shows this figure); it also estimates the potential risk of these transactions on their due date.

Regarding the renegotiated financial assets as of June 30, 2010, the BBVA Group did not perform any renegotiations that resulted in the need to reclassify doubtful risks as outstanding risks. The amount of financial assets that would be irregular had their conditions not been renegotiated is not significant with respect to the Group's total loan portfolio as of June 30, 2010.

Mitigation of credit risk, collateral and other credit enhancements, including risk hedging and mitigation policies

In most cases, maximum exposure to credit risk is reduced by collateral, credit enhancements and other actions which mitigate the Group's exposure.

The Group applies a credit risk hedging and mitigation policy deriving from a banking approach focused on relationship banking. On this basis, the provision of guarantees is a necessary but not sufficient instrument when taking risks; therefore for the Group to assume risks, it needs to verify the payment or resource generation capacity to ensure the amortization of the risk incurred.

The above is carried out through a prudent risk management policy which consists of analyzing the financial risk in a transaction, based on the repayment or resource generation capacity of the credit recipient, the provision of guarantees in any of the generally accepted ways (cash collateral, pledged assets, personal guarantees, covenants or hedges) appropriate to the risk undertaken, and lastly on the recovery risk (the asset's liquidity).

The procedures for the management and valuation of collaterals are set out in the internal Manual on Credit Risk Management Policies, which the Group actively uses in the arrangement of transactions and in the monitoring of both these and customers.

This Manual lays down the basic principles of credit risk management, which includes the management of the collateral assigned in transactions with customers. Accordingly, the risk management model jointly values the existence of an adequate cash flow generation by the obligor that enables him to service the debt, together with the existence of suitable and sufficient guarantees that ensure the recovery of the credit when the obligor's circumstances render him unable to meet their obligations.

The procedures used for the valuation of the collateral are consistent with the market's best practices, which involve the use of appraisal for real estate guarantees, market price for shares, quoted value of shares in a mutual fund, etc.

All collaterals assigned are to be properly instrumented and recognized in the corresponding register, as well as receive the approval of the Group's Legal Units.

The following is a description of the main collateral for each financial instrument class:

- **Financial assets held for trading:** The guarantees or credit enhancements obtained directly from the issuer or counterparty are implicit in the clauses of the instrument. In trading derivatives, credit risk is minimized through contractual netting agreements, where positive- and negative-value derivatives with the same counterparty are offset for their net balance. There may likewise be other kinds of guarantees, depending on counterparty solvency and the nature of the transaction.
- Other financial assets designated at fair value through profit or loss: The guarantees or credit
 enhancements obtained directly from the issuer or counterparty are inherent in the structure of the
 instrument.
- Available for sale financial assets: The guarantees or credit enhancements obtained directly from the issuer or counterparty are inherent in the structure of the instrument.

Loans and receivables:

- Loans and advances to credit institutions: These have the counterparty's personal guarantee.
- Total lending to customers: Most of these operations are backed by personal guarantees extended by the counterparty. The collateral received to secure loans and advances to other

debtors includes mortgages, cash guarantees and other collateral such as pledged securities. Other kinds of credit enhancements may be put in place such as guarantees.

- Debt securities: The guarantees or credit enhancements obtained directly from the issuer or counterparty are inherent in the structure of the instrument.
- **Held-to-maturity investments:** The guarantees or credit enhancements obtained directly from the issuer or counterparty are inherent in the structure of the instrument.
- Hedging derivatives: Credit risk is minimized through contractual netting agreements, where positiveand negative-value derivatives with the same counterparty are settled at their net balance. There may likewise be other kinds of guarantees, depending on counterparty solvency and the nature of the transaction.
- Financial guarantees, other contingent exposures and drawable by third parties: They have the counterparty's personal guarantee and, in some cases, the additional guarantee from another credit institution with which a credit derivative has been subscribed.

The Group's collateralized credit risk as of June 30, 2010 and December 31, 2009, excluding balances deemed impaired, is broken down in the table below:

	Millions of Euros			
Collateralized Credit Risk	June 2010	December 2009		
Mortgage loans	132,732	127,957		
Operating assets mortgage loans	3,976	4,050		
Home mortgages	106,106	99,493		
Rest of mortgages	22,650	24,414		
Secured loans, except mortgage	22,675	20,917		
Cash guarantees	265	23′		
Secured loan (pledged securities)	528	692		
Rest of secured loans	21,882	19,994		
Total	155,407	148,874		

In addition, the derivatives carry contractual, legal compensation rights that have effectively reduced credit risk by €35,163 million as of June 30, 2010 and by €27,026 million as of December 31, 2009.

As of June 30, 2010, specifically in relation to mortgages, the average amount pending loan collection represented 54% of the collateral pledged (54% as of December 31, 2009).

Credit quality of financial assets that are neither past due nor impaired

BBVA has ratings tools that enable it to rank the credit quality of its operations and customers based on a scoring system and to map these ratings to probability of default ("PD") scales. To analyze the performance of PD, the Bank has a series of historical databases that house the pertinent information generated internally.

The scoring tools vary by customer segment (companies, corporate clients, SMEs, public authorities, etc.). Scoring is a decision model that contributes to both the arrangement and management of retail type loans: consumer loans, mortgages, credit cards for individuals, etc. Scoring is the tool used to decide to whom a loan should be assigned, what amount should be assigned and what strategies can help establish the price, because it is an algorithm that sorts transactions in accordance with their credit rating. Rating tools, as opposed to scoring tools, do not assess transactions but focus on customers instead: companies, corporate clients, SMEs, public authorities, etc. For wholesale portfolios where the number of defaults is very low (sovereigns, corporates, financial entities) the internal ratings models are fleshed out by benchmarking the statistics maintained by external rating agencies (Moody's, Standard & Poor's and Fitch). To this end, each year the Bank compares the PDs compiled by the agencies at each level of risk rating and maps the measurements compiled by the various agencies to the BBVA master rating scale.

Once the probability of default for the transactions or customers has been determined, the so-called business cycle adjustment starts. This involves generating a risk metric outside the context estimate, seeking

to gather information that represents behavior for an entire economic cycle. This probability is linked to the Group's master rating scale.

BBVA maintains a master rating scale with a view to facilitating the uniform classification of the Group's various asset risk portfolios. The table below depicts the abridged scale which groups outstanding risk into 17 categories as of June 30, 2010:

Internal Rating	Probability of default (basic points)				
Reduced List (17 groups)	Average	Minimum from >=	Maximum		
AAA	1	-	2		
AA+	2	2	3		
AA	3	3	2 3 2 5 6		
AA-	4	4	Ę		
A+	5	5	(
A	8	6	(
A-	10	9	11		
BBB+	14	11	17		
BBB	20	17	24		
BBB-	31	24	39		
BB+	51	39	67		
BB	88	67	116		
BB-	150	116	194		
B+	255	194	335		
В	441	335	581		
B-	785	581	1,061		
С	2,122	1,061	4,243		

The table below outlines the distribution of exposure including derivatives by internal ratings, to financial entities and public institutions (excluding sovereign risk), of the Group's main institutions as of June 30, 2010 and December 31, 2009:

Credit Risk Distribution by Internal Rating	June 2010	December 2009
AAA/AA+/AA/AA-	22.74%	19.55%
A+/A/A-	29.20%	28.78%
BBB+	7.70%	8.65%
BBB	6.34%	7.06%
BBB-	6.72%	6.91%
BB+	4.91%	4.46%
BB	7.13%	6.05%
BB-	5.65%	6.45%
B+	5.19%	5.38%
В	3.25%	3.34%
B-	0.95%	0.88%
CCC/CC	0.22%	2.49%
Total	100.00%	100.00%

Policies and procedures for preventing excessive risk concentration

In order to prevent the build-up of excessive concentrations of credit risk at the individual, country and sector levels, the Group oversees updated risk concentration indices at the individual and portfolio levels tied to the various observable variables within the field of credit risk management. The limit on the Group's exposure or share of a customer's financial business therefore depends on the customer's credit rating, the nature of the facility, and the Group's presence in a given market, based on the following guidelines:

- The need to balance the customer's financing needs, broken down by type (commercial/financial, short/long-term, etc.). This approach provides a better operational mix that is still compatible with the needs of the bank's clientele.
- Other determining factors are national legislation and the ratio between the size of customer lending and the Bank's equity (to prevent risk from becoming overly concentrated among few customers). Additional factors taken into consideration include constraints related to market, customer, internal regulation and macroeconomic factors, etc.
- Meanwhile, correct portfolio management leads to identification of risk concentrations and enables appropriate action to be taken.

Operations with customers or groups that entail an expected loss plus economic capital of over €18 million are approved at the highest level, i.e., by the Board Risk Committee. As a reference, this is equivalent in terms of exposure to 10% of eligible equity for AAA and to 1% for a BB rating, implying oversight of the major individual risk concentrations by the highest-level risk governance bodies as a function of credit ratings.

There is additional guideline in terms of a maximum risk concentration level of up to and including 10% of equity: up to this level there are stringent requirements in terms of in-depth knowledge of the client, its operating markets and sectors of operation.

Financial assets past due but not impaired

The table below provides details of financial assets past due as of June 30, 2010 and December 31, 2009, but not considered to be impaired, listed by their first due date:

	Millions of	Euros
Financial Assets Past Due but Not Impaired	June 2010	December 2009
Less than 1 month	1,494	2,653
1 to 2 months	465	336
2 to 3 months	356	311
Total	2,315	3,300

Impaired assets and impairment losses

The table below shows the composition of the balance of impaired financial assets classified by heading in the balance sheet and the impaired contingent liabilities as of June 30, 2010 and December 31, 2009:

	Millions of Euros		
Impaired Risks.	June	December	
Breakdown by Type of Asset and by Sector	2010	2009	
Impaired Risks on Balance			
Available-for-sale	157	212	
Debt securities	157	21:	
Loans and receivables	15,889	15,31 ⁻	
Loans and advances to credit institutions	91	100	
Loans and advances to customers	15,782	15,19	
Debt securities	16	1.	
Total Impaired Risks on Balance (1)	16,046	15,52	
Goverment	81	87	
Credit institutions	118	172	
Other sectors	15,847	15,264	
Mortgage	4,861	4,420	
Rest of secured loans	1,940	1,66	
Without secured loans	9,046	9,17	
Total Impaired Risks on Balance (1)	16,046	15,523	
Impaired Risks Off Balance (2)	-		
Impaired contingent liabilities	355	40	
TOTAL IMPAIRED RISKS (1)+(2)	16,401	15,928	

The estimated value of assets used as security for impaired assets with secured loans as of June 30, 2010 and December 31, 2009 was higher than the outstanding amount of those assets.

The changes for the six months ended June 30, 2010 and 2009 in the impaired financial assets and contingent liabilities were as follows:

_	Millions of E	uros
Changes in Impaired Financial Assets and Contingent Liabilities	June 2010	June 2009
Balance at the beginning	15,928	8,859
Additions (1)	6,242	7,617
Recoveries (2)	(4,468)	(2,878
Net additions (1)+(2)	1,774	4,739
Transfers to write-off	(1,919)	(1,505
Exchange differences and others	618	85
Balance at the end	16,401	12,178
Recoveries on entries (%)	72	38

Below are details of the impaired financial assets as of June 30, 2010 and December 31, 2009, classified by geographical location of risk and by the time since their oldest past-due amount or the period since they were deemed impaired:

		Millions of Euros					
June 2010	Less than 6 Months Past-Due	6 to 12 Months Past-Due	12 to 18 Months Past-Due	18 to 24 Months Past-Due	More than 24 Months Past-Due	Total	
Spain	3,577	1,684	1,638	1,804	2,780	11,483	
Rest of Europe	96	17	17	8	34	172	
Latin America	1,388	102	87	96	576	2,249	
The United States	1,879	-	-	-	259	2,138	
Rest of the world	-	-	-	-	4	4	
Total	6,940	1,803	1,742	1,908	3,653	16,046	

			Millions	of Euros		
December 2009	Less than 6 Months Past-Due	6 to 12 Months Past-Due	12 to 18 Months Past-Due	18 to 24 Months Past-Due	More than 24 Months Past-Due	Total
Spain	4,644	1,827	2,177	948	1,879	11,475
Rest of Europe	88	16	8	7	29	148
Latin America	1,309	133	79	16	490	2,027
The United States	1,671	-	-	-	187	1,858
Rest of the world	14	-	-	-	1	15
Total	7,726	1,976	2,264	971	2,586	15,523

The table below depicts the finance income accrued on impaired financial assets as of June 30, 2010 and December 31, 2009:

	Millio	ons of Euros	
	June	Decembe	er
	2010	2009	
Financial Income from Impaired Assets	1	1,676 1,	485

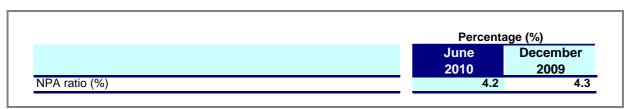

This income is not recognized in the accompanying consolidated income statements due to the existence of doubts as to the collection of these assets.

Note 2.2.1.b gives a description of the individual analysis of impaired financial assets, including the factors the entity takes into account in determining that they are impaired and the extension of guarantees and other credit enhancements.

The following shows the changes in impaired financial assets written off from the balance sheet for the six months ended June 30, 2010 and in the year ended December 31, 2009 because the possibility of their recovery was deemed remote:

_	Millions of Euros		
Changes in Impaired Financial Assets Written-Off from the	June	June	
Balance Sheet	2010	2009	
Balance at the beginning	9,833	6,872	
Increase:	2,152	1,454	
Decrease:	(609)	(349)	
Re-financing or restructuring	-	-	
Cash recovery	(111)	(80)	
Foreclosed assets	(9)	(9)	
Sales of wrrtten-off	(204)	-	
Other causes	(285)	(260)	
Net exchange differences	675	32	
Balance at the end	12,051	8,009	

The Group's Non-Performing Assets ("NPA") ratios for the headings "Loans and advances to customers" and "Contingent liabilities" as of June 30, 2010 and December 31, 2009 were:

A breakdown of impairment losses by type of financial instrument registered in income statement and the recoveries of impaired financial assets are provided Note 49.

The accumulated balance of impairment losses broken down by portfolio as of June 30, 2010 and December 31, 2009 is as follows:

	Millions of Euros				
Impairment Losses	Notes	June 2010	December 2009		
Available-for-sale portfolio	12	484	449		
Loans and receivables	13	9,710	8,805		
Loans and advances to customers	13.3	9,625	8,720		
Loans and advances to credit institutions	13.2	62	68		
Debt securities		23	17		
Held to maturity investment	14	1	1		
Total		10,195	9,255		
Of which:		-			
For impaired portfolio		7,169	6,380		
For current portfolio non impaired		3,026	2,875		

In addition to total amount of funds indicated above, as of June 30, 2010 and December 31, 2009, the amount of the provisions for contingent exposures and commitments rose to €313 and €243 million euros, respectively (see Note 25).

The changes for the six months ended June 30, 2010 and 2009 in the accumulated impairment losses were as follows:

	Millions of Eur	os
Changes in the Impairment Losses	June 2010	June 2009
Balance at the beginning	9,255	7,711
Increase in impairment losses charged to income	3,618	3,403
Decrease in impairment losses credited to income	(1,088)	(1,378)
Transfers to written-off loans, exchange differences and other	(1,590)	(1,608)
Balance at the end	10,195	8,128

The majority of the impairment on financial assets corresponds to the heading "Loans and receivables - Loans and advances to customers". The changes for the six months ended June 30, 2010 and 2009 in impairment losses were as follows:

	Millions of E	uros
Changes in the Impairment Losses of the heading Loans and Receivables - Loans and advances to customers	June 2010	June 2009
Balance at the beginning	8,720	7,412
Increase in impairment losses charged to income	3,546	3,314
Decrease in impairment losses credited to income	(1,063)	(1,365)
Transfers to written-off loans, exchange differences and other	(1,578)	(1,679)
Balance at the end	9,625	7,682

As of June 30, 2010 and December 31, 2009, the amount of accumulated impairment losses associated with the impaired assets corresponding to "Loans and receivables - Loans and advances to customers" rose to €6,621 and €5,864 million, respectively. Likewise, as those dates, the amount of accumulated impairment losses corresponding to the not individually impaired assets of said heading rose to €3,004 and €2,856 million, respectively.

7.2 MARKET RISK

a) Market Risk

Market risk is defined as the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices, resulting in changes in the different assets and financial risk factors. The risk can be mitigated or even eliminated through hedges using other products (assets/liabilities or derivatives), or by undoing the transaction/open position.

There are three main risk factories that affect market prices: interest rates, foreign exchange rates and equity.

- Interest rate risk: defined as changes in the term structure of market interest rates for different currencies.
- Foreign-exchange risk: this is the risk resulting from changes in the foreign exchange rate for different currencies.
- Price risk: this is the risk resulting from variations in market prices, either due to factors specific to the instrument itself, or alternatively to factors which affect all the instruments traded on the market.

In addition, for certain positions, other risks also need to be considered: credit spread risk, basis risk, volatility or correlation risk.

Value at Risk (*VaR*) is the basic variable for measuring and controlling the Group's market risk. This risk metric estimates the maximum loss that may occur in a portfolio's market positions for a particular time horizon and given confidence level. VaR is calculated in the Group at a 99% confidence level and a 1-day time horizon.

The BBVA and BBVA Bancomer have received approval from the Bank of Spain to use the internal model to calculate bank capital for market risk.

In BBVA and BBVA Bancomer VaR is estimated using Historic Simulation methodology. This methodology consists of observing how the profits and losses of the current portfolio would perform if the market conditions from a particular historic period were in force, and from that information to infer the maximum loss at a certain confidence level. It offers the advantage of accurately reflecting the historical distribution of the market variables and of not requiring any specific distribution assumption. The historic period used is one of two years.

With regard to market risk, limit structure determines a system of VaR and economic capital at risk limits for each business unit, with specific sub-limits by type of risk, activity and desk.

Validity tests are performed on the risk measurement models used to estimate the maximum loss that could be incurred in the positions assessed with a certain level of probability (backtesting), as well as measurements of the impact of extreme market events on risk positions (stress testing). The Group is currently performing stress testing on historical and economic crisis scenarios drawn up by its Economic Research Department.

Changes in market risk for the six months ended June 30, 2010

The BBVA Group's market risk increased in 2010 compared to previous years. The average risk for the six months ended June 30, 2010 stood at €32.4 million (VaR calculation without smoothing). This growing risk of the Group can be explained primarily by the increase of the risk of Global Markets Europe and, to a lesser extent, by Global Markets Bancomer upon raising equity risk for greater exposure. The increase in Global Markets Europe is due to a great extent to the upturn in the volatility of market variables as a consequence of the situation in the second quarter in the debt markets in the southern Euro area countries. This situation has led to an increase in risk measurements, especially in the credit spread and interest rate risk.

During the period between June 30, 2009 and June 30, 2010, the changes in market risk (VaR calculations without smoothing with a 99% confidence level and a 1-day horizon) were as follows:

The breakdown of VaR by risk factor as of June 30, 2010 and December 31, 2009 was as follows:

	Millions o	f Euros
VaR by Risk Factor	June 2010	December 2009
Interest/Spread risk	44	38
Currency risk	9	2
Stock-market risk	6	9
Vega/Correlation risk	14	15
Diversification effect	(35)	(33)
Total	39	31
VaR medium in the period	32	26
VaR max in the period	41	33
VaR min in the period	26	18

b) Structural interest rate risk

The aim of on-balance-sheet interest rate risk management is to maintain the BBVA Group's exposure to market interest rate fluctuations at levels in keeping with its risk strategy and profile. In pursuance of this, the Asset-Liability Committee ("ALCO") undertakes active balance sheet management through operations intended to optimize the levels of risk borne according to the expected earnings and enables the maximum levels of accepted risk with which to be complied.

ALCO uses the interest rate risk measurements performed by the Risk Area. Acting as an independent unit, the Risk Area periodically quantifies the impact of interest rate fluctuations on the BBVA Group's net interest income and economic value.

In addition to measuring the sensitivity to 100-basis-point changes in market interest rates, the Group performs probability calculations that determine the economic capital and risk margin for structural interest rate risk in the BBVA's Group banking activity (excluding the Treasury area), based on interest rate curve simulation models. The Group regularly performs stress tests and sensitivity analysis to complement its assessment of its interest rate risk profile.

All these risk measurements are subsequently analyzed and monitored, and levels of risk assumed and the degree of compliance with the limits authorized by the Executive Committee are reported to the various managing bodies of the BBVA Group.

Below are the average interest rate risk exposure levels in terms of sensitivity of the main financial institutions of the BBVA Group for the six months ended June 30, 2010, in millions of euros:

	Average Impact o		Average Impact on Economic Value (**)		
June 2010	100 Basis-Point 1 Increase	00 Basis-Point Decrease	100 Basis-Point 1 Increase	00 Basis-Point Decrease	
Europe	-7.63%	+8.64%	+0.34%	-0.46%	
BBVA Bancomer	+0.95%	-0.76%	-2.64%	+2.29%	
BBVA Compass	+4.05%	-4.22%	+3.81%	-7.60%	
BBVA Puerto Rico	+3.47%	-2.88%	-2.26%	+1.94%	
BBVA Chile	-1.58%	+1.52%	-8.42%	+7.86%	
BBVA Colombia	+2.30%	-2.32%	+0.26%	-0.47%	
BBVA Banco Continental	+2.72%	-2.77%	-5.45%	+5.97%	
BBVA Banco Provincial	+0.35%	-0.36%	-1.49%	+1.59%	
BBVA Banco Francés	+0.56%	-0.57%	-0.69%	+0.68%	
BBVA Group	-1.86%	+2.28%	-0.20%	-0.44%	

As part of the measurement process, the Group established the assumptions regarding the movement and behavior of certain items, such as those relating to products with no explicit or contractual maturity. These assumptions are based on studies that estimate the relationship between the interest rates on these products and market rates and enable specific balances to be classified into trend-based balances maturing at long term and seasonal or volatile balances with short-term residual maturity.

c) Structural currency risk

Structural foreign exchange risk is basically caused by exposure to variations in foreign exchange rates that arise in the Group's foreign subsidiaries and the provision of funds to foreign branches financed in a different currency to that of the investment.

The ALCO is responsible for arranging hedging transactions to limit the capital impact of fluctuations in exchange rates, based on their projected trend, and to guarantee the equivalent euro value of the foreign currency earnings expected to be obtained from these investments.

Structural currency risk management is based on the measurements performed by the Risk Area. These measurements use a foreign exchange rate scenario simulation model which quantifies possible changes in value for a given confidence interval and a pre-established time horizon. The Executive Committee authorizes the system of limits and alerts for these risk measurements, which include a limit on the economic capital or unexpected loss arising from the foreign exchange risk of the foreign-currency investments.

As of June 30, 2010, the aggregate figure of asset exposure sensitivity to 1% depreciation in exchange rates stood at €121 million, with the following concentration: 40% in the Mexican peso, 27% in other South American currencies and 22% in the US dollar.

d) Structural equity risk

The Group's exposure to structural equity risk comes largely from its holdings in industrial and financial companies with medium- to long-term investment horizons, reduced by the short net positions held in derivative instruments on the same underlying assets, in order to limit portfolio sensitivity to potential price cuts. The aggregate sensitivity of the Group's consolidated equity to a 1% fall in the price of shares stood, on June 30, 2010, at €46.1 million, while the sensitivity of the consolidated earnings to the same change in price on the same date is estimated at €3.6 million. This figure is determined by considering the exposure on shares measured at market price or, if not available, at fair value, including the net positions in options on the same underlyings in delta equivalent terms. Treasury Area portfolio positions are not included in the calculation.

The Risk Area measures and effectively monitors structural risk in the equity portfolio. To do so, it estimates the sensitivity figures and the capital necessary to cover possible unexpected losses due to the variations in the value of the equity portfolio at a confidence level that corresponds to the institution's target rating, and taking account of the liquidity of the positions and the statistical performance of the assets under

consideration. These figures are supplemented by periodic stress comparisons, back-testing and scenario analyses.

7.3 LIQUIDITY RISK

The aim of liquidity risk management and control is to ensure that the payment commitments can be duly met without having to resort to borrowing funds under burdensome terms, or damaging the image and reputation of the institution.

The Group's liquidity risk monitoring is centralized in each bank and takes a dual approach: the short-term approach (90-day time horizon), which focuses basically on the management of payments and collections of Treasury and Markets, calculates the Bank's possible liquidity requirements; and the structural, long-term approach, which focuses on the financial management of the balance sheet as a whole, with a minimum monitoring time frame of one year.

The evaluation of asset liquidity risk is based on whether or not assets are eligible for rediscounting at the corresponding central bank. For normal situations, both in the short and medium term, those assets that are on the eligible list published by the European Central Bank ("ECB") or the corresponding monetary authority are considered to be liquid. Non-eligible assets, quoted or non-quoted, are considered to represent a second line of liquidity for the entity when analyzing crisis situations.

Liquidity management is performed entirely by the Bank's Assets and Liabilities Committee ("ALCO"), through Financial Management. For its implementation, it uses a broad scheme of limits, sublimits and alerts, approved by the Executive Committee, based on which the Risk Area carries out its independent measurement and control work. It also provides the manager with back-up decision-making tools and metrics. Each of the local risk areas, which are independent from the local manager, complies with the corporative principles of liquidity risk control that are established by the Global Risk Management Unit, the Structural Risks unit for the entire Group.

For each entity, the management areas request an outline of the quantitative and qualitative limits and alerts for short and medium-term liquidity risk. This request must be authorized by the Executive Committee. A core principle in the BBVA Group's liquidity management has long been to encourage the financial independence of its subsidiaries. This aims to ensure that the cost of liquidity is correctly reflected in price formation and that there is sustainable growth in the lending business.

Also, the Risk Area performs periodic (daily and monthly) risk exposure measurements, develops the related valuation tools and models, conducts periodic stress tests, measures interbank counterparty concentration, prepares the policies and procedures manual, and monitors the authorized limits and alerts, which are reviewed at least once every year.

Information on liquidity risk is sent at least monthly to the Group's ALCO and to the managing areas themselves. Under the Contingency Plan, the Technical Liquidity Group ("TLG"), in the event of an alert of a possible crisis, conducts an initial analysis of the Bank's short- and long-term liquidity situation. The TLG is made up of specialized staff from the Short-Term Cash Desk, Financial Management and the Structural Risk unit. If the alert is serious, the TLG reports the matter to the Liquidity Committee, which is composed of the managers of the related areas. The Liquidity Committee is responsible, in situations requiring urgent attention, for calling a meeting of the Funding Committee.

During the six months ended June 30, 2010, the decisive role that central banks and governments assumed favored the liquidity conditions on interbank markets. The Group has not had to resort to using the measures established in Spain to mitigate bank funding issues.

For the six months ended June 30, 2010, within its framework of projects, the Basel Committee on Banking Supervision carried out a quantitative impact study (QIS) on its proposals, in order to reinforce the regulation standards for the international financial system in terms of capital and liquidity. The preliminary results will be presented throughout the second half of 2010.

7.4. RISK CONCENTRATIONS

Below is presented a breakdown by geographical area, of the balances of certain headings of financial instruments in the accompanying consolidated balance sheets, disregarding any valuation adjustments:

			Millions of	Euros		
June 2010	Spain	Europe, Excluding Spain	USA	Latin America	Rest	Total
RISKS ON-BALANCE						
Financial assets held for trading	17,513	29,225	4,841	18,858	2,893	73,33
Debt securities	7,864	2,954	1,130	12,664	251	24,86
Equity instruments	3,224	622	74	1,389	228	5,53
Derivatives	6,425	25,649	3,637	4,805	2,414	42,93
Other financial assets designated at fair value through profit or loss	300	85	516	1,894	1	2,79
Debt securities	144	57	515	12	-	72
Equity instruments	156	28	1	1,882	1	2,06

8. FAIR VALUE OF FINANCIAL INSTRUMENTS

The fair value of a financial asset or a liability on a given date is the amount for which it could be exchanged or settled, respectively, between two knowledgeable, willing parties in an arm's length transaction. The most objective and common reference for the fair value of a financial asset or a liability is the price that would be paid for it on an organized, transparent and deep market ("quoted price" or "market price").

If there is no market price for a given financial asset or liability, its fair value is estimated on the basis of the price established in recent transactions involving similar instruments and, in the absence thereof, by using mathematical measurement models sufficiently tried and trusted by the international financial community. The estimates used in such models take into consideration the specific features of the asset or liability to be measured and, in particular, the various types of risk associated with the asset or liability. However, the limitations inherent in the measurement models developed and the possible inaccuracies of the assumptions required by these models may mean that the fair value of an asset or liability that is estimated does not coincide exactly with the price for which the asset or liability could be exchanged or settled on the date of its measurement.

Determining the fair value of financial instruments

Below is a comparison of the carrying amount of the Group's financial assets and liabilities in the accompanying consolidated balance sheets and their respective fair values:

			Millions	of Euros	
		June	2010	Decemb	er 2009
Fair Value and Carrying Amount	Notes	Carrying Amount	Fair Value	Carrying Amount	Fair Value
ASSETS-					
Cash and balances with central banks	9	22,298	22,298	16,344	16,344
Financial assets held for trading	10	73,330	73,330	69,733	69,733
Other financial assets designated at fair value through profit or loss		2,796	2,796	2,337	2,337
Available-for-sale financial assets	12	60,729	60,729	63,521	63,521
Loans and receivables	13	361,766	370,827	346,117	354,933
Held-to-maturity investments	14	9,768	9,494	5,437	5,493
Hedging derivatives	15	4,586	4,586	3,595	3,595
LIABILITIES-					
Financial assets held for trading	10	43,734	43,734	32,830	32,830
Other financial liabilities designated at fair value	_				
through profit or loss	11	1,651	1,651	1,367	1,367
Financial liabilities at amortized cost	23	466,329	462,624	447,936	448,537
Hedging derivatives	15	2,191	2,191	1,308	1,308

For financial instruments whose carrying amount is different from its fair value, fair value was calculated in the following manner:

- The fair value of "Cash and balances with central banks", which are short term by their very nature, is equivalent to their carrying amount.
- The fair value of "Held-to-maturity investments" is equivalent to their quoted price in active markets.
- The fair values of "Loans and receivables" and "Financial liabilities at amortized cost" were estimated by discounting estimated cash flows using the market interest rates prevailing at each year-end.

For financial instruments whose carrying amount corresponds to their fair value, the measurement processes used are set forth below:

- Level 1: Measurement using market observable quoted prices for the financial instrument in question, secured from independent sources and linked to active markets. This level includes listed debt securities, listed equity instruments, some derivatives and mutual funds.
- Level 2: Measurement using valuation techniques the inputs for which are drawn from market observable data.
- Level 3: Measurement using valuation techniques, where some of the inputs are not taken from market observable data. Model selection and validation is undertaken at the independent business units. As of June 30, 2010, Level 3 financial instruments accounted for 0.26% of financial assets and 0.02% of financial liabilities.

The following table show the main financial instruments carried at fair value in the accompanying consolidated balance sheets, broken down by the valuation technique level used to determine fair value:

		Millions of Euros June 2010 December 2009					
			Julie 2010		, D	eceniber 200	,

⁽¹⁾ Credit spread: The spread between the interest rate of a risk-free asset (e.g. Treasury securities) and the interest rate of any other security that is identical in every respect except for quality rating. Spreads are considered as Level 3 inputs when referring to illiquid issues. Based on spreads of similar entities.

⁽²⁾ Correlation decay: The constant rate of decay that allows us to calculate how the correlation evolves between the different pairs of forward rates.

⁽³⁾ Vol-of-Vol: Volatility of implicit volatility. This is a statistical measure of the changes of the spot volatility.

⁽⁴⁾ Reversion Factor: The speed with which volatility reverts to its natural value.

⁽⁵⁾ Volatility- Spot Correlation: a statistical measure of the linear relationship (correlation) between the spot price of a security and its volatility.

The changes in the six months ended June 30, 2010 in the balance of Level 3 financial assets and liabilities were as follows:

	Millions of Euros June 2010		
Financial Assets Level 3 Changes in the Period	Assets	Liabilities	
Balance at beginning	1,707	96	
Valuation adjustments recognized in the income statement	(69)	2	
Valuation adjustments not recognized in the income statement	(2)		
Acquisitions, disposals and liquidations	(220)		
Transfers to/from Level 3	24		
Exchange differences	3		
Balance at the end	1,442	98	

As of June 30, 2010, the potential effect on the valuation of Level 3 financial instruments of a change in the main assumptions if other reasonable models, more or less favorable, were used, taking the highest or lowest value of the range deemed probable, would have the following effect:

		Millons of Euros June 2010			
	Potential Consolidat	•	Potential Imp Equ

Loans and financial liabilities at fair value through profit or loss

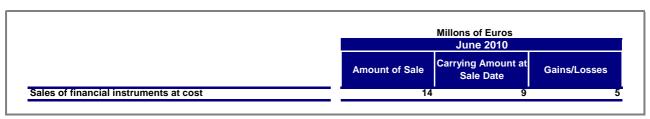

As of June 30, 2010 and December 31, 2009, there were no loans or financial liabilities at fair value other than those recognized in the headings "Other financial assets designated at fair value through profit and loss" and "Other financial liabilities designated at fair value through profit and loss" in the accompanying consolidated balance sheets.

Financial instruments at cost

The Group had equity instruments, derivatives with equity instruments as underlyings and certain discretionary profit sharing arrangements that were recognized at cost in Group's consolidated balance sheet, as their fair value could not be reliably determined. As of June 30, 2010 and December 31, 2009, the balance of these financial instruments amounted to €609 million and €589 million, respectively. These instruments are recorded for both dates in the available-for-sale financial assets portfolio.

The fair value of these instruments could not be reliably estimated because it corresponds to shares in companies not quoted on organized exchanges, and any valuation technique that could be used would contain significant unobservable inputs.

The breakdown of the sales of financial instruments at cost for the six months ended 30, 2010 is as follows:

9. CASH AND BALANCES WITH CENTRAL BANKS

The breakdown of the balance of the headings "Cash and balances with central banks" and "Deposits from central banks" in the accompanying consolidated balance sheets was as follows:

	Millions of Euros		
Cash and Balances with Central Banks	June 2010	December 2009	
Cash	3,355	4,218	
Balances at the Central Banks	18,933	12,113	
Accrued interests	10	13

Other sectors	2,160	2,359	
Subtotal	2,312	2,515	
Total	5,537	5,783	

10.4. TRADING DERIVATIVES

The trading derivatives portfolio arises from the Group's need to manage the risks incurred by it in the course of its normal business activity, mostly for the positions held with customers. As of June 30, 2010 and December 31, 2009, trading derivatives were principally contracted in non-organized markets, with non-resident credit entities as the main counterparties, and related to foreign exchange and interest rate risk and shares.

Below is a breakdown by transaction type and market, of the fair value of outstanding financial trading derivatives recognized in the accompanying consolidated balance sheets and held by the main companies in the Group, divided into organized and non-organized (over-the-counter "OTC") markets:

Financial futures		- The rest Rate Risk - The R	Equity Price Risk	Precious Metals Risk	Commodities Risk	Credit Risk	Other Risks (1) (1) (1) (1) 1	(38) (37) (37) (3,18) (3,18) (3,19) (1,48)

12.4. GAINS/LOSSES

The changes in the gains/losses, net of taxes, recognized under the equity heading "Valuation adjustments – Available-for-sale financial assets" of the accompanying consolidated balance sheets was as follows:

	Millions of Euros			
Changes in Valuation Adjustments - Available-for- Sale Financial Assets	June 2010	December 2009		
Balance at beginning	1,951	931		
Valuation gains and losses	(2,108)	1,520		
Income tax	518	(483		
Amounts transferred to income	101	(17		
Balance at the end	462	1,951		
Of which:				
Debt securities	(412)	456		
Equity instruments	874	1,495		

The losses recognized in the heading "Valuation adjustments – Available for sale financial assets" as of June 30, 2010, correspond to Spanish government debt securities.

After analyzing these losses, it was concluded that they are temporary, since the deadlines for interest payments have been met for all debt securities, there is no evidence that the issuer will not continue meeting the payment terms and the future payments of principal and interest are sufficient to recover the cost of the debt securities.

The losses recognized under the heading "Impairment losses on financial assets (net) - Other financial instruments not valued at fair value through profit or loss" in the consolidated income statement for the six months ended June 30, 2010 and 2009, amounted to €69 million and €76 respectively (see Note 49).

13. LOANS AND RECEIVABLES

13.1. BREAKDOWN OF THE BALANCE

The detail of the balance of this heading in the accompanying consolidated balance sheets, based on the nature of the financial instrument, was as follows:

	Millions of Euros			
Loans and Receivables	June	December		
Loans and Receivables	2010	2009		
Loans and advances to credit institutions	21,846	22,239		
Loans and advances to customers	339,259	323,442		
Debt securities	661	436		
Total	361,766	346,117		

13.2. LOANS AND ADVANCES TO CREDIT INSTITUTIONS

The detail of the balance of this heading in the accompanying consolidated balance sheets, based on the nature of the financial instrument, was as follows:

	Millions of Euros			
Loans and Advances to Credit Institutions	June 2010	December 2009		
Reciprocal accounts	172	226		
Deposits with agreed maturity	7,848	8,301		
Demand deposits	2,253	2,091		
Other accounts	6,971	6,125		
Reverse repurchase agreements	4,594	5,457		
Total gross	21,838	22,200		
Valuation adjustments	8	39		
Impairment losses	(62)	(68		
Accrued interest and fees	70	110		
Hedging derivatives and others	-	(3		
Total	21,846	22,239		

13.3. LOANS AND ADVANCES TO CUSTOMERS

The detail of the balance of this heading in the accompanying consolidated balance sheets, based on the nature of the financial instrument, was as follows:

	Millions of Euros			
Loans and Advances to Customers	June 2010	December 2009		
Financial paper	659	602		
Commercial credit	26,312	24,031		
Secured loans	155,407	148,874		
Credit accounts	22,547	19,683		
Other loans	100,468	98,238		
Reverse repurchase agreements	685	987		
Receivable on demand and other	17,848	15,253		
Finance leases	7,965	8,222		
Impaired assets	15,782	15,197		
Total gross	347,673	331,087		
Valuation adjustments	(8,414)	(7,645)		
Impairment losses	(9,625)	(8,720)		
Accrued interests and fees	230	320		
Hedging derivatives and others	981	755		
Total net	339,259	323,442		

The heading "Loans and receivables - Loans and advances to customers" heading of the accompanying consolidated balance sheets includes securitized loans that have not been derecognized as mentioned in Note 2.2.2. The amounts recognized in the accompanying consolidated balance sheets corresponding to these securitized loans are set forth below:

Securitized Loans	June 2010	December 2009
Securitized mortgage assets	31,034	34,987
Other securitized assets	12,711	10,597
Total	43,745	45,584
Of which:	-	-
Liabilities associated to assets retained on the balance sheet (*)	8,164	9,012
(*)These liabilities are recognized under "Financial liabilities at amortized cost - Debt securiti	es" in the accompanying	

Some other securitized loans have been derecognized where substantially all attendant risks or benefits were effectively transferred. As of June 30, 2010 and December 31, 2009, the outstanding balances of derecognized securitized loans were as follows:

	Millions of E	uros
Derecognized Securitized Loans	June 2010	December 2009
Securitized mortgage assets	105	116
Other securitized assets	242	276
Total	347	392

14. HELD-TO-MATURITY INVESTMENTS

The breakdown of the balance of this heading in the accompanying consolidated balance sheets was as follows:

	Millions of Euros				
June 2010	Amortized Cost	Unrealized Gains	Unrealized Losses	Fair Value	
Domestic Debt Securities			,		
Spanish Government and other government agency debt					
securities	5,999	4	(303)	5,700	
Other domestic debt securities	887	1	(36)	852	
Subtotal	6,886	5	(339)	6,552	
Foreign Debt Securities					
Government and other government agency debt securities	2,542	70	(9)	2,603	
Other debt securities	340	8	(9)	339	
Subtotal	2,882	78	(18)	2,942	
Total	9,768	83	(357)	9,494	

	Millions of Euros			
December 2009	Amortized Cost	Unrealized Gains	Unrealized Losses	Fair Value
Domestic Debt Securities				
Spanish Government and other government agency debt securities	1,674	21	(13)	1,682
Other domestic debt securities	952	8	(18)	942
Subtotal	2,626	29	(31)	2,624
Foreign Debt Securities				
Government and other government agency debt securities	2,399	64	(7)	2,456
Other debt securities	412	7	(6)	413
Subtotal	2,811	71	(13)	2,869
Total	5,437	100	(44)	5,493

The foreign securities held by the Group as of June 30, 2010 and December 31, 2009 in the held-to-maturity portfolio correspond to European issuers.

After analyzing the unrealized losses, it was concluded that they are temporary, since the payment deadlines on the interests have been met for all debt securities, there is no evidence that the issuer will not continue meeting the payment terms and the future payments of principal and interest are sufficient to recover the cost of the securities.

The changes over the six months ended June 30, 2010 and 2009 under this heading in the accompanying consolidated balance sheets are as follows:

	Millions of Euros		
Held-to-Maturity Investments Changes on the Period	June 2010	June 2009	
Balance at beginning	5,438	5,285	
Acquisitions	4,434		
Redemptions and other	(103)	(184)	
Balance at end	9,769	5,101	
Impairment	(1)		
Total	9,768	5,101	

15. HEDGING DERIVATIVES (RECEIVABLE AND PAYABLE) AND FAIR VALUE CHANGES OF THE HEDGE IN MACRO-HEDGE

The breakdown of the balance of these items in the accompanying consolidated balance sheets was as follows:

	Millions of E	uros
Hedging derivatives and Fair value changes of the hedged items in portfolio hedges of interest rate risk	June 2010	December 2009
ASSETS-		
Fair value changes of the hedged items in portfolio hedges of		
interest rate risk	118	
Hedging derivatives	4,586	3,595
LIABILITIES-		
Fair value changes of the hedged items in portfolio hedges of		
interest rate risk	-	-
Hedging derivatives	2,191	1,308

As of June 30, 2010 and December 31, 2009, the main positions hedged by the Group and the derivatives assigned to hedge those positions are:

• Fair value hedge:

- Available-for-sale fixed-interest debt securities: this risk is hedged using interest-rate derivatives (fixed-variable swaps).
- Long term fixed-interest debt issued by Group: this risk is hedged using interest-rate derivatives (fixed-variable swaps).
- Available-for-sale equity securities: this risk is hedged using equity swaps.
- Fixed-interest loans: this risk is hedged using interest-rate derivatives (fixed-variable swaps).
- Fixed-interest deposit portfolio macro- hedges: this risk is hedged using fixed-variable swaps and options of interest rate. The valuation of the deposit hedges corresponding to interest-rate risk is recognized under the heading "Changes in the fair value of the hedged items in the portfolio hedges of interest-rate risk."
- Cash-flow hedge: Most of the hedged items are floating interest-rate loans: this risk is hedged using foreign-exchange and interest-rate swaps.
- Net foreign-currency investment hedge: The risks hedged are foreign-currency investments in the Group's subsidiaries abroad. This risk is hedged mainly with foreign-exchange options and forward currency purchase.

Note 7 analyzes the Group's main risks that are hedged using these financial instruments.

The breakdown of the fair value of the hedging derivatives, organized hedged risk, recognized in the accompanying consolidated balance sheets are as follows:

	Millions of Euros				
June 2010	Currency Risk	Interest Rate Risk	Equity Price Risk	Other Risks	Total
OTC markets					
Credit institutions					
Fair value hedge	(7)	2,393	88	(1)	2,47

Subtotal	-	123	(21)	-	102
Other sectors					
Fair value hedge	-	(9)	-	-	(9
Cash flow hedge	-	-	-	-	
Net investment in a foreign operation hedge	-	-	-	-	
Subtotal	-	(9)	-	-	(9
Total	18	2,330	(57)	(4)	2,287
Of which: Asset Hedging Derivatives	22	3,492	81	-	3,59
Of which: Liability Hedging Derivatives	(4)	(1,162)	(138)	(4)	(1,308

The most significant cash flows forecasted for the coming years for cash flow hedging held on the balance sheet as of June 30, 2010 are shown below:

			Millions of Eu	ros	
Cash Flows of Hedging Instruments	3 Months or Less	From 3 Months to 1 Year	From 1 to 5 Years	More than 5 Years	Total
Receivable cash inflows	141	243	1,129	2,599	4,112
Payable cash outflows	72	278	783	2,677	3,810

The forecast cash flows in the table above will at most impact on the accompanying consolidated income statement until the year 2049. The amounts previously recognized in equity from cash flow hedges that were removed from equity and included in the consolidated income statement, either in the heading "Net gains (losses) on financial assets and liabilities" or in the heading "Exchange differences (net)", for the six months ended June 30, 2010 and 2009 were €12 million and -€2 million respectively.

The amount for derivatives designated as accounting hedges that did not pass the effectiveness test in 2010 was not significant.

As of June 30, 2010 and December 31, 2009, there were no hedges of highly probable forecast transactions in the Group.

16. NON-CURRENT ASSETS HELD FOR SALE AND LIABILITIES ASSOCIATED WITH NON-CURRENT ASSETS HELD FOR SALE

The composition of the balance of the heading "Non-current assets held for sale" in the accompanying consolidated balance sheets, broken down by the origin of the assets, is as follows:

	Millions of Euros		
Non-Current Assets Held-for-Sale Breakdown by type of Asset	June 2010	December 2009	
From:			
Tangible fixed assets (net)	253	356	
For own use	169	272	
Assets leased out under an operating lease	84	84	
Foreclosures or recoveries (net)	1,256	694	
Foreclosures	1,079	628	
Recoveries from financial leases	177	66	
Total	1,509	1,050	

Mean maturity of the assets through foreclosures and recoveries was less than 2 years.

The increase of the balance of the heading "Non-current assets held for sale – From foreclosures or recoveries (net)" in the above table is basically due to foreclosed assets in Spain and the United States.

As of June 30, 2010 and December 31, 2009, there were no liabilities associated with non-current assets held for sale.

17. INVESTMENTS IN ENTITIES ACCOUNTED FOR USING THE EQUITY METHOD

The breakdown of the balances of "Investments in entities accounted for using the equity method" in the accompanying consolidated balance sheets is as follows:

	Millions of	f Euros
Investments in Entities Accounted for Using the Equity Method	June 2010	December 2009
Associate entities	4,402	2,614
Jointly controlled entities	290	308
Total	4,692	2,922

17.1. ASSOCIATES

The following table shows the carrying amount of the most significant of the Group's investments in associates in the accompanying consolidated balance sheets:

	Millions of E	Millions of Euros			
Investments in Associates	June 2010	December 2009			
Grupo CITIC	4,087	2,296			
Occidental Hoteles Management, S.L.	102	84			
Tubos Reunidos, S.A.	52	52			
BBVA Elcano Empresarial II, S.C.R.R.S., S.A.	38	49			
BBVA Elcano Empresarial, S.C.R.R.S., S.A.	38	49			
ServiRed, S.A.	15	20			
Resto asociadas	70	64			
Total	4,402	2,614			

The investment in the CITIC Group includes the investment in Citic International Financial Holdings Limited ("CIFH") and China National Citic Bank ("CNCB").

Appendix IV shows associate entities as of June 30, 2010.

The breakdown of the balance and gross changes in the six-month periods ended June 30, 2010 and the January 1, 2010 under this heading of the consolidated balance sheets are as follows:

	Millions of Euros		
Associates Entities. Changes in the period.	June	December	
Breakdown of Goodwill	2010	2009	
Balance at beginning	2,614	894	
Acquisitions and capital increases (*)	1,198	53	
Disposals	(9)	(2)	
Transfers and others (**)	599	1,669	
Balance at end	4,402	2,614	
Of which:			
Goodwill	1,670	844	
CITIC Group	1,666	841	
Rest	4	3	
(*) The change of 2010 corresponds basically to the acquisition of 4.93% of CNC	B formalized in April 2010		
(**) Correspond, in 2009, mainly to the reclassification from the heading "Available (**)	e-for-sale financial assets " of CNCB	investment	
and in 2010 due to the exchange rate development.			

Agreement with the CITIC Group

The BBVA Group holds several agreements with the banking branch of the largest industrial group in China, CITIC Group (CITIC) to develop a strategic alliance in the Chinese market. BBVA's investment in CNCB is considered strategic for the Group, as it is the platform for developing its business in continental China and is also key for the development of CITIC's international business. BBVA has the status of "sole strategic investor" in CNCB. In 2009, BBVA's share in CNCB was reclassified from "Available for sale financial assets" of the accompanying consolidated balance sheets (Note 12) to the heading "Investments in entities accounted for using the equity method - Associates" since the Group gained significant influence in the holding.

Furthermore, on April 1, 2010, after obtaining the corresponding authorizations, the purchase of an additional 4.93% of CNCB's capital was finalized for €1,197 million.

As of June 30, 2010, BBVA had a 29.68% holding in CIFH and 15% in CNCB.

17.2. JOINTLY CONTROLLED ENTITIES

The jointly controlled entities that the Group has considered should be accounted for using the equity method (see Note 2.1) because this better reflects the economic reality of such holdings, are recognized under this heading of the accompanying consolidated balance sheets.

The following table shows the balances of the most significant of the Group's investments in the primary jointly controlled entities in the accompanying consolidated balance sheets:

	Millions of E	uros
Jointly Controlled Entities	June	December
·	2010	2009
Corporación IBV Participaciones Empresariales S.A.	129	157
Fideicomiso F/403853-5 BBVA Bancomer S°S ZIBAT	24	20
I+D Mexico, S.A.	19	15
Fideicomiso Hares BBVA Bancomer F/47997-2	18	15
Fideicomiso F/70413 Mirasierra	14	12
Fideicomiso F/402770-2 Alamar	12	10
Fideicomiso F/403112-6 Dos lagos	11	ę
Las Pedrazas Golf, S.L.	10	(
Rest	53	6′
Total	290	308
Of which		
Goodwill	1	Ę
Grupo Profesional Planeación y Proyectos S.A. de C.V.	-	(
Rest	1	2

If the jointly controlled entities accounted for using equity method had been accounted for by the proportionate method, the effect on the Group's main consolidated figures as of June 30, 2010 would have been as follows:

	Millions of E	uros
Jointly Controlled Entities. Effect on the Group's main figures	June	December
	2010	2009
Assets	814	861
Liabilities	360	364
Net operating income	6	(12)

The breakdown of the jointly controlled entities consolidated using the equity method as of June 30, 2010 is shown in Appendix IV.

17.3. INFORMATION ABOUT ASSOCIATES AND JOINTLY CONTROLLED ENTITIES BY THE EQUITY METHOD

The following table provides relevant information of the balance sheet and income statement of associates and jointly controlled entities accounted for using the equity method as of June 30, 2010 and December 31, 2009, respectively (see Appendix IV).

		Millions o	of Euros	
Associates and Jointly Controlles Entities	June 2	June 2010		2009
Financial Main figures	Associates	Jointly Controlled Entities	Associates	Jointly Controlled Entities
Current Assets	18,556	287	10,611	347
Non-current Assets	18,371	527	8,463	514
Current Liabilities	31,396	122	10,356	108
Non-current Liabilities	5,531	692	8,719	75
Net sales	318	40	605	84
Operating Income	133	7	244	(12
Net Income	96	4	166	(14

17.4. NOTIFICATIONS ABOUT ACQUISITION OF HOLDINGS

Appendix V shown on acquisitions and disposals of holdings in associates or jointly controlled entities and the notification dates thereof, in compliance with Article 86 of the Corporations Act and Article 53 of the Securities Market Act 24/1988.

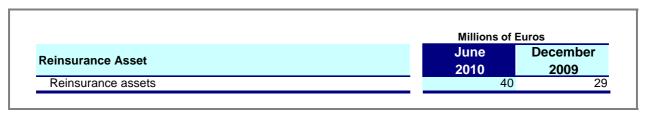

17.5 IMPAIRMENT

No impairment losses on the goodwill of jointly-controlled entities were recognized for the six-month period ended June 30, 2010. In 2009, €3 million of impairment losses on the goodwill of jointly-controlled entities were recognized, of which most are related to Econta Gestión Integral, S.L.

18. REINSURANCE ASSETS

This heading in the accompanying consolidated balance sheets reflects the amounts receivable by consolidated entities from reinsurance contracts with third parties.

The amounts recognized in the accompanying consolidated balance sheets corresponding to the share of the reinsurer in the technical provisions are set forth below:

19. TANGIBLE ASSETS

The breakdown of the balance of this heading in the accompanying consolidated balance sheets, according to the nature of the related items, is as follows:

	Millions of	euros
Tangible Assets. Breakdown by Type of Asset	June	December
Cost Value, Amortizations and Depreciations	2010	2009
Property, plants and equipment		
For own use		
Land and Buildings	3,492	2,989
Work in Progress	139	182
Furniture, Fixtures and Vehicles	5,371	5,599
Accrued depreciation	(4,515)	(4,569)
Impairment	(21)	(19)
Subtotal	4,466	4,182
Assets leased out under an operating lease		
Assets leased out under an operating lease	1,002	988
Accrued depreciation	(265)	(265)
Impairment	(22)	(32)
Subtotal	715	691
Subtotal	5,181	4,873
Investment properties		
Building rental	1,785	1,793
Rest	11	10
Accrued depreciation	(59)	(52)
Impairment	(171)	(117)
Subtotal	1,566	1,634
Total	6,747	6,507

The balance under the heading "Investment properties" includes mainly the rented buildings of the real estate fund BBVA Propiedad F.I.I. (see Appendix II).

The following table shows the detail of the net carrying amount of the tangible assets corresponding to Spanish or foreign entities as of June 30, 2010 and December 31, 2009:

	Millions of	Euros
Tangible Assets by Spanish and Foreign Subsidiaries Net Assets Values	June 2010	December 2009
Foreign subsidiaries	2,824	2,473
BBVA and Spanish subsidiaries	3,923	4,034
Total	6,747	6,507

The amount of tangible assets under financial lease schemes on which it is expected to exercise the purchase option was insignificant as of June 30, 2010 and December 31, 2009.

The main activity of the Group is carried out through a network of bank branches located geographically as shown in the following table:

	Number of branches		
Bank Branches by Geographical Location	June 2010	December 2009	
Spain	3,029	3,055	
Americas	4,234	4,267	
Rest of the world	144	144	
Total	7,407	7,466	

20. INTANGIBLE ASSETS

20.1. GOODWILL

The breakdown of the balance under this heading in the accompanying consolidated balance sheets, according to the cash-generating units ("CGU") that originated them, is as follows:

			Millions of	Euros		
June 2010	Balance at Beginning	Additions	Exchange Differences	Impairment	Rest	Balance at End
The United States	5,357	-	932	-	(2)	6,28
Mexico	593	-	122	-	3	71
Colombia	205	-	51	-	-	250
Chile	65	-	6	-	-	7
Chile Pensions	108	-	10	-	-	118
Spain and Portugal	68	-	-	-	-	6
Total	6,396	-	1,121	-	1	7,51

			Millions of	Euros		
December 2009	Balance at Beginning	Additions	Exchange Differences	Impairment	Rest	Balance at End
The United States	6,676	-	(226)	(1,097)	4	5,357
Mexico	588	-	9	-	(4)	593
Colombia	193	-	12	-	-	205
Chile	54	-	11	-	-	65
Chile Pensions	89	-	19	-	-	108
Spain and Portugal	59	-	-	-	9	68
Total	7,659	-	(175)	(1,097)	9	6,396

As of June 30, 2010 and 2009, no impairment losses on the goodwill that the Group recognized were recorded in the accompanying consolidated income statements.

20.2. OTHER INTANGIBLE ASSETS

The breakdown of the balance under this heading in the accompanying consolidated balance sheets is as follows:

	Millions of Euros		
Other Intangible Assets. Breakdown by type of Assets	June 2010	December 2009	
Computer software acquisition expenses	634	464	
Other deferred charges	34	29	
Other intangible assets	361	360	
Impairment	(1)	(1)	
Total	1,028	852	

21. TAX ASSETS AND LIABILITIES

21.1 CONSOLIDATED TAX GROUP

Pursuant to current legislation, the Consolidated Tax Group includes BBVA as the Parent company, and, as subsidiaries, the Spanish subsidiaries that meet the requirements provided for under Spanish legislation regulating the taxation regime for the consolidated net income of corporate groups.

The Group's other banks and subsidiaries file individual tax returns in accordance with the tax legislation in force in each country.

21.2 YEARS OPEN FOR REVIEW BY THE TAX AUTHORITIES

The years open to review in the Consolidated Tax Group as of December 30, 2010 are 2004 and following for the main taxes applicable.

The rest of the Spanish consolidated entities in general have the last four years open for inspection by the tax authorities for the main taxes applicable, except for those in which there has been an interruption of the limitation period due to the start of an inspection.

In 2009, as a result of action by the tax authorities, tax inspections proceedings were instituted for the years since (and including) 2003, some of which were contested. After considering the temporary nature of certain of the items assessed, provisions were set aside for the amounts, if any, that might arise from these assessments.

Over the year ended December 31, 2009, notice was also given of the start of inspections for the years 2004 to 2006 for the main taxes to which the tax group is subject. These inspections had not been completed as of June 30, 2010.

In view of the varying interpretations that can be made of the applicable tax legislation, the outcome of the tax inspections of the open years that could be conducted by the tax authorities in the future could give rise to contingent tax liabilities which cannot be objectively quantified at the present time. However, the Banks' Board of Directors and its tax advisers consider that the possibility of these contingent liabilities becoming actual liabilities is remote and, in any case, the tax charge which might arise therefore would not materially affect the Group's accompanying consolidated interim financial statements.

21.3 RECONCILIATION

The reconciliation of the corporate tax expense resulting from the application of the standard tax rate and the expense registered by this tax in the accompanying consolidated income statements is as follows:

	Millions of Eur	Millions of Euros		
Reconciliation of the Corporate Tax Expense Resulting from the Applicarion of the Standard Rate and the Expense Registered by this Tax	June 2010	June 2009		
Corporation tax (*)	1,096	1,201		
Decreases due to permanent differences:				
Tax credits and tax relief at consolidated Companies	(89)	(139		
Other items net	(58)	(155		
Net increases (decreases) due to temporary differences	168	(373		
Charge for income tax and other taxes	1,117	534		
Deferred tax assets and liabilities recorded (utilized)	(168)	373		
Income tax and other taxes accrued in the period	949	907		
Adjustments to prior years' income tax and other taxes	(8)	54		
Income tax and other taxes	941	961		
Income tax and other taxes accrued in the period Adjustments to prior years' income tax and other taxes	949 (8)			

The effective tax rate the six-month period ended June 30, 2010 and 2009 is as follows:

	Millions of Euros		
Effective Tax Rate	June 2010	June 2009	
Income from:			
Consolidated Tax Group	1,751	2,023	
Other Spanish Entities	(43)	(51)	
Foreign Entities	1,943	2,031	
Total	3,651	4,003	
Income Tax	941	961	
Effective Tax Rate	25.77%	24.01%	

21.4 TAX RECOGNIZED IN TOTAL EQUITY

In addition to the income tax recognized in the accompanying consolidated income statements, the Group has recognized the following amounts for these items in its consolidated equity as of June 30, 2010 and 2009:

	Millions of	Millions of Euros			
Tax Recognized in Total Equity	June 2010	December 2009			
Charges to total equity	(517)	(717)			
Credits to total equity (*)	415	1			
Total	102	(716)			

21.5 DEFERRED TAXES

The balance under the heading "Tax assets" in the accompanying consolidated balance sheets includes the tax receivables relating to deferred tax assets; the balance of the heading "Tax liabilities" in the accompanying consolidated balance sheets includes the liabilities relating to the Group's various deferred tax liabilities.

The main items for which the Group companies have recorded deferred tax assets were provisions for pensions and similar obligations to employees (€17 million in June 2010 in BBVA Bancomer and €1,374 million BBVA), and insolvency funds (€531 million in BBVA Bancomer and €641 million in BBVA). The deferred tax liabilities are principally due to free depreciation and other.

22. OTHER ASSETS AND LIABILITIES

The breakdown of the balance of these headings in the accompanying consolidated balance sheets was as follows:

	Millions of	Euros
Other Assets and Liabilities	June 2010	December 2009
ASSETS-		
Inventories	2,337	1,933
Transactions in transit	113	55
Accrued interest	749	581
Unaccrued prepaid expenses	559	42
Other prepayments and accrued income	190	160
Other items	1,740	1,383
Total	4,939	3,952
LIABILITIES-		
Transactions in transit	58	49
Accrued interest	2,437	2,079
Unpaid accrued expenses	1,448	1,412
Other accrued expenses and deferred income	989	667
Other items	943	780
Total	3,438	2,908

The heading "Inventories" includes the net carrying amount of the purchases of land and property that the Group's property companies hold for sale or for their business. The amounts under this heading include real-estate assets bought by these companies from distressed customers (mainly in Spain), net of their corresponding impairment. As of June 30, 2010 and December 31, 2009, the amounts recognized for valuation adjustments due to impairment losses on these assets amounted to €953 million and €606 million, respectively.

The principal companies in the Group that engage in real estate business activity and make up nearly all of the amount in the "Inventory" heading of the accompanying consolidated balance sheets are as follows: Anida Desarrollos Inmobiliarios, S.A., Desarrollo Urbanístico Chamartín, S.A., Anida Desarrollos Singulares S.L. and Anida Operaciones Singulares, S.L., Anida Inmuebles España y Portugal, S.L. and Adprotel Strand, S.L.

23. FINANCIAL LIABILITIES AT AMORTIZED COST

The breakdown of the balance of this heading in the accompanying consolidated balance sheets was as follows:

	Millions of Euros			
Financial Liabilities at Amortized Cost	June 2010	December 2009		
Deposits from central banks (Note 9)	32,154	21,166		
Deposits from credit institutions	62,575	49,146		
Customer deposits	257,830	254,183		
Debt certificates	86,407	99,939		
Subordinated liabilities	18,988	17,878		
Other financial liabilities	8,375	5,624		
Total	466,329	447,936		

As of June 30, 2010, the heading "Other financial liabilities" from the table above included the agreed dividend payable by BBVA but pending payment (see Note 4). This is the first interim dividend against 2010 results, and was paid as of July 10, 2010. As of December 31, 2009, this heading included the interim dividend agreed and pending payment (see Note 4) corresponding to the third interim dividend for 2009 paid as of January 10, 2010.

23.1. DEPOSITS FROM CENTRAL BANKS

The breakdown of the balance under this heading in the accompanying consolidated balance sheets is presented in Note 9.

23.2. DEPOSITS FROM CREDIT INSTITUTIONS

The breakdown of the balance of this heading in the consolidated balance sheets, according to the nature of the financial instruments, was as follows:

	Millions of Euros			
Deposits from Credit Institutions	June 2010	December 2009		
Reciprocal accounts	475	68		
Deposits with agreed maturity	38,343	30,608		
Demand deposits	1,335	1,273		
Other accounts	1,041	733		
Repurchase agreements	21,242	16,263		
Subtotal	62,436	48,945		
Accrued interest until expiration	139	201		
Total	62,575	49,146		

The breakdown by geographical area and the nature of the related instruments of this heading, disregarding valuation adjustments, was as follows:

June 2010		Millions of Euros					
	Demand Deposits	Deposits with Agreed Maturity	Repos	Total			
Spain	1,072	7,037	1,859	9,968			
Rest of Europe	327	20,117	11,099	31,543

Total	121,144	72,451	(68,289)	(5,817)	119,489

The breakdown of the most significant outstanding issuances, repurchases or refunds of debt instruments issued by the Bank or companies in the Group as of June 30, 2010 and December 31, 2009 is shown on Appendix VIII.

23.4.1 Promissory notes and bills

These promissory notes were issued mainly by BBVA, S.A. and Banco de Financiación, S.A.

23.4.2. BONDS AND DEBENTURES ISSUED

The following table shows the weighted average interest rates of fixed and floating rate bonds and debentures issued in euros and foreign currencies for the six months ended June 30, 2010 and 2009:

	June 2	010	June 2	2009
Interests Rates of Promissory Notes and Bills Issued	Euros	Foreign Currency	Euros	Foreign Currency
Fixed rate	3.82%	5.05%	3.90%	4.10%
Floating rate	0.96%	3.70%	1.39%	3.72%

Most of the foreign-currency issuances are denominated in U.S. dollars.

23.4.3. SUBORDINATED LIABILITIES

23.4.3.1. SUBORDINATED DEBT

These issuances are non-convertible subordinated debt and, accordingly, for debt seniority purposes, they rank behind ordinary debt.

The breakdown of this heading in the accompanying consolidated balance sheets, disregarding valuation adjustments, by currency of issuance and interest rate, is disclosed in Appendix VIII.

The item "Subordinated Liabilities" in the accompanying consolidated balance sheets includes the issue of convertible subordinated obligations at a value of €2,000 million issued by BBVA in September 2009. These obligations have a 5% annual coupon, payable quarterly, and can be converted into Bank shares after the first year, at the Bank's discretion, at each of the coupon payment dates, and by obligation on the date of their final maturity date, October 15, 2014. These obligations have been recognized as financial liabilities given that the number of Bank shares to be delivered is variable. The number of said shares will be that value at the date of conversion (determined based on the quoted value of the five sessions preceding the conversion) is equal to the nominal value of the obligations.

23.4.3.2. Preferred securities:

The breakdown by issuer of this heading in the accompanying consolidated balance sheets is as follows:

	Millions of Euros			
Preferred Securities by Issuer	June 2010	December 2009		
BBVA International, Ltd. (1)	500	500		
BBVA Capital Finance, S.A.U.	2,975	2,975		
Banco Provincial, S.A	40	67		
BBVA International Preferred, S.A.U. (2)	1,727	1,628		
Phoenix Loan Holdings, Inc.	20	18		
Total	5,262	5,188		
(1) Traded on the Spanish AIAF market,				
(2) Traded on the London Stock Exchange and New York Stock Exchanges.				

These issues were fully subscribed by third parties outside the Group and are wholly or partially redeemable at the issuer company's option after five or ten years from the issue date, depending on the terms of each issue.

Of the above, the issuances of BBVA International, Ltd., BBVA Capital Finance, S.A.U. and BBVA International Preferred, S.A.U, are subordinately guaranteed by the Bank.

The breakdown of this heading in the accompanying consolidated balance sheets, disregarding valuation adjustments, by currency of issuance and interest rate, is disclosed in Appendix VIII.

24. LIABILITIES UNDER INSURANCE CONTRACTS

The breakdown of the balance of this item in the accompanying consolidated balance sheets is as follows:

	Millions of E	uros
Liabilities under Insurance Contracts	June	December
Technical Reserve and Provisions	2010	2009
Mathematical reserves	6,742	5,994
Provision for unpaid claims reported	768	712
Provisions for unexpired risks and other provisions	558	480
Total	8,068	7,186

25. PROVISIONS

The breakdown of the balance of this item in the accompanying consolidated balance sheets is as follows:

	Millions of E	uros
Provisions. Breakdown by concepts	June 2010	December 2009
Provisions for pensions and similar obligations	5,999	6,246
Provisions for taxes and other legal contingents	332	299
Provisions for contingent exposures and commitments	313	243
Other provisions	1,839	1,771
Total	8,483	8,559

26. PENSION AND OTHER COMMITMENTS

As described in Note 2.2.12, the Group has assumed both defined-benefit and defined-contribution postemployment commitments with its employees; the proportion of defined-contribution benefits is gradually increasing, mainly due to new hires.

26.1. PENSION COMMITMENTS THROUGH DEFINED-CONTRIBUTION PLANS

The commitments with employees for pensions in post-employment defined-contribution plans correspond to current contributions the Group makes every year on behalf of active employees. These contributions are accrued and charged to the consolidated income statement in the corresponding financial year (see Note 2.2.12). No liability is therefore recognized in the accompanying consolidated balance sheets.

The amounts recorded under this item in the accompanying consolidated income statements for contributions to these plans were €39 million and €34 million, respectively (see Note 46.1).

26.2 PENSION COMMITMENTS THROUGH DEFINED-BENEFIT PLANS AND OTHER LONG-TERM BENEFITS

Pension commitments in defined-benefit plans correspond mainly to employees who have retired or taken early retirement from the Group and to certain groups of employees still active in the Group in the case of pension benefits, and to the majority of active employees in the case of permanent incapacity and death benefits.

The breakdown of the BBVA Group's aggregate amounts for pension commitments in defined-benefit plans and other post-employment commitments (such as early retirement and welfare benefits) recorded under the heading "Provisions - Provisions for pensions and similar obligations" of the accompanying consolidated balance sheets as of December 31, 2009 of the last five years and as of June 30, 2010 are as follows:

		Millions of Euros				
Commitments in Defined-Benefit Plans and Other Commitment Post-employment	June 2010	2009	2008	2007	2006	2005
Pension and post-employment benefits	8,076	7,995	7,985	7,816	8,173	7,639
Assets and insurance contracts coverage	2,077	1,749	1,101	1,883	1,816	1,39
Net assets	-	-	-	(34)	-	
Net liabilities	5,999	6,246	6,359	5,967	6,357	6,24

The breakdown of the commitments pension commitments in defined-benefit plans and other postemployment commitments, as well as the corresponding insurance contracts or coverage, distinguishing between employees in Spain and the rest of the subsidiaries and BBVA, S.A. branches abroad, is as follows:

	Millions of Euros						
	Commitmen	Commitments in Spain		Commitments Abroad		/A Group	
Pensions and Early-Retirement Commitments and Welfare Benefits: Spain and Abroad	June 2010	December 2009	June 2010	December 2009	June 2010	December 2009	
Post-employment benefits	-	-	-	-	-		
Post-employment benefits	2,912	2,946	1,135	997	4,048	3,9	
Early retirement	3,163	3,309	-	-	3,163	3,3	
Post-employment welfare benefits	215	222	651	521	866	7	
Total post-employment benefits (1)	6,290	6,477	1,786	1,518	8,076	7,9	
nsurance contracts coverage	-	-	-	-	-		
Post-employment benefits	446	455	-	-	446	4	
Other plan assets	-	-	-	-	-		
Post-employment benefits	-	-	1,138	952	1,138	9	
Post-employment welfare benefits	-	-	493	342	493	3	
Total assets plan and insurance contracts coverage (2)	446	455	1,631	1,294	2,077	1,7	
Net commitments (1) - (2)	5,844	6,022	155	224	6,000	6,2	
of which:	-	-	-	-	-		
Net assets	-	-	-	-	-		
Net liabilities (*)	5,844	6,022	155	224	5,999	6,2	

Additionally, there are other commitments to employees, including long-service bonuses which are recognized under the heading "Other provisions" in the accompanying consolidated balance sheets (see Note 25). These amounted to €36 million as of June 30, 2010 (€39 million as of December 31, 2009) of which €11 million correspond to Spanish companies and €25 million to companies and branches abroad (€13 million and €26 million, respectively, as of December 31, 2009).

The balance of the heading "Provisions - Provisions for pensions and similar obligations" on the accompanying consolidated balance sheets as of June 30, 2010, included €203 million for commitments for post-employment benefits maintained with previous executive members of the Board of Directors and the Bank's Management Committee. It also includes €8 million as commitments to post-employment benefits for former non-executive members of the Bank's Board of Directors. No charges for these concepts were recognized in the accompanying consolidated income statements for the six months ended June 30, 2010 with former members of the Bank's Board of Directors and Management Committee.

The changes in these net commitments during the six-month periods ended June 30, 2010 and 2009 were as follows:

			Millions of E	uros		
	Commitments	in Spain	Commitment	s Abroad	broad Total BBVA	
Net Commitments Spain and Abroad: Summary of Changes in the period	June 2010	June 2009	June 2010	June 2009	June 2010	June 2009

Total Effects in Equity: Debit (Credit) to Reserves		(5)	4

26.2.1 Commitments in Spain

The most significant actuarial assumptions used as of June 30, 2010, and December 31, 2009, to quantify these commitments are as follows:

Pension Actuarial Hypothesis Commitment with employees in Spain	June 2010	December 2009
Mortality tables	PERM/F 2000P.	PERM/F 2000P.
Discount rate (cumulative annual)	Pond Viold Curvo	4.5 % AA Corporate
Consumer price index (cumulative annual)	2%	2%
Salary growth rate (cumulative annual)	At least 3% (depending on employee)	At least 3% (depending on employee)
Retirement ages	or contractually agreed at the	ployees are entitled to retire ne individual level in the case etirements

The breakdown of the various commitments to employees in Spain is as follows:

Pension commitments in Spain

The breakdown of pension commitments in defined-benefit plans as of June 30, 2010 and December 31, 2009 is as follows:

	Millions of E	uros
Pension Commitments Spain	June 2010	December 2009
Commitments to retired employees	2,793	2,847
Vested contingencies in respect of current employees	119	99
Total (*)	2,912	2,946
(*) Recognized under the heading "Provisions-Provisions for pension and similar obliga balabce sheets	tion" in the accompanyng conso	olidated

Insurance contracts have been contracted with insurance companies not related to the Group to cover some pension commitments in Spain. These commitments are covered by assets and therefore are presented in the accompanying consolidated balance sheets for the net amount of the commitment less plan assets. As of

June 30, 2010 and December 31, 2009, the plan assets related to the insurance contracts mentioned (shown in the previous table under the heading "Insurance contract cover") equaled the amount of the commitments covered, therefore its net value was zero in the accompanying consolidated balance sheets.

The rest of the commitments included in the previous table include defined-benefit commitments for which insurance has been contracted with BBVA Seguros, S.A. de Seguros y Reaseguros, which is 99.95% owned by the Group. The assets in which the insurance company has invested the amount of the policies cannot be considered plan assets under IAS 19 and are presented in the accompanying consolidated balance sheets under different headings of "assets", depending on the classification of their corresponding financial instruments. The commitments are recognized under the heading "Provisions – Provision for pensions and similar obligations" of the accompanying consolidated balance sheets (see Note 25).

• Early retirements in Spain

In the six months ended June 30, 2010, the Group in Spain offered certain employees the possibility of taking early retirement before the age stipulated in the collective labor agreement in force. This offer was accepted by 281 employees (223 in the six months ended June 30, 2009).

The early retirements commitments in Spain as of June 30, 2010 and December 31, 2009 recognized under the heading "Provisions – Provisions for pensions and similar obligations" (see Note 25) in the accompanying consolidated balance sheets amounted to €3,163 million and €3,309 million, respectively.

The cost of early retirements for the year was recognized under the heading "Provision Expense (Net) – Transfers to funds for pensions and similar obligations – Early retirements" in the accompanying consolidated income statements (see Note 48).

• Other long-term commitments with employees in Spain

The long-term commitments with employees include post-employment welfare benefits and other commitments with employees.

Post-employment welfare benefits in Spain

The breakdown of these commitments as of June 30, 2010 and December 31, 2009 is as follows:

	Millions of E	uros
Post-Employment Welfare Benefits Commitments in Spain	June 2010	December 2009
employees	175	183
Vested post-employment welfare benefit contingencies in respect of current employees	40	39
Total Commitments (*)	215	222
(*) Recognized under the heading "Provisions-Provisions for pension and similar obligation" in consolidated balabce sheets	the accompanyng	

Other commitments with employees - Long-service bonuses

In addition to the post-employment welfare benefits mentioned above, the Group maintained certain commitments in Spain with some employees, called "Long-service bonuses". These commitments are for the payment of a certain amount in cash and for the allotment of Banco Bilbao Vizcaya Argentaria, S.A. shares when these employees complete a given number of years of effective service. The Group has offered these employees the option to redeem the accrued value of such share benefits prior to the established date of seniority. The value of the long-service bonuses as of June 30, 2010 and December 31, 2009 for employees who did not choose early settlement is recognized under the heading "Provisions – Other provisions" (see Note 25) of the accompanying consolidated balance sheets with the figure of €11 million and €13 million, respectively.

Breakdown of changes in commitments with employees in Spain

The changes in these net commitments with employees in Spain during the six months ended June 30, 2010 and 2009 were as follows:

	Millions of Euros					
Net Commitments in Spain : Changes in the period January 1, - June 30, 2010	Pensions	Early Retirements	Welfare Benefits	Total Spain

Other changes	-	-	1	0	,
Balance at end	68	5	34	48	15

In the table above, "Payments made in the period" are presented net, as the difference between the payment to the beneficiary charged against the fund and the reduction in fund assets for the same amount. These payments corresponding to the six months ended June 30, 2010, amounted to €18 million for pensions in Mexico, €10 million for welfare benefits in Mexico and €8 million for pensions in Portugal.

The net charges recognized in the accompanying consolidated income statements and under the heading "Reserves" of the accompanying consolidated balance sheets (see Note 2.2.12.) of the BBVA Group for commitments to post-employment benefits abroad were as follows:

Commitments with employees Abroad: Income Statements and Reserves Effects.	Millions of eu June 2010	June 2009
Interest expense and similar charges	7	2003
Personnel expenses	17	14
Provisions (net)	-	1:
Total Effects in Income Statements	24	30
Total Effects in Equity: Debit (Credit) to Reserves	-	

• Commitments with employees in Mexico:

The main actuarial assumptions used in quantifying the commitments with employees in Mexico as of June 30, 2010 have not varied significantly compared with those applied as of December 31, 2009 and they are as follows:

Post-Employment Actuarial Hypothesis in Mexico	June 2010
Mortality tables	EMSSA 97
Discount rate (cumulative annual)	9.25%
Consumer price index (cumulative annual)	3.75%
Medical cost trend rates	6.75%
Expected rate of return on plan assets	9.40%

In the six-month period ended June, 30 2010, the estimated returns on plan assets linked to the commitments to post-employment welfare benefits recognized in the accompanying consolidated income statement was €3 million. As of June 30, 2010 the plan assets covering these obligations were all in fixed-income securities.

• Pension Commitments in Portugal:

The main actuarial assumptions used in quantifying the commitments with employees in Portugal as of June 30, 2010 have not varied significantly compared with those applied as of December 31, 2009 and they are as follows:

ommitments in Defined-Benefit Plans and Other Commitment	June
ost-employment	2010
Mortality tables	TV 88/90
Discount rate (cumulative annual)	5.35%
Consumer price index (cumulative annual)	2.00%
Salary growth rate (cumulative annual)	3.00%
Expected rate of return on plan assets	4.50%

In the six-month period ended June, 30, 2010, the estimated returns on plan assets designed to cover these pension commitments recognized in the accompanying consolidated income statement was €2 million. As of June 30, 2010 the plan assets for these commitments were all in debt securities. As of June 30, 2010 the plan assets covering these obligations were mainly in fixed-income securities.

Pension commitments in the United States:

The main actuarial assumptions used in quantifying the commitments with employees in the United States as of June 30, 2010 have not varied significantly compared with those applied as of December 31, 2009:

ost-Employment Actuarial Hypothesis in the United States	June 2010
Mortality tables	RP 2000 Projecte
Discount rate (cumulative annual)	5.93%
Consumer price index (cumulative annual)	2.50%
Salary growth rate (cumulative annual)	3.50%
Expected rate of return on plan assets	7.50%
AA P I AA I A	8,50% to 5%
Medical cost trend rates	in 2013

In the six-month period ended June, 30 2010, the estimated returns on plan assets designed to cover these pension commitments recognized in the accompanying consolidated income statement was €1 million. As of

June 30, 2010, the plan assets covering these obligations were invested in both equity and fixed-income securities.

26.2.3 Estimated future payments for commitments with employees in the BBVA Group

The estimated benefit payments in millions of euros over the next 10 years for all the companies in Spain, Mexico, Portugal and the United States are as follows:

			Millions	of Euros		
Future Estimated Payments for Post-Employment Commitments	2011	2012	2013	2014	2015	2016-2020
Pensions Spain	175	174	173	170	170	823
Early-Retirement Spain	546	504	460	412	400	1,198
Welfare Benefits Spain	19	18	17	17	17	83
Pensions México	30	31	31	32	31	191
Pensions Portugal	16	17	18	18	18	102
Pensions United States	8	8	9	10	10	63
Total	794	752	708	659	646	2,460

27. COMMON STOCK

As of June 30, 2010, the share capital of BBVA amounted to €1,836,504,869.29, divided into 3,747,969,121 fully subscribed and paid-up registered shares, all of the same class and series, at €0.49 par value each, represented through book-entry accounts.

All BBVA shares carry the same voting and dividend rights and no single stockholder enjoys special voting rights.

BBVA shares are traded on the continuous market in Spain, as well as on the London and Mexico stock markets. American Depositary Shares (ADSs) listed in New York are also traded on the Lima (Peru) Stock Exchange, by virtue of an exchange agreement between these two exchanges.

Also, as of June 30, 2010, the shares of BBVA Banco Continental, S.A., Banco Provincial S.A., BBVA Colombia, S.A., BBVA Chile, S.A., BBVA Banco Frances, S.A. and AFP Provida were listed on their respective local stock markets, the latter two also being listed on the New York Stock Exchange. BBVA Banco Frances, S.A. is also listed on the Latin-American market of the Madrid Stock Exchange.

As of June 30, 2010, Manuel Jove Capellán held 4.22% of BBVA common stock through the companies Inversiones Universales, S.L. and Bourdet Inversiones, SICAV, S.A.

As a result of the acquisition of the business of Barclays Global Investors (BGI) as of December 1, 2009, the company Blackrock Inc, whose registered office is in the United Kingdom, had an indirect holding of 4.45% in BBVA's common stock as of June 30, 2010, through the company Blackrock Investment Management (UK).

In addition, as of the same date, Chase Nominees Ltd, State Street Bank and Trust Co. and the Bank of New York Mellon, in their capacity as international custodian/depositary banks, held 6.55%, 4.97% and 3.84% of BBVA common stock, respectively.

BBVA is not aware of any direct or indirect interests through which ownership or control of the Bank may be exercised.

BBVA has not been notified of the existence of any agreements between shareholders to regulate the exercise of voting rights at the Bank's AGMs, or to restrict or place conditions upon the free transferability of BBVA shares. It is also not aware of any agreement that might result in changes in the control of the issuer.

At the AGM held on March 13, 2009 the shareholders resolved to delegate to the Board of Directors, in accordance with Article 153.1.b) of the Spanish Corporations Act, the power to increase capital, on one or more occasions, by a maximum par value equal to 50% of the Company's subscribed and paid-up share capital at the date of the resolution, i.e. €918,252,434.60. Article 159.2 of the Corporations Act empowers the Board to exclude the preferred subscription right in relation to these share issues, although these powers will be limited to 20% of the Company's common stock. The directors have the legally-established time period

during which to increase the common stock, i.e., five years. So far, BBVA has not issued any shares under this authorization.

At the AGM held on March 14, 2008 the shareholders resolved to delegate to the Board of Directors for a five-year period the right to issue bonds, convertible and/or exchangeable into Bank shares for a maximum total of €9,000 million. The powers include the right to establish the different aspects and conditions of each issue, including the power to exclude the preferential subscription rights of shareholders in accordance with the Corporations Act, to determine the basis and methods of conversion and to increase capital stock in the amount considered necessary. In virtue of this authorization, the Board of Directors agreed at its meeting as of July 27, 2009 to issue €2,000 million of convertible bonds, excluding the right to preferential subscription.

Previously, the AGM held on March 18, 2006 had agreed to delegate to the Board of Directors the faculty to issue, within a maximum legal period of five years as of said date, on one or several occasions, directly or through subsidiary companies fully underwritten by the Bank, any kind of debt instruments through debentures, any class of bonds, promissory notes, any class of commercial paper or warrants, which may be totally or partially exchangeable for equity that the Company or another company may already have issued, or via contracts for difference (CFD), or any other senior or secured nominative or bearer debt securities (including mortgage-backed bonds) in euros or any other currency that can be subscribed in cash or kind, with or without the incorporation of rights to the securities (warrants), subordinated or not, with a limited or open-ended term. The total maximum nominal amount authorized is €105,000 million. This amount was increased by €30,000 million by the Ordinary General Stockholders' Meeting held on March 16, 2007, by €50,000 million by the AGM on March 14 2008, and by an additional €50,000 million by the AGM on March 13, 2009. Accordingly, the maximum total nominal amount delegated by the General Meeting was €235,000 million.

28. SHARE PREMIUM

The amounts under this heading in the accompanying consolidated balance sheets total €12,453 million as of June 30, 2010 and December 31, 2009.

There was a charge against the item "Share premium" in 2009 of €317 million corresponding to payment to shareholders on April 20, 2009 as a complement to dividends for 2008, which was approved at the AGM on March 13, 2009 (see Note 4)

This payment consisted in a total of 60,451,115 treasury stock (see Note 30) at one (1) share for each sixty-two (62) held by shareholders at market close on April 9, 2009. These shares were valued at €5.25 each (the average weighted price per share of Banco Bilbao Vizcaya Argentaria, S.A. in the Spanish continuous system on March 12, the day before that of the AGM mentioned above).

The amended Spanish Corporation Act expressly permits the use of the share premium balance to increase capital and establishes no specific restrictions as to its use.

29. RESERVES

The breakdown of the balance of this heading in the accompanying consolidated balance sheets was as follows:

	Millions of Euros			
Reserves. Breakdown by concepts	June 2010	December 2009		
Legal reserve	367	367		
Restricted reserve for retired capital	88	88		
Restricted reserve for Parent Company shares	835	501		
Restricted reserve for redenomination of capital in euros	2	2		
Revaluation Royal Decree-Law 7/1996	45	48		
Voluntary reserves	4,358	2,918		
Consolidation reserves attributed to the Bank and dependents consolidated companies	8,899	8,150		
Total	14,594	12,074		

29.1. LEGAL RESERVE

Under the amended Corporations Act, 10% of any profit made each year must be transferred to the legal reserve until the balance of this reserve reaches 20% of the share capital. This 20% minimum had already been reached by Banco Bilbao Vizcaya Argentaria, S.A. as of June 30, 2010. The legal reserve can be used to increase the share capital provided that the balance of the reserve does not fall below 10% of the increased capital.

To the extent mentioned above, and until the legal reserve exceeds 20% of capital, it can only be used to offset losses, provided that sufficient other reserves are not available for this purpose.

29.2. RESTRICTED RESERVES

Pursuant to the amended Spanish Corporations Act, a restricted reserve is recognized resulting from the reduction of the nominal value of each share in April 2000, and another restricted reserve resulting from the amount of treasury stock held by the Bank at each period-end, as well as by the amount of customer loans outstanding at those dates that were granted for the purchase of, or are secured by, the Bank's shares.

Finally, pursuant to Law 46/1998 on the introduction of the euro, a restricted reserve is recognized as a result of the rounding effect of the redenomination of the share capital in euros.

29.3. REVALUATION OF ROYAL DECREE-LAW 7/1996 (REVALUATION AND REGULARIZATION OF THE BALANCE SHEET)

Prior to the merger, Banco de Bilbao, S.A. and Banco de Vizcaya, S.A. availed themselves of the legal provisions applicable to the regularization and revaluation of balance sheets. Thus, as of December 31, 1996, Banco Bilbao Vizcaya, S.A. revalued its tangible assets pursuant to Royal Decree-Law 7/1996 of June 7 by applying the maximum coefficients authorized, up to the limit of the market value arising from the existing valuations.

Following the review of the balance of the "Revaluation Reserve pursuant to Royal Decree-Law 7/1996", June 7, account by the tax authorities in 2000, this balance could only be used, free of tax, to offset recognized losses and to increase share capital until January 1, 2007. From that date, the remaining balance of this account can also be allocated to unrestricted reserves, provided that the surplus has been depreciated or the revalued assets have been transferred or derecognized. As of June 30, 2010 and December 31, 2009, the balance of restricted reserves (not yet classified as unrestricted reserves) amounted to €45 million and €48 million, respectively.

29.4. RESERVES AND LOSSES AT CONSOLIDATED COMPANIES

The breakdown, by company or corporate group, of the item "Reserves" in the accompanying consolidated balance sheets is as follows:

	Millions of E	
eserves Assigned to the Consolidation Process	June 2010	December
ccumulated reserves (losses)	2010	2009
BBVA, S.A. (Reserves assigned to the holding company)	3,873	1,67
Grupo BBVA Bancomer	5,340	4,02
Grupo Chile	539	41
Grupo BBVA Banco Provincial	593	41:
Grupo BBVA Continental	183	12
Grupo BBVA Puerto Rico	5	7
Grupo BBVA USA Bancshares	(953)	7
Grupo BBVA Portugal	(194)	(207
Grupo BBVA Colombia	(140)	(209
Grupo BBVA Banco Francés	(101)	(139
BBVA Seguros, S.A.	1,275	1,05
Corporacion General Financiera, S.A.	1,255	1,22
BBVA Luxinvest, S.A.	1,231	1,23
Cidessa Uno, S.L.	1,012	74
Anida Grupo Inmobiliario, S.L.	377	40
BBVA Suiza, S.A.	249	23
Bilbao Vizcaya Holding, S.A.	170	16
BBVA Panamá, S.A.	147	11
BBVA Ireland Public Limited Company	144	10
Almacenes Generales de Deposito, S.A.E.	110	10:
Compañía de Cartera e Inversiones, S.A.	109	12
Anida Desarrollos Singulares, S.L.	(299)	(21
Participaciones Arenal, S.L.	(181)	(181
Anida Operaciones Singulares, S.L.	(117)	(1
BBVA Propiedad F.I.I.	(116)	(12
Compañía Chilena de Inversiones, S.L.	(135)	(135
Finanzia, Banco de Crédito, S.A.	(49)	14
Rest	190	21
Subtotal	14,517	11,76
eserves (losses) of entities accounted for using the	,	,
quity method:	_	
Grupo CITIC	111	3
Tubos Reunidos, S.A.	52	5
Corp. IBV Participaciones Empresariales, S.A.	4	24
Part. Servired, Sdad.Civil	11	2.
Occidental Hoteles Management, S.L.	(43)	(13
Hestenar, S.L.	(15)	(2
Rest	(43)	(31
Subtotal	77	30
otal Reserves	14,594	12.07

For the purpose of allocating the reserves and accumulated losses at the consolidated companies shown in the above table, the transfers of reserves arising from the dividends paid and transactions between these companies are taken into account in the period in which they took place.

As of June 30, 2010 and December 31, 2009, €2,801 million and 2,140 million, respectively, in the individual financial statements of the subsidiaries were restricted reserves.

30. TREASURY STOCK

Throughout the six months ended June 30, 2010 and 2009, the Group companies performed the following transactions with shares issued by the Bank:

	June 2	2010	June 2	009
Treasury Stock	Number of Shares	Millions of Euros	Number of Shares	Millions of Euros
Balance at beginning	16,642,054	224	61,539,883	720
+ Purchases	416,477,119	4,118	377,532,513	2,774
- Sales and other changes	(378,396,035)	(3,838)	(433,220,188)	(3,337)
+/- Derivatives over BBVA shares	-	(11)	=	(134
Balance at the end	54,723,138	493	5,852,208	23
Of which:	-	-	-	
Held by BBVA	944,223	14	2,315,059	(8)
Held by Corporación General Financiera, S.A.	53,778,386	479	3,524,033	31
Held by other subsidiaries	529	-	13,116	-
Average purchase price in euros	9.89	-	7.35	
Average selling price in euros	9.74	-	6.86	
Net gain or losses on transactions				
(Shareholders' funds-Reserves)	_	(107)	-	(305)

The amount under the heading of "Sales and other changes" in the above table in the six months ended June 30, 2009 includes the allocation of treasury stock to the shareholders as an additional remuneration to complement the dividends for 2008 (see Note 28).

The percentages of treasury stock held by the Group in the six months ended June 30, 2010 and 2009 were as follows:

	June	2010	June	2009
Treasury Stock	Min	Max	Min	Max
% treasury stock	0.35%	2.40%	0.07%	2.70%

The number of shares of BBVA accepted in pledge as of June 30, 2010 and December 31, 2009 was as follows:

Shares of BBVA Accepted in Pledge	June 2010	December 2009
Number of shares in pledge	93,265,377	92,503,914
Nominal value	0.49	0.49
% of share capital	2.49%	2.47%

The number of BBVA shares owned by third parties but managed by a company in the Group as of June 30, 2010 and December 31, 2009 was as follows:

Shares of BBVA Owned by Third Parties but Managed by	June	December
the Group	2010	2009
Number of shares property of third parties	79,989,361	82,319,422
Nominal value	0.49	0.49
% of share capital	2.13%	2.20%

31. VALUATION ADJUSTMENTS

The breakdown of the balance under this heading in the accompanying consolidated balance sheets is as follows:

		Millions of Euros		
Valuation Adjustments	Notes	June 2010	December 2009	
Available-for-sale financial assets	12.4	462	1,951	
Cash flow hedging		151	188	
Hedging of net investments in foreign transactions		(366)	219	
Exchange differences	2.2.16	454	(2,236)	
Non-current assets held for sale		-		
Entities accounted for using the valuation method		143	(184	
Other valuation adjustments		-		
Total		844	(62	

The balances recognized under these headings are presented net of tax.

32. NON-CONTROLLING INTEREST

The breakdown by consolidated company of the balance under the heading "Non-controlling interests" of total equity in the accompanying consolidated balance sheets was as follows:

	Millions of E	Millions of Euros			
Non-Controlling Interest	June 2010	December 2009			
BBVA Colombia Group	33	30			
BBVA Chile Group	321	280			
BBVA Banco Continental Group	447	391			
BBVA Banco Provincial Group	418	590			
BBVA Banco Francés Group	130	127			
Other companies	50	45			
Total	1,399	1,463			

These amounts are broken down by consolidated company under the heading "Net income attributed to non-controlling interests" in the accompanying consolidated income statements:

	Millions of Eur	ros
Net Income atributed to Non-Controlling Interests	June 2010	June 2009
BBVA Colombia Group	4	3
BBVA Chile Group	45	34
BBVA Banco Continental Group	70	69
BBVA Banco Provincial Group	45	110
BBVA Banco Francés Group	16	22
Other companies	3	5
Total	183	243

33. CAPITAL BASE AND CAPITAL MANAGEMENT

Capital base

Bank of Spain Circular 3/2008, of May 22, on the calculation and control of minimum capital base requirements, regulates the minimum capital base requirements for Spanish credit institutions —both as individual entities and as consolidated groups— and how to calculate them, as well as the various internal capital adequacy assessment processes they should have in place and the information they should disclose to the market.

Circular 3/2008 implements Spanish legislation on capital base and consolidated supervision of financial institutions, as well as adapting Spanish law to the relevant European Union Directives, in compliance with the Accord adopted by the Basel Committee on Banking Supervision (Basel II).

The minimum capital base requirements established by Circular 3/2008 are calculated according to the Group's exposure to credit and dilution risk, counterparty and liquidity risk relating to the trading portfolio, exchange rate risk and operational risk. In addition, the Group must fulfill the risk concentration limits established in said Circular and the internal Corporate Governance obligations.

As of June 30, 2010 and December 31, 2009, the Group's capital exceeded the minimum capital base level required by regulations in force on each date as shown below:

	Millions of E	uros	
Capital Base	June	December	
	2010	2009	
Basic equity	27,965	27,114	
Common Stock	1,837	1,837	
Parent company reserves	23,200	20,892	
Reserves in consolidated companies	4,210	1,600	
Non-controlling interests	1,274	1,245	
Other equity instruments	7,224	7,130	
Deductions (Goodwill and others)	(11,200)	(8,177	
Attributed net income (less dividends)	1,420	2,587	
Additional equity	12,101	12,116	
Other deductions	(3,605)	(2,133)	
Additional equity due to mixed group (*)	1,287	1,305	
Total Equity	37,748	38,402	
Minimum equity required	24,769	23,282	

The results of the stress tests of European financial institutions, published as of July 23, 2010, suggest that the BBVA Group will maintain its current solvency levels in 2011, even in the most adverse scenario that incorporates the additional impact of a possible sovereign risk crisis.

Capital management

Capital management in the Group has a twofold aim: to preserve the level of capitalization, in accordance with the business objectives in all the countries in which it operates; and, at the same time, to maximize the return on shareholders' funds through the efficient allocation of capital to the different units, good management of the balance sheet and appropriate use of the various instruments forming the basis of the Group's equity: stock, preferential stock and subordinate debt.

This capital management is carried out in accordance with the criteria of the Bank of Spain Circular 3/2008, both in terms of determining the capital base and the solvency ratios. This regulation allows each entity to apply its own internal ratings based (IRB) approach to risk and capital management.

The Group carries out an integrated management of these risks, in accordance with its internal policies (see Note 7) and its internal capital estimation model has received the Bank of Spain's approval for certain portfolios.

Capital is allocated to each business area (see Note 6) according to economic risk capital (ERC) criteria, which are based on the concept of unexpected loss with a specific confidence level, as a function of a solvency target determined by the Group. This target is established at two levels: Core equity: adjusted core capital, which determines the allocated capital and serves as a reference to calculate the return generated

on equity (ROE) by each business; and total capital, which determines the additional allocation in terms of subordinate debt and preferred securities.

Because of its sensitivity to risk, ERC is an element linked to policies for managing the actual businesses. The procedure provides a harmonized basis for assigning capital to businesses according to the risks incurred and makes it easier to compare returns. The calculation of the CaR combines credit risk, market risk, structural risk associated with the balance sheet equity positions, operational risk, fixed assets and technical risks in the case of insurance companies. These calculations are carried out using internal models that have been defined following the guidelines and requirements established under the Basel II Capital Accord, with economic criteria prevailing over regulatory ones.

34. FINANCIAL GUARANTEES AND DRAWABLE BY THIRD PARTIES

The breakdown of the balances of these items as of June 30, 2010, and December 31, 2009 was as follows:

	Millions of	Euros
Financial Guarantees and Drawable by Third Parties	June 2010	December 2009
Contingent Exposures		
Collateral, bank guarantees and indemnities	27,429	26,266
Rediscounts, endorsements and acceptances	64	45
Rest	8,666	6,874
Total	36,159	33,185
Contingent Commitments		
Drawable by third parties:	91,710	84,925
Credit institutions	2,120	2,257
Government and other government agency	4,292	4,567
Other resident sectors	30,153	29,604
Non-resident sector	55,145	48,497
Other commitments	6,298	7,398
Total	98,008	92,323

Since a significant portion of these amounts will reach maturity without any payment obligation materializing for the consolidated companies, the aggregate balance of these commitments cannot be considered as an actual future requirement for financing or liquidity to be provided by the Group to third parties.

For the six months ended June 30, 2010 and 2009 no issues of debt securities carried out by associate entities, jointly controlled entities (accounted for using the equity method) or non-Group entities have been guaranteed.

35. ASSETS ASSIGNED TO OTHER OWN AND THIRD-PARTY OBLIGATIONS

In addition to those mentioned in other notes in the accompanying consolidated financial statements as of June 30, 2010 and December 31, 2009 (see Notes 13 and 26) the assets of consolidated entities that guaranteed their own securities amounted to €92,127 million and €81,231 million, respectively. This amount mainly corresponds to assets allocated as collateral for certain lines of short-term finance assigned to the Group by central banks and to the issue of long-term mortgage-backed securities (Note 23.4) which, pursuant to the Mortgage Market Act, are admitted as third-party collateral.

As of June 30, 2010 and December 31, 2009, none of the Group's assets were linked to any additional third-party obligations apart from those described in the various notes to these accompanying consolidated financial statements.

36. OTHER CONTINGENT ASSETS AND LIABILITIES

As of June 30, 2010 and December 31, 2009, there were no significant contingent assets or liabilities registered.

37. PURCHASE AND SALE COMMITMENTS AND FUTURE PAYMENT OBLIGATIONS

The breakdown of sale and purchase commitments of the BBVA Group as of June 30, 2010 and December 31, 2009 was as follows:

Millions of Euros		
Purchase and Sale Commitments	June 2010	December 2009
Financial instruments sold with repurchase commitments	37,010	29,409
Financial instruments purchased with resale commitments	5,846	7,023

Below is a breakdown of the maturity of other future payment obligations (in addition to those described in Note 16.1 for property leases) maturing after June 30, 2010:

		M	illions of Euro	os	
Maturity of Future Payment Obligations	Up to 1 Year	1 to 3 Years	3 to 5 Years	Over 5 Years	Total
Finance leases	-	-	-	-	
Operating leases	289	139	89	228	74
Purchase commitments	215	8	-	-	223
Technology and systems projects	166	7	-	-	173
Other projects	49	1	-	-	50
Total	504	147	89	228	968

38. TRANSACTIONS ON BEHALF OF THIRD PARTIES

As of June 30, 2010 and December 31, 2009, the details of the most significant items under this heading were as follows:

	Millions of	Euros
Transactions on Behalf of Third Parties	June 2010	December 2009
Financial instruments entrusted by third parties	521,339	530,109
Conditional bills and other securities received for collection	4,407	4,428
Securities received in credit	1,019	489

As of June 30, 2010 and December 31, 2009, off-balance sheet customer funds were as follows:

	Millions of	Euros
Off-Balance Sheet Customer Funds by Type	June 2010	December 2009
Mutual funds	47,452	47,415
Pension funds	72,964	63,189
Customer portfolios	25,018	26,501
Total	145,434	137,105

39. INTEREST, INCOME AND SIMILAR EXPENSES

39.1. INTEREST AND SIMILAR INCOME

The breakdown of the most significant interest and similar income earned in the accompanying consolidated income statement is follows:

	Millions of E	uros	
Interest and Similar Income. Breakdown by Origin.	June 2010	June 2009	
Central Banks	115	150	
Loans and advances to credit institutions	196	422	
Loans and advances to customers	7,835	9,873	
Government and other government agency	219	262	
Resident sector	2,960	4,549	
Non resident sector	4,656	5,062	
Debt securities	1,556	1,729	
Trading	654	859	
Investment	902	870	
Rectification of income as a result of hedging transactions	82	106	
Insurance activity income	498	471	
Other income	175	160	
Total	10,457	12,911	

The amounts recognized in consolidated equity in both periods in connection with hedging derivatives and the amounts derecognized from consolidated equity and taken to the consolidated income statement for both periods are disclosed in the accompanying consolidated statements of recognized income and expenses.

The following table shows the adjustments in income resulting from hedge accounting, broken down by type of hedge:

_	Millions of E	uros
	June	June
Adjustments in Income Resulting from Hedge Accounting	2010	2009
Cash flow hedging	142	144
Fair value hedging	(60)	(38)
Total	82	106

The breakdown of the balance of this heading in the accompanying consolidated income statements by geographical area was as follows:

	Millions of E	Millions of Euros		
Interest and Similar Income.	June	June		
Breakdown by Geographical Area	2010	2009		
Domestic market	4,494	6,310		
Foreign	5,963	6,601		
European Union	368	674		
OECD	3,659	3,771		
Rest of countries	1,936	2,156		
Total	10,457	12,911		
Of which:

⁽¹⁾ The volume effect is calculated as the result of the interest rate of the initial period multiplied by the difference between the average balances of both periods

40. DIVIDEND INCOME

The balances for this heading in the accompanying consolidated income statements correspond to dividends on shares and capital instruments other than those from shares in entities accounted for using the equity method (see Note 41), as can be seen in the breakdown below:

	Millions of E	uros
Dividend Income	June 2010	June 2009
Dividends from:		
Financial assets held for trading	70	62
Other financial assets at fair value through profit or loss	-	
Available-for-sale financial assets	187	186
Total	257	248

⁽²⁾ The price effect is calculated as the result of the average balance of the last period multiplied by the difference between the interest rates of both periods.

41. SHARE OF PROFIT OR LOSS OF ENTITIES ACCOUNTED FOR USING THE EQUITY METHOD

The breakdown of the "Share of profit or loss of entities accounted for using the equity method" in the accompanying consolidated income statements is as follows:

	Millions of Eur	ros
Investments in Entities Accounted for Using the Equity	June	June
Method	2010	2009
CITIC Group	136	2
Corporación IBV Participaciones Empresariales, S.A.	5	16
Tubos Reunidos, S.A.	-	4
Occidental Hoteles Management, S.L.	(4)	(1)
Servired Española de Medios de Pago, S.A.	8	(4)
Rest	6	10
Total	151	27

42. FEE AND COMMISSION INCOME

The breakdown of the balance under this heading in the accompanying consolidated income statements was as follows:

	Millions of E	uros
Fee and Commission Income. Breakdown by main Items	June	June
Tee and Commission meetine. Breakdown by main hems	2010	2009
Commitment fees	71	44
Contingent liabilities	142	130
Letters of credit	22	21
Bank and other guarantees	120	109
Arising from exchange of foreign currencies and banknotes	7	6
Collection and payment services	1,241	1,268
Securities services	820	836
Counselling on and management of one-off transactions	4	2
Financial and similar counselling services	28	11
Factoring transactions	14	6
Non-banking financial products sales	52	46
Other fees and commissions	299	289
Total	2,678	2,638

43. FEE AND COMMISSION EXPENSES

The breakdown of the balance under this heading in the accompanying consolidated income statements was as follows:

Fee and Commission Expenses. Breakdown by main	June	June
Items	2010	2009
Brokerage fees on lending and deposit transactions	2	3
Fees and commissions assigned to third parties	276	335
Other fees and commissions	128	119
Total	406	457

44. NET GAINS (LOSSES) ON FINANCIAL ASSETS AND LIABILITIES

The breakdown of the balance under this heading in the accompanying consolidated income statements was as follows:

	Millions of Eur	ros
Net Gains (Losses) on Financial Assets and Liabilities	June 2010	June 2009
Financial assets held for trading	490	136
Other financial assets designated at fair value through profit or loss	18	29
Other financial instruments not designated at fair value through profit or loss	559	281
Available-for-sale financial assets	533	245
Loans and receivables	15	11
Held-to-maturity investments and Financial liabilities at amortized cost	-	
Rest	11	25
Total	1.067	446

The balance under this heading in the accompanying consolidated income statements, broken down by the nature of the financial instruments, was as follows:

	Millions of Eur	ros
Net Gains (Losses) on Financial Assets and Liabilities	June	June
Breakdown by Nature of the Financial Instrument	2010	2009
Financial assets held for trading	500	356
Other financial assets designated at fair value through profit or loss	(551)	420
Other financial instruments not designated at fair value through profit or loss	16	24
Available-for-sale financial assets	1,069	(409)
Loans and receivables	-	-
Rest	33	55
Total	1,067	446

The breakdown of the balance of the impact of the derivatives (trading and hedging) on this heading in the accompanying consolidated income statements was as follows:

	Millions of Euros		
Derivatives Trading and Heading	June	December	
Trading derivatives	2010	2009	
Interest rate agreements	332	(95)	
Security agreements	688	(222)	
Commodity agreements	(20)	(15	
Credit derivative agreements	(47)	(52)	
Foreign-exchange agreements	123	2	
Other agreements	(1)	(1)	
Subtotal	1,075	(381)	
Hedging Derivatives Ineffectiveness			
Fair value hedging	(5)	(27)	
Hedging derivative	666	77	
Hedged item	(671)	(104)	
Cash flow hedging	(1)		
Subtotal	(6)	(27)	
Total	1,069	(409)	

In addition, in the six months ended June 30, 2010 €187million have been recognized under the heading "Net exchange differences" in the accompanying consolidated income statement, through foreign exchange derivative trading.

45. OTHER OPERATING INCOME AND EXPENSES

The breakdown of the balance under the heading "Other operating income" in the accompanying consolidated income statements was as follows:

	Millions of E	uros
Other Operating Income. Breakdown by main Items	June 2010	June 2009
Income on insurance and reinsurance contracts	1,324	1,313
Financial income from non-financial services	296	229
Of which:		
Real estate agencies	28	Ę
Rest of operating income	151	213
Of which:		
Net operating profit from rented buildings	30	28
Total	1,771	1,755

The breakdown of the balance under the heading "Other operating expenses" in the accompanying consolidated income statements was as follows:

	Millions of Euros		
Other Operating Expenses. Breakdown by main Item	June 2010	June 2009	
Expenses on insurance and reinsurance contracts	942	936	
Change in inventories	259	191	
Rest of operating expenses	430	360	
Of which:			
Contributions to guaranted banks deposits funds	175	169	
Total	1,631	1,487	

46. ADMINISTRATION COSTS

46.1 PERSONNEL EXPENSES

The breakdown of the balance under this heading in the accompanying consolidated income statements was as follows:

	_	Millions of E	uros
Personnel Expenses. Breakdown by main Concepts	Notes	June 2010	June 2009
Wages and salaries		1,821	1,754
Social security costs		281	276
Transfers to internal pension provisions	26.2	21	22
Contributions to external pension funds	26.1	39	34
Other personnel expenses		202	205
Total		2,364	2,291

The breakdown of average number of employees in the Group in the six months ended June 30, 2010 and 2009, by professional categories and geographical areas, was as follows:

	Average Number of	of Employees
Average Number of Employees by Geographical Areas	June 2010	June 2009
Spanish banks		
Executives	1,072	1,034
Other line personnel	20,811	20,76
Clerical staff	4,731	5,44
Branches abroad	635	670
Subtotal	27,249	27,918
Companies abroad		
Mexico	26,556	26,85
Venezuela	5,690	6,05
Argentina	4,098	4,20
Colombia	4,305	4,26
Peru	4,289	4,200
United States	11,001	10,57
Other	4,647	4,86
Subtotal	60,586	61,01
Pension fund managers	5,231	5,899
Other non-banking companies	10,759	10,43
Total	103,825	105,27°

The average number of employees in the Group in the six months ended June 30, 2010 and 2009 was as follows:

	June 2	2010	June 2	2009
	Male	Female	Male	Female
Average Number of Employees	50,237	53,588	51,691	53,580
Of which:				
BBVA, S.A.	15,608	11,181	16,072	11,282

The total number of employees in the Group as of June 30, 2010 and December 31, 2009, broken down by professional category and gender, was as follows:

	June 2	010	Decembe	er 2009
Number of Employees by Professional Category and Gender	Male	Female	Male	Female
Executive managers	1,683	337	1,646	328
Other line personnel	23,493	19,351	21,960	18,687
Clerical staff	25,385	34,123	26,913	34,187
Total	50,561	53,811	50,519	53,202

Equity-instrument-based employee remuneration

BBVA has a variable multi-year remuneration scheme in place as part of the remuneration policy established for its executive team. It is based on the award of Bank shares that are instrumented through annual overlapping medium- and long-term programs. These consist of allocating individuals theoretical shares ("units") that at the end of each program are converted into real BBVA shares, provided certain initially established conditions are met, with the number depending on a scale linked to an indicator of value generation for the shareholder, and dependent on the individual performing well during the period the program is in operation.

At the conclusion of each program, the final number of shares to be granted will be equal to the result of multiplying the initial number of assigned "units" by a coefficient on a scale of between 0 and 2, which is

linked to the movement of the Total Shareholders Return (TSR) indicator. This indicator measures the return on investment for shareholders as the sum of the revaluation of the Bank's shares plus dividends or other similar concepts during the period of each program/plan by comparing the movement of this indicator for a group of banks of reference in Europe and the United States.

Below are the main features of each of the equity-based remuneration schemes currently in force in the BBVA Group.

Multi-Year Variable Share-Based Remuneration Plan for the BBVA Executive Team

The beneficiaries of these programs are the members of the Group's executive team, including executive directors and the BBVA's Management Committee members (see Note 56). Currently, the following programs are being operated:

• 2009-2010 program

The Bank's Annual General Meeting on March 13, 2009 approved the 2009-2010 program, with a completion date of December 31, 2010.

As of June 30, 2010, the number of "units" assigned to the beneficiaries of this program was 6,824,039.

• 2010-2011 program

The Bank's Annual General Meeting on March 12, 2010 approved the 2010-2011 program, with a completion date of December 31, 2011.

This program incorporates some restrictions to granting shares to the beneficiaries after the settlement. These shares are available as follows:

- 40 percent of the shares received shall be freely transferable by the beneficiaries at the time of their delivery;
- 30 percent of the shares are transferable a year after the settlement date of the program; and
- 30 percent are transferable starting two years after the settlement date of the program.

As of June 30, 2010, the total number of "units" assigned to the beneficiaries of this program was 3,361,437.

BBVA Compass long-term incentive plan

The Remuneration Committee of BBVA Compass has approved various long-term remuneration plans with BBVA shares for members of the executive team and key employees of BBVA Compass and its affiliates.

Currently, BBVA Compass is operating the following plans:

• 2008-2010 plan

The starting date of this plan was January 1, 2008, and its completion date will be December 31, 2010.

The plan consists in assigning "restricted share units" to the beneficiaries. Each of these units represents an obligation on the part of BBVA Compass to grant an equivalent number of BBVA American Depositary Shares (ADS) after a certain period, conditional on compliance with specific criteria.

The total number of "restricted share units" assigned to the beneficiaries of this plan was 821.511.

• 2009-2011 plan

On November 27, 2009, the Remuneration Committee of BBVA Compass agreed to increase the number of ADS in the existing plan and set up a new plan for the period 2009-2011, with a completion date of December 31, 2011.

This plan consists of granting "units" or theoretical shares to management staff (as described at the start of this section on remuneration based on equity instruments.

The total number of "units" and "restricted share units" assigned to the beneficiaries of this plan was 1.128.628.

• 2010-2012 plan

In May 2010, the Remuneration Committee of BBVA Compass approved a new long-term share-based remuneration plan solely for members of the executive team of BBVA Compass and its affiliates, for the period 2010-2012, with the completion date on December 31, 2012.

The total number of "units" assigned to the beneficiaries of this plan was 986,542.

During the period of operation of each of the schemes mentioned above, the sum of the commitment to be accounted for at the date of the accompanying consolidated financial statements was obtained by multiplying the number of "units" assigned by the expected share price and the expected value of the coefficient, both estimated at the date of the entry into force of each of the schemes.

The cost of these programs/plans is broken up throughout their operational life. The expense registered for these programs/plans for the six months between January 1 and June 30, 2010 amounted to €14 million and is recognized under the heading "Personnel expenses – Other" in the Group's accompanying consolidated income statement for the first half of 2010, with a charge to "Stockholders' Funds - Other equity instruments" in the accompanying consolidated balance sheet as of June 30, 2010, net of tax effect.

46.2 GENERAL AND ADMINISTRATIVE EXPENSES

The breakdown of the balance under this heading in the accompanying consolidated income statements was as follows:

	Millions of E	uros
General and Administrative Expenses.	June	June
Breakdown by main concepts	2010	2009
Technology and systems	292	279
Communications	137	128
Advertising	162	127
Property, fixtures and materials	369	309
Of which:		
Rent expenses (*)	194	141
Taxes	145	129
Other administration expenses	546	471
Total	1,651	1,443

47. DEPRECIATION AND AMORTIZATION

The breakdown of the balance under this heading in the accompanying consolidated income statements was as follows:

	Millions of Euros			
Depreciation and Amortization	Notes	June 2010	June 2009	
Tangible assets	19	226	232	
For own use		215	222	
Investment properties		8	6	
Operating lease		3	4	
Other Intangible assets	20.2	139	122	
Total		365	354	

48. PROVISIONS (NET)

The net allowances charged to the income statement under the headings "Provision for pensions and similar obligations", "Provisions for contingent exposures and commitments", "Provisions for taxes and other legal contingencies" and "Other provisions" (Note 25) in the accompanying consolidated income statements were as follows:

	Millions of Euros		
Provisions (Net)	Notes	June 2010	June 2009
Provisions for pensions and similar obligations	26	143	146
Provisions for contingent exposures and commitments		61	(67)
Provisions for taxes and other legal contingencies		66	73
Total		270	152

49. IMPAIRMENT LOSSES ON FINANCIAL ASSETS (NET)

The breakdown of impairment losses on financial assets broken down by the nature of these assets in the accompanying consolidated income statements was as follows:

		Millions of E	uros
Impairment Losses on Financial Assets (Net) Breakdown by main concepts	Notes	June 2010	June 2009
Available-for-sale financial assets	12	69	76
Debt securities		(3)	73
Other equity instruments		72	3
Held-to-maturity investments	14	-	(1)
Loans and receivables	7	2,350	1,869
Of which:			
Recovery of written-off assets	7	111	80
Total		2,419	1,944

50. IMPAIRMENT LOSSES ON OTHER ASSETS (NET)

The breakdown of impairment losses of non-financial assets broken down by the nature of these assets in the accompanying consolidated income statements was as follows:

	Millions of Euros				
Impairment Losses on Other Assets (Net)	Notes	June 2010	June 2009		
Goodwill	20.1 y 17	-			
Other intangible assets	20.2	-			
Tangible assets	19	49	100		
For own use		7	36		
Investment properties		42	64		
Inventories	22	129	146		
Rest		18	25		
Total		196	271		

51. GAINS AND LOSSES ON DERECOGNIZED ASSETS NOT CLASSIFIED AS NON-CURRENT ASSETS HELD FOR SALE

The breakdown of the balances under these headings in the accompanying consolidated income statements was as follows:

_	Millions of Euros		
Gains and Losses on Derecognized Assets Not Classified	June	June	
as Non-current Assets Held for Sale	2010	2009	
Gains			
Disposal of investments in entities	4	3	
Disposal of intangible assets and other	14	14	
Losses:			
Disposal of investments in entities	(3)	(1)	
Disposal of intangible assets and other	(4)	(7)	
Total	11	9	

52. GAINS AND LOSSES IN NON-CURRENT ASSETS HELD FOR SALE NOT CLASSIFIED AS DISCONTINUED OPERATIONS

The breakdown under the heading "Gains and losses in non-current assets held for sale not classified as discontinued operations" in the accompanying consolidated income statements was as follows:

	Millions of Euros		
Gains and Losses in Non-current Assets Held for	June	June	
Sale	2010	2009	
Gains for real estate	107	110	
Of which:			
Foreclosed	-	-	
Sale of buildings for own use (Note 16.1)	51	90	
Impairment of non-current assets held for sale	(83)	(40)	
Gains on sale of available-for-sale financial assets	-	-	
Total	24	70	

53. CONSOLIDATED STATEMENT OF CASH FLOWS

Cash flows from operating activities increased in the six months ended June 30, 2010 by €11,590 million, compared with the increase of €8,530 million in six months ended June 30, 2009. The most significant changes occurred in the headings of "Loans and receivables", "Financial liabilities at amortized cost" and "Financial assets held for trading".

Cash flows from investment activities decreased between January 1 and June 30, 2010 by €6,510 million, compared with the increase of €75 million between January 1 and June 30, 2009. The most significant changes are included under the headings "Held-to-maturity investments".

Cash flows from financing activities decreased between January 1 and June 30, 2010 by €1,570 million, compared with the decrease of €177 million between January 1 and June 30, 2009. The most significant changes are shown in the line detailing the acquisition and amortization of own equity instruments.

The table below breaks down the main cash flows related to investing activities:

	Millions of Euros		
Main Cash Flows in Investing Activities	Cash Flows in Investment Activities		
June 2010	Investments (-)	Divestments (+)	
Tangible assets	(749)		
Intangible assets	(176)		
Investments	(1,198)		
Subsidiaries and other business units	(66)	10	
Non-current assets and liabilities associated held for sale	-		
Held-to-maturity investments	(4,331)		
Other settlements related with investement activities	-		

	Millions of Euros			
Main Cash Flows in Investing Activities	Cash Flows in Investment Activities			
June 2009	Investments (-)	Divestments (+)		
Tangible assets	(16)			
Intangible assets	-	27		
Investments	(4)	14		
Subsidiaries and other business units	(7)	27		
Non-current assets and liabilities associated held for sale	(150)			
Held-to-maturity investments	-	184		
Other settlements related with investement activities	-			

54. ACCOUNTANT FEES

The breakdown of the fees for the services contracted by the companies of the Group in the six-month period ended June 30, 2010 with their respective auditors and other audit companies was as follows:

Fees for Audits Conducted	Millions of Euros
Audits of the companies audited by firms belonging to the Deloitte worldwide	
organization	8.4
Fees for audits conducted by other firms	0.1
Other reports required pursuant to applicable legislation and tax regulations issued by	
the national supervisory bodies of the countries in which the Group operates, reviewed	
by firms belonging to the Deloitte worldwide organization	2.9

Other companies in the Group contracted other services as at June 30, 2010, as follows:

Accountant Fees. Other Services Contracted	Millions of Euros
Firms belonging to the Deloitte worldwide organization	0.8
Other firms	4.5

The services provided by our accountants meet the independence requirements established under Law 44/2002, of 22 November, on Measures Reforming the Financial System and by the Sarbanes-Oxley Act of 2002 adopted by the Securities and Exchange Commission (SEC); accordingly they did not include the performance of any work that is incompatible with the auditing function.

55. BALANCES ARISING FROM TRANSACTIONS WITH ENTITIES OF THE GROUP

As financial institutions, BBVA and other companies in the Group engage in transactions with related parties in the normal course of their business. All these transactions are of little relevance and are carried out in normal market conditions.

55.1 TRANSACTIONS WITH SIGNIFICANT SHAREHOLDERS

As of June 30, 2010, the balances of transactions with significant shareholders (see Note 27) correspond to "Customer deposits", at €93 million, "Loans and advances to customers", at €36 million and "Contingent exposures", at €16 million, all of them in normal market conditions.

55.2 TRANSACTIONS WITH THE BBVA GROUP

The balances of the main aggregates in the accompanying consolidated balance sheets arising from the transactions carried out by the Group with associates and jointly controlled companies accounted for using the equity method (see Note 2.1) were as follows:

	Millions of Eu	ros
Balances arising from transactions with Entities of the	June	June
Group	2010	2009
Assets:		
Loans and advances to credit institutions	74	21
Loans and advances to customers	486	638
Liabilities:		
Deposits from credit institutions	2	1
Customers deposits	91	102
Debt certificates	103	292
Memorandum accounts:		
Contingent exposures	37	39
Contingents commitments	330	380

The balances of the main aggregates in the accompanying consolidated income statements resulting from transactions with associated and jointly controlled entities that consolidated by the equity method were as follows:

	Millions of Euros	
Balances of Income Statement arising from transactions	June	June
with Entities of the Group	2010	2009
Income statement:		
Financial Revenues	8	8
Financial Expenses	1	4

There are no other material effects in the accompanying consolidated financial statements of the Group arising from dealings with these companies, other than the effects arising from using the equity method (see Note 2.1), and from the insurance policies to cover pension or similar commitments (see Note 25).

As of June 30, 2010, the notional amount of the futures transactions arranged by the Group with the main companies mentioned above amounted to €2,056 million (of which €1,956 million in 2010 correspond to futures transactions with the CITIC Group).

In addition, as part of its normal activity, the Group has entered into agreements and commitments of various types with shareholders of subsidiaries and associates, which have no material effects on the accompanying consolidated financial statements.

55.3 TRANSACTIONS WITH MEMBERS OF THE BOARD OF DIRECTORS AND MANAGEMENT COMMITTEE

The information on the remuneration of members of the Board of Directors of BBVA and of the Group's Management Committee is included in Note 56.

The amount disposed of the loans granted to members of Board of Directors as of June 30, 2010 and December 31, 2009 totaled €163 thousand and €806 thousand.

The amount disposed of the loans granted as of June 30, 2010 and December 31, 2009 to the Management Committee, excluding the executive directors, amounted to €3,869 thousand and €3,912 thousand.

As of June 30, 2010 and December 31, 2009, there were no guarantees provided on behalf of members of the Bank's Board of Directors and Management Committee.

As of June 30, 2010 and December 31 2009, the amounts disposed of the loans granted to parties related to key personnel (the members of the Board of Directors of BBVA and of the Management Committee as mentioned above) amounted to €32,536 thousand and €51,882 thousand. As of June 30, 2010 and December 31,2009, the other exposure (guarantees, financial leases and commercial loans) to parties related to key personnel amounted to €11,078 thousand and €24,514 thousand.

55.4 TRANSACTIONS WITH OTHER RELATED PARTIES

As of June 30, 2010, the Group did not present any transactions with other related parties that did not belong to the normal course of their business, that was not under market conditions and that was relevant for the equity, income or the entity and financial situation of this entity.

56. REMUNERATION OF THE BOARD OF DIRECTORS AND MEMBERS OF THE BANK'S **MANAGEMENT COMMITTEE**

Remuneration and other benefits of the members of the Board of Directors and members of the Management Committee.

(1) Mr. José Antonio Fernández Rivero, apart from the amounts detailed in the table above, also received the sum of €326 thousand during the six months ended June 30, 2010, in early retirement payments as a former member of the BBVA Management Committee.

(2) Mr. José Maldonado Ramos, who stood down as executive of BBVA on December, 22, 2009, apart from the amounts detailed in the table above, also

received during the six months ended June 30,2010 the sum of 6805 thousand as variable remuneration accrued in 2009 for his office as Company Secretary

(*) Moreover, Mr. Roman Knörr Borrás, who stood down as director on March, 23, 2010, received the sum of €74 thousand as remuneration for his membership of the Board of Directors and the Executive Committee.

(**) Additionally, by resolution of the Board of Directors on May, 25, 2010, two new Appointments and Compensation Committees were created to substitute the former Appointments and Compensation Committee. The directors members of these Committees received the whole total sum of €20 thousand

for their membership of these Committee

• REMUNERATION OF EXECUTIVE DIRECTORS

The remuneration paid to individual executive directors in the six months ended June 30, 2010 is indicated below, broken down by type of remuneration:

		Thousand of Euros	
Remuneration of Executive Directors Six-month ended June 30, 2010	Fixed Remuneration	Variable Remuneration (*)	Total
Chairman and CEO	964	3,388	4,352
President and COO	624	1,482	2,106
Total (**)	1,588	4,870	6,458
(*) The figures relate to variable remuneration for 2009 paid in 2010.			
(**) Additionally, the executive directors have received in six month ended June 30,2	010 "in kind" remuneration ar	d others	
for a whole total sum of €26 thousand, from which €10 thousand correspond to the	Chairman and CEO		

REMUNERATION OF THE MEMBERS OF THE MANAGEMENT COMMITTEE (*)

The remuneration paid in the January 1 to June 30, 2010 period to the members of BBVA's Management Committee amounted to €3,401 thousand in fixed remuneration and €14,200 thousand in variable remuneration accrued in 2009 and paid in 2010.

Additionally, the members of the Management Committee have received during the January 1 to June 30, 2010 period, in kind remuneration and others for the sum of €252 thousand.

(*) This section includes information on the members of the Management Committee as of June 30, 2010, excluding the executive directors.

 VARIABLE MULTI-YEAR STOCK REMUNERATION PROGRAM FOR 2009-2010 FOR EXECUTIVE DIRECTORS AND MEMBERS OF THE MANAGEMENT COMMITTEE

BBVA has a variable multi-year remuneration scheme in place as part of the remuneration policy established for its executive team, including executive directors and members of the Management Committee. It is based on the award of Bank shares that are instrumented through annual overlapping medium- and long-term programs. These consist of allocating individuals theoretical shares ("units") that at the end of each program are converted into real BBVA shares, provided certain initially established conditions are met, with the number depending on a scale linked to an indicator of value generation for the shareholder, and dependent on the individual performing well during the period the program is in operation.

MULTI-YEAR VARIABLE SHARE-BASED REMUNERATION PLAN FOR 2009-2010

The Annual General Meeting of the Bank on March 13, 2009, approved a multi-year variable share-based remuneration scheme for 2009-2010 (hereinafter "the 2009-2010 Program") aimed at members of the BBVA executive team. It is to end on December 31, 2010 and will be settled on April 15, 2011, notwithstanding the provisions included in its Regulation for early settlement.

The precise number of shares to be given to each beneficiary of the 2009-2010 program is calculated by multiplying the number of units allocated by a coefficient of between 0 and 2. This coefficient reflects the relative performance of BBVA's total stockholder return (TSR) during the period 2009-2010 compared with the TSR of a group of the Bank's international peers.

The number of "units" allocated to executive directors under this program, in accordance with the resolution of the AGM, was 215,000 for the Chairman and CEO, and 131,707 for the President and COO (**).

The total number of units assigned under this program to the Management Committee members who held this position on June 30, 2010, excluding executive directors, was 817,464.

(**) In addition, the previous Company Secretary, Mr. José Maldonado Ramos, has 29,024 "units", which were allocated to him as an executive of the Bank at the start of the program. The amount initially allocated was reduced as a result of his retirement as an executive of the Bank, using a sliding scale for the time he worked as an executive and the total duration of the program.

MULTI-YEAR VARIABLE SHARE-BASED REMUNERATION PLAN FOR 2010-2011

The Annual General Meeting of the Bank on March 12, 2010, approved a new multi-year variable share-based remuneration scheme for 2010-2011 (hereinafter "the 2010-2011 Program") aimed at members of the

BBVA executive team. It is to end on December 31, 2011 and will be settled by April 15, 2012, notwithstanding the provisions included in its Regulation for early settlement.

The precise number of shares to be given to each beneficiary of the 2010-2011 program is also calculated by multiplying the number of units allocated by a coefficient of between 0 and 2. This coefficient reflects the relative performance of BBVA's total stockholder return (TSR) during the period 2010-2011 compared with the TSR of a group of the Bank's international peers.

These shares will be given to the beneficiaries after the settlement of the program. They will be able to use these shares as follows: (i) 40 percent of the shares received will be freely transferable by the beneficiaries at the moment they are received; (ii) 30 percent of the shares received will be transferable one year after the settlement date of the program; and (iii) the remaining 30 percent will be transferable starting two years after the settlement date of the program.

The number of units assigned for the executive directors under the AGM resolution is 105,000 for the Chairman and CEO and 90,000 for the President and COO.

The total number of units assigned under this program to the Management Committee members who held this position on June 30, 2010, excluding executive directors, is 385,000.

SCHEME FOR REMUNERATION OF NON-EXECUTIVE DIRECTORS WITH DEFERRED DISTRIBUTION OF SHARES

The Bank's AGM on March 18, 2006 resolved under agenda item eight to establish a remuneration scheme using deferred distribution of shares to the Bank's non-executive directors, to replace the earlier post-employment scheme in place for these directors.

The plan is based on the annual assignment to non-executive directors of a number of "theoretical shares" equivalent to 20% of the total remuneration received by each of them in the previous year. The share price used in the calculation is the average closing price of the BBVA shares in the seventy stock market sessions before the dates of the ordinary AGMs that approve the annual accounts for each year. The shares will be given to each beneficiary on the date he or she leaves the position of director for any reason except serious breach of duties.

The number of "theoretical shares" allocated to non-executive director beneficiaries under the deferred share distribution scheme approved by the AGM for 2010, corresponding to 20% of the total remuneration paid to each in 2009, is set out below:

Scheme for Remuneration of Non-Executive Directors with Deferred Distribution of Shares	Theorical Shares assigned in 2010	Accumulated Theorical Shares
Tomás Alfaro Drake	3,521	13,228
Juan Carlos Alvarez Mezquiriz	5,952	39,463
Rafael Bermejo Blanco	7,286	23,275
Ramón Bustamante y de la Mora	5,401	38,049
José Antonio Fernández Rivero	6,026	30,141
Ignacio Ferrero Jordi	5,952	40,035
Carlos Loring Martínez de Irujo	5,405	25,823
Enrique Medina Fernández	7,079	51,787
Susana Rodríguez Vidarte	4,274	24,724
Total (*)	50,896	286,525

• PENSION COMMITMENTS

March, 23, 2010, equivalent to 20% of the remuneration received by him in 2009

The provisions registered as of June 30, 2010 for pension commitments to the President and COO are €14,146 thousand, including both those accumulated as director of the Group and those resulting from his current position as President and COO., from which €463 thousand were assigned in 2010, and as of this date, there are no other pension commitments with executive directors.

In addition, insurance premiums amounting to €92 thousand were paid on behalf of the non-executive members on the Board of Directors.

The provisions registered as of June 30, 2010 for pension commitments for the Management Committee members, excluding executive directors, amounted to €48,827 thousand. Of these, €3,586 thousand were assigned in 2010.

• TERMINATION OF THE CONTRACTUAL RELATIONSHIP.

There are no commitments as of June 30, 2010 for the payment of compensations to executive directors.

In the case of the President and COO, the provisions of his contract stipulate that in the event that he loses this position for any reason other than of his own will, retirement, invalidity or serious breach of duty, he will take early retirement with a pension that may be received as a life annuity or a capital sum equal to 75% of his pensionable salary if this should occur before he reaches 55 years of age, or 85% after this age.

57. DETAILS OF THE DIRECTORS' HOLDINGS IN COMPANIES WITH SIMILAR BUSINESS ACTIVITIES

Pursuant to the third paragraph of Article 127 the Spanish Corporations Act, introduced by Law 26/2003 of 17 July amending Securities Market Act 24/1988 of July 28, and the consolidated text of the Corporations Act passed by Royal Legislative Decree 1564/1989 of December 22, in order to reinforce the transparency of listed companies, there follows a list of the companies engaging in an activity that is identical, similar or complementary to that which constitutes the corporate purpose of BBVA, and in which the members of the Board of Directors have a direct or indirect ownership interest as of June 30, 2010. In no case do the members of the Board of Directors engage in executive or administrative functions at these companies.

58. OTHER INFORMATION

On March 15, 2002, the Bank of Spain initiated proceedings against BBVA and 16 of its former directors and executives, as a result of the existence of funds (approximately €25 million) belonging to BBV that were not included in the entity's financial statements until they were voluntarily regularized by being recognized in the 2000 consolidated income statement as non-recurrent income, for which the related corporation tax was recognized and paid. BBVA notified the Bank of Spain of these matters on January 19, 2001.

On May 22, 2002, the Board of the Spanish Securities and Exchange Commission (CNMV) commenced proceedings against BBVA for possible contravention of Article 99 ñ) of the Securities Market Act for the same events as those which gave rise to the proceedings initiated by the Bank of Spain.

The start of legal proceedings to determine possible criminal responsibility of the individuals involved in these events triggered the suspension of the above administrative proceedings until a definitive criminal judgment was issued. These criminal proceedings ended with a definitive court judgment in 2007, with none of those involved being convicted. The end of these criminal proceedings meant that the administrative proceedings could be re-opened. The Bank of Spain and the Spanish National Securities Market

Commission (CNMV) announced the lifting of the suspension to their proceedings on June 13, 2007 and July 26, 2007 respectively.

On July 18, 2008, the board of the Bank of Spain sanctioned BBVA with a fine of one million euros for a serious breach as typified in article 5.p) of the "Ley de Disciplina e Intervención de las Entidades de Crédito" (Law regulating the conduct of financial entities) and also imposed various sanctions on the managers and executives responsible for such conduct none of whom are presently members of the Board of Directors, or hold executive office at BBVA.

On July 18, 2008, the Ministry of Economy and Finance sanctioned the entity with a fine of two million euros, as a result of the proceeding initiated by the CNMV, for a very serious breach under Article 99 ñ) of the Stock Markets Act.

The Sixth Section of the Contentious Administrative Court of the National Court, in its rulings of May 19 and 25, 2010, deemed the contentious-administrative appeal lodged by BBVA against these resolutions appropriate and nullified the sanctions against the entity.

59. SUBSEQUENT EVENTS

Amendment of the Bank of Spain Circular 4/2004

On July 13, 2010, the Bank of Spain Circular 3/2010 of June 29 was published in the *Boletín Oficial del Estado* (BOE). The Circular introduced a modification to Circular 4/2004 with regard to hedging for impairment losses on credit risk (non-performing loan provisions) by Spanish credit institutions.

The Bank of Spain has modified and updated certain parameters established by Annex IX of said Circular to adjust them to the experience and information of the Spanish banking sector as a whole following the financial crisis of the past few years.

The modification to the Circular will enter into force on September 30, 2010. At the date of preparation of these consolidated interim financial statements, the Group is assessing the impact of this modification, which it anticipates will not be substantial; whatever the case, any such impact will be absorbed by the funds for impairment losses.

60. EXPLANATION ADDED FOR TRANSLATION TO ENGLISH

These accompanying consolidated financial statements are presented on the basis of IFRS's, as adopted by the European Union. Certain accounting practices applied by the Group that conform to EU-IFRS's may not conform with other generally accepted accounting principles.

APPENDIX X. Glossary

	The acquisition cost of the securities less accumulated amortizations, plus interest
Adjusted acquisition cost	The acquisition cost of the securities less accumulated amortizations, plus interest accrued, but not net of any other valuation adjustments.
Amortized cost	The amortized cost of a financial asset is the amount at which it was measured at initial recognition minus principal repayments, plus or minus, as warranted, the cumulative amount taken to profit or loss using the effective interest rate method of any difference between the initial amount and the maturity amount, and minus any reduction for impairment or change in measured value.
Assets leased out under operating lease	Lease arrangements that are not finance leases are designated operating leases.
Associates	Companies in which the Group is able to exercise significant influence, without having control. Significant influence is deemed to exist when the Group owns 20% or more of the voting rights of an investee directly or indirectly.
Available-for-sale financial assets	Available-for-sale (AFS) financial assets are debt securities that are not classified as held-to-maturity investments or as financial assets designated at fair value through profit or loss (FVTPL) and equity instruments that are not subsidiaries, associates or jointly controlled entities and have not been designated as at FVTPL.
Basic earnings per share	Calculated by dividing profit or loss attributable to ordinary equity holders of the parent by the weighted average number of ordinary shares outstanding during the period
Business combination	The merger of two or more entities or independent businesses into a single entity or group of entities.
Cash flow hedges	Derivatives that hedge the exposure to variability in cash flows attributable to a particular risk associated with a recognized asset or liability or a highly probable forecast transaction and could effect profit or loss.
Commissions and fees	Income and expenses relating to commissions and similar fees are recognized in the consolidated income statement using criteria that vary according to their nature. The most significant income and expense items in this connection are: • Feed and commissions relating linked to financial assets and liabilities measured at fair value through profit or loss, which are recognized when collected. • Fees and commissions arising from transactions or services that are provided over a period of time, which are recognized over the life of these transactions or services. • Fees and commissions generated by a single act are accrued upon execution of that act.
Contingencies	Current obligations arising as a result of past events, certain in terms of nature at the balance sheet date but uncertain in terms of amount and/or cancellation date, settlement of which is deemed likely to entail an outflow of resources embodying economic benefits.
Contingent commitments	Possible obligations that arise from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity.
Contingent risks	Transactions through which the entity guarantees commitments assumed by third parties in respect of financial guarantees granted or other types of contracts.
Current tax assets	Taxes recoverable over the next twelve months.
Current tax liabilities	Corporate income tax payable on taxable profit for the year and other taxes payable in the next twelve months.
Debt obligations/certificates	Obligations and other interest-bearing securities that create or evidence a debt on the part of their issuer, including debt securities issued for trading among an open group of investors, that accrue interest, implied or explicit, whose rate, fixed or benchmarked to other rates, is established contractually, and take the form of securities or book-entries, irrespective of the issuer.
Deferred tax assets	Taxes recoverable in future years, including loss carryforwards or tax credits for deductions and tax rebates pending application.
Deferred tax liabilities	Income taxes payable in subsequent years.
Defined benefit commitments	Post-employment obligation under which the entity, directly or indirectly via the plan, retains the contractual or implicit obligation to pay remuneration directly to employees when required or to pay additional amounts if the insurer, or other entity required to pay, does not cover all the benefits relating to the services rendered by the employees when insurance policies do not cover all of the corresponding post-employees benefits.
Defined contribution commitments	Defined contribution plans are retirement benefit plans under which amounts to be paid as retirement benefits are determined by contributions to a fund together with investment earnings thereon. The employer's obligations in respect of its employees current and prior years' employment service are discharged by contributions to the fund.
Deposits from central banks	Deposits of all classes, including loans and money market operations, received from the Bank of Spain and other central banks.
Deposits from credit institutions	Deposits of all classes, including loans and money market operations received, from credit entities.
Deposits from customers	Redeemable cash balances received by the entity, with the exception of debt certificates, money market operations through counterparties and subordinated liabilities, that are not received from either central banks or credit entities. This category also includes cash deposits and consignments received that can be readily withdrawn.

Diluted earnings per share	This calculation is similar to that used to measure basic earnings per share, except that the weighted average number of shares outstanding is adjusted to reflect the potential dilutive effect of any stock options, warrants and convertible debt instruments outstanding the year. For the purpose of calculating diluted earnings per share, an entity shall assume the exercise of dilutive warrants of the entity. The assumed proceeds from these instruments shall be regarded as having been received from the issue of ordinary shares at the average market price of ordinary shares during the period. The difference between the number of ordinary shares issued and the number of ordinary shares that would have been issued at the average market price of ordinary shares during the period shall be treated as an issue of ordinary shares for no consideration. Such shares are dilutive and are added to the number of ordinary shares outstanding in the calculation of diluted earnings per share.
Early retirements	Employees that no longer render their services to the entity but which, without being legally retired, remain entitled to make economic claims on the entity until they formally retire.
Economic capital	Eligible capital for regulatory capital adequacy calculations.
Effective interest rate	Discount rate that exactly equals the value of a financial instrument with the cash flows estimated over the expected life of the instrument based on its contractual period as well as its anticipated amortization, but without taking the future losses of credit risk into consideration.
Equity	The residual interest in an entity's assets after deducting its liabilities. It includes owner or venturer contributions to the entity, at incorporation and subsequently, unless they meet the definition of liabilities, and accumulated net profits or losses, fair value adjustments affecting equity and, if warranted, minority interests.
Equity instruments	An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities.
Equity method	The equity method is a method of accounting whereby the investment is initially recognized at cost and adjusted thereafter for the post-acquisition change in the Group's share of net assets of the investee, adjusted for dividends received and other equity eliminations.
Exchange/translation differences	Gains and losses generated by currency trading and the differences arising on translating monetary items denominated in foreign currency to the functional currency, exchange differences on foreign currency non-monetary assets accumulated in equity and taken to profit or loss when the assets are sold and gains and losses realized on the disposal of assets at entities with a functional currency other than the euro.
Fair value	The amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.
Fair value hedges	Derivatives that hedge the exposure of the fair value of assets and liabilities to movements in interest rates and/or exchange rates designated as a hedged risk.
Fees	See Commissions, fees and similar items
Financial guarantees	A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument, irrespective of its instrumentation. These guarantees may take the form of deposits, technical or financial guarantees, irrevocable letters of credit issued or confirmed by the entity, insurance contracts or credit derivatives in which the entity sells credit protection, among others.
Financial liabilities at amortized cost	Financial liabilities that do not meet the definition of financial liabilities designated at fair value through profit or loss and arise from the financial entities' ordinary activities to capture funds, regardless of their instrumentation or maturity.
Full consolidation	■ In preparing consolidated financial statements, an entity combines the balance sheets of the parent and its subsidiaries line by line by adding together like items of assets, liabilities and equity. Intragroup balances and transactions, including amounts payable and receivable, are eliminated in full. ■ Group entity income statement income and expense headings are similarly combined line by line into the consolidated income statement, having made the following consolidation eliminations: a) income and expenses in respect of intragroup transactions are eliminated in full. b) profits and losses resulting from intragroup transactions are similarly eliminated. ■ The carrying amount of the parent's investment and the parent's share of equity in
	each subsidiary are eliminated.
Gains or losses on financial assets and liabilities, net	each subsidiary are eliminated. This heading reflects fair value changes in financial instruments - except for changes attributable to accrued interest upon application of the interest rate method and asset impairment losses (net) recognized in the income statement - as well as gains or losses generated by their sale - except for gains or losses generated by the disposal of investments in subsidiaries, jointly controlled entities and associates an of securities classified as held to maturity.
Gains or losses on financial assets and liabilities, net Goodwill	each subsidiary are eliminated. This heading reflects fair value changes in financial instruments - except for changes attributable to accrued interest upon application of the interest rate method and asset impairment losses (net) recognized in the income statement - as well as gains or losses generated by their sale - except for gains or losses generated by the disposal of investments in subsidiaries, jointly controlled entities and associates an of securities classified as held to maturity. Goodwill acquired in a business combination represents a payment made by the acquirer in anticipation of future economic benefits from assets that are not able to be
	each subsidiary are eliminated. This heading reflects fair value changes in financial instruments - except for changes attributable to accrued interest upon application of the interest rate method and asset impairment losses (net) recognized in the income statement - as well as gains or losses generated by their sale - except for gains or losses generated by the disposal of investments in subsidiaries, jointly controlled entities and associates an of securities classified as held to maturity. Goodwill acquired in a business combination represents a payment made by the

	
Held for trading (assets and liabilities)	Financial assets and liabilities acquired or incurred principally for the purpose of selling or repurchasing them in the near term with a view to profiting from variations in their prices or by exploiting existing differences between their bid and ask prices. This category also includes financial derivatives not qualifying for hedge accounting, and in the case of borrowed securities, financial liabilities originated by the firm sale of financial assets acquired under repurchase agreements or received on loan ("short positions").
Impaired/doubtful/non-performing portfolio	Financial assets whose carrying amount is higher than their recoverable value, prompting the entity to recognize the corresponding impairment loss
Impaired financial assets	A financial asset is deemed impaired, and accordingly restated to fair value, when there is objective evidence of impairment as a result of one or more events that give rise to: 1. A measurable decrease in the estimated future cash flows since the initial recognition of those assets in the case of debt instruments (loans and receivables and debt securities). 2. A significant or prolonged drop in fair value below cost in the case of equity instruments.
Income from equity instruments	Dividends and income on equity instruments collected or announced during the year corresponding to profits generated by investees after the ownership interest is acquired. Income is recognized gross, i.e., without deducting any withholdings made, if any.
Insurance contracts linked to pensions	The fair value of insurance contracts written to cover pension commitments.
Inventories	Assets, other than financial instruments, under production, construction or development, held for sale during the normal course of business, or to be consumed in the production process or during the rendering of services. Inventories include land and other properties held for sale at the real estate development business.
Investment properties	Investment property is property (land or a building—or part of a building—or both) held (by the owner or by the lessee under a finance lease) to earn rentals or for capital appreciation or both, rather than for own use or sale in the ordinary course of business.
Jointly controlled entities	Companies over which the entity exercises control but are not subsidiaries are designated "jointly controlled entities". Joint control is the contractually agreed sharing of control over an economic activity or undertaking by two or more entities, or controlling parties. The controlling parties agree to share the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. It exists only when the strategic financial and operating decisions require unanimous consent of the controlling parties.
Leases	A lease is an agreement whereby the lessor conveys to the lessee in return for a payment or series of payments the right to use an asset for an agreed period of time, a stream of cash flows that is essentially equivalent to the combination of principal and interest payments under a loan agreement.
Liabilities associated with non-current assets held for sale	The balance of liabilities directly associated with assets classified as non-current assets held for sale, including those recognized under liabilities in the entity's balance sheet at the balance sheet date corresponding to discontinued operations.
Liabilities under insurance contracts	The technical reserves of direct insurance and inward reinsurance recorded by the consolidated entities to cover claims arising from insurance contracts in force at periodend.
Loans and advances to customers	Loans and receivables, irrespective of their type, granted to third parties that are not credit entities and that are not classified as money market operations through counterparties.
Loans and receivables	Financing extended to third parties, classified according to their nature, irrespective of the borrower type and the instrumentation of the financing extended, including finance lease arrangements where the consolidated subsidiaries act as lessors.
Minority interests	Minority interest is that portion of the profit or loss and net assets of a subsidiary attributable to equity interests that are not owned, directly or indirectly through subsidiaries, by the parent, including minority interests in the profit or loss of consolidated subsidiaries for the reporting period.
Mortgage-backed bonds	Fixed-income securities guaranteed with the mortgage loans for the issuing entity, which, in accordance with current legislation to that effect, are not subject to the issuance of mortgage bonds.
Non-current assets held for sale	A non-current asset or disposal group, whose carrying amount is expected to be realized through a sale transaction, rather than through continuing use, and which meets the following requirements: a) it is immediately available for sale in its present condition at the balance sheet date, i.e. only normal procedures are required for the sale of the asset. b) the sale is considered highly probable.
Other equity instruments	This heading reflects the increase in equity resulting from various forms of owner contributions, retained earnings, restatements of the financial statements and valuation adjustments.

Other financial assets/liabilities at fair value through profit or loss	 Assets and liabilities that are deemed hybrid financial assets and liabilities and for which the fair value of the embedded derivatives cannot be reliably determined. These are financial assets managed jointly with "Liabilities under insurance contracts" valued at fair value, in combination with derivatives written with a view to significantly mitigating exposure to changes in these contracts' fair value, or in combination with financial liabilities and derivatives designed to significantly reduce global exposure to interest rate risk.
	These headings include customer loans and deposits effected via so-called unit-linked
Own/treasury shares	life insurance contracts, in which the policyholder assumes the investment risk. The amount of own equity instruments held by the entity.
Personnel expenses	All compensation accrued during the year in respect of personnel on the payroll, under permanent or temporary contracts, irrespective of their jobs or functions, irrespective of the concept, including the current costs of servicing pension plans, own share based compensation schemes and capitalized personnel expenses. Amounts reimbursed by the state Social Security or other welfare entities in respect of employee illness are
Post-employment benefits	deducted from personnel expenses. Retirement benefit plans are arrangements whereby an enterprise provides benefits for
Property, plant and equipment/tangible assets	its employees on or after termination of service. Buildings, land, fixtures, vehicles, computer equipment and other facilities owned by the entity or acquired under finance leases.
Proportionate consolidation method	The venturer combines and subsequently eliminates its interests in jointly controlled entities' balances and transactions in proportion to its ownership stake in these entities. The venturer combines its interest in the assets and liabilities assigned to the jointly controlled operations and the assets that are jointly controlled together with other joint venturers line by line in the consolidated balance sheet. Similarly, it combines its interest in the income and expenses originating in jointly controlled businesses line by line in the consolidated income statement.
Provisions	Provisions include amounts recognized to cover the Group's current obligations arising as a result of past events, certain in terms of nature but uncertain in terms of amount and/or cancellation date.
Provision expenses	Provisions recognized during the year, net of recoveries on amounts provisioned in prior years, with the exception of provisions for pensions and contributions to pension funds which constitute current or interest expense.
Provisions for contingent exposures and commitments	Provisions recorded to cover exposures arising as a result of transactions through which the entity guarantees commitments assumed by third parties in respect of financial guarantees granted or other types of contracts, and provisions for contingent commitments, i.e., irrevocable commitments which may arise upon recognition of financial assets.
Provisions for pensions and similar obligation	Constitutes all provisions recognized to cover retirement benefits, including commitments assumed vis-à-vis beneficiaries of early retirement and analogous schemes.
Reserves	Accumulated net profits or losses recognized in the income statement in prior years and retained in equity upon distribution. Reserves also include the cumulative effect of adjustments recognized directly in equity as a result of the retroactive restatement of the financial statements due to changes in accounting policy and the correction of errors.
Securitization fund	A fund that is configured as a separate equity and administered by a management company. An entity that would like funding sells certain assets to the securitization fund, which, in turn, issues securities backed by said assets.
Share premium	The amount paid in by owners for issued equity at a premium to the shares' nominal value.
Short positions	Financial liabilities arising as a result of the final sale of financial assets acquired under repurchase agreements or received on loan.
Subordinated liabilities	Financing received, regardless of its instrumentation, which ranks after the common creditors in the event of a liquidation.
Subsidiaries	Companies which the Group has the power to control. Control is presumed to exist when the parent owns, directly or indirectly through subsidiaries, more than one half of an entity's voting power, unless, exceptionally, it can be clearly demonstrated that ownership of more than one half of an entity's voting rights does not constitute control of it. Control also exists when the parent owns half or less of the voting power of an entity when there is: - an agreement that gives the parent the right to control the votes of other shareholders; - power to govern the financial and operating policies of the entity under a statute or an
	agreement; power to appoint or remove the majority of the members of the board of directors or equivalent governing body and control of the entity is by that board or body; power to cast the majority of votes at meetings of the board of directors or equivalent governing body and control of the entity is by that board or body.
Tax liabilities	All tax related liabilities except for provisions for taxes.
Trading derivatives	The fair value in favor of the entity of derivatives not designated as accounting hedges.
Value at Risk (VaR)	Value at Risk (VaR) is the basic variable for measuring and controlling the Group's market risk. This risk metric estimates the maximum loss that may occur in a portfolio's market positions for a particular time horizon and given confidence level VaR figures are estimated following two methodologies: - VaR without smoothing, which awards equal weight to the daily information for the immediately preceding last two years. This is currently the official methodology for measuring market risks vis-à-vis limits compliance of the risk. - VaR with smoothing, which weights more recent market information more heavily. This is a metric which supplements the previous one. VaR with smoothing adapts itself more swiftly to the changes in financial market conditions, whereas VaR without smoothing is, in general, a more stable metric that will tend to exceed VaR with smoothing when the markets show less volatile trends, while it will tend to be lower when they present upturns in uncertainty.

BANCO BILBAO VIZCAYA ARGENTARIA, S.A. AND COMPANIES COMPOSING THE BANCO BILBAO VIZCAYA ARGENTARIA GROUP

MANAGEMENT REPORT ON THE SIX MONTHS PERIOD ENDED JUNE 30, 2010

1. THE BBVA GROUP

Banco Bilbao Vizcaya Argentaria, S.A. ("the Bank" or "BBVA") is a private-law entity governed by the rules and regulations applicable to banks operating in Spain and is the Parent of the financial group whose object is to engage directly or indirectly in activities, transactions, agreements and services relating to the banking business. The Bank conducts its business through branches and offices located throughout Spain and abroad.

The Banco Bilbao Vizcaya Argentaria Group ("the Group" or "the BBVA Group") is an internationally diversified financial group with a significant presence in traditional retail banking, asset management, private banking and wholesale banking.

The financial information included in this management report is presented in accordance with the criteria established by the International Financial Reporting Standards endorsed by the European Union ("IFRS-EU") and taking into account Bank of Spain Circular 4/2004 and its subsequent amendments.

2. THE ECONOMIC BACKGROUND FOR THE SIX MONTHS ENDED JUNE 30. 2010

The macroeconomic data published for the six months ended June 30, 2010 confirm that although the recovery is underway worldwide, there is still much uncertainty and the risk balance is weighted slightly to the downside. The Greek crisis and its transfer to other European sovereign debt in recent months has increased tension on the money and debt markets. The impact on the real economy, reflected in a moderation in the indices of consumer and business confidence, has yet to be fully felt. In addition, the implementation of fiscal adjustment and budget plans in a number of developed economies with high levels of debt and deficit, and tough monetary programs in emerging areas with problems of high growth levels and price tensions, could have a short-term effect on their capacity to grow and generate employment.

In the United States, following quarterly GDP growth of 0.7% in the first quarter of 2010, the indicators of economic activity and, to a lesser extent, those of demand, remain relatively positive. The labor market is still weak, but it is beginning to show signs of recovery, with the unemployment rate falling. Core inflation has been moving down since the end of last year. This gives some room for maneuver to the Federal Reserve, whose tone appears even more cautious as a result of the problems on the European debt markets.

In contrast, in Europe the pace of recovery is considerably gentler than in the United States. The slight GDP growth in the euro zone in the first quarter of 2010 confirms a scenario of slower growth than in the American economy. However, the indicators of economic activity, particularly in the industrial sector, were relatively more positive in the second quarter of 2010.

The Mexican economy is benefiting from the recovery in external demand in the United States, as this is the main destination of its exports. Growth forecasts for 2010 suggest this positive trend will continue.

Finally, economic activity in South America is continuing to strengthen as a result of the increase in foreign and domestic demand. More recently, domestic demand is also rising as a result of notable growth in credit. However, there are some risks, particularly those derived from an excessively high rate of growth and an upturn in prices. This suggests that the central banks in the region, may follow the path of some Asian economies and start a gradual move towards tougher monetary policies to ensure a more sustainable rate of growth, as is already the case in Brazil and Chile.

In terms of exchange rates, there has been a general appreciation of all the currencies that affect the Group's financial statements, except in the case of the Venezuelan strong bolivar, which a depreciation at the start of 2010. The appreciation in other currencies can be seen in both the final exchange rates and the average exchange rates (only the average exchange rate of the Argentinean peso against the euro has depreciated in year-on-year terms). Thus the impact is positive, both on the volume of business and balance sheet and on earnings, though less so in the latter case (an effect of around 1.3 percentage points).

	Average Excha	ange Rates	Year-End Exchange Rates		
Currency	June	June	June	December	
	2010	2009	2010	2009	
Mexican peso	16.8070	18.4481	15.7364	18.9222

Venezuelan bolivar	5.5512	2.8619	5.2700	3.0934	

3. SUMMARIZED INTERIM CONSOLIDATED INCOME STATEMENTS

The Group's summarized interim consolidated income statements for the six months ended June 30, 2010 and 2009, are as follows:

	Millions of Eur	os		
BBVA Group Interim Consolidated Income Statements	June 2010	June 2009	% Change	
NET INTEREST INCOME	6,937	6,858	1.2	
Dividend income	257	248	3.4	
Share of profit or loss of entities accounted for using the equity method	151	27	n.s	
Net fees and commissions	2,272	2,181	4.2	
Net gains (losses) on financial assets and liabilities and net exchange differences	1,123	799	40.0	
Other operating income and expenses	140	268	(47.9	
GROSS INCOME	10,880	10,380	4.	
Operating expenses	(4,380)	(4,088)	7.	
Personnel expenses	(2,364)	(2,291)	3.:	
General and administrative expenses	(1,651)	(1,443)	14.	
Depreciation and amortization	(365)	(354)	3.2	
OPERATING INCOME	6,500	6,292	3.	
Impairment losses on financial assets (net)	(2,419)	(1,945)	24.	
Provisions (net)	(270)	(153)	76.8	
NET OPERATING INCOME	3,811	4,195	(9.1	
Other gains (losses)	(160)	(192)	(16.7	
INCOME BEFORE TAX	3,651	4,003	(8.8	
Income tax	(941)	(961)	(2.1	
NET INCOME	2,710	3,042	(10.9	
Net income attributed to non-controlling interests	183	243	(24.7	
NET INCOME ATTRIBUTED TO PARENT COMPANY	2,527	2,799	(9.7	
Memorandum Item				
One-off operations NET INCOME ATTRIBUTED TO PARENT COMPANY (excluding	-	-		
one-off operatios)	2,527	2,799	(9.7	

The explanations of the changes in the principal items in the accompanying consolidated income statements are as follows:

- "Net interest income" for the six months ended June 30, 2010 totaled €6,937 million, an 1.2% increase over the €6,858 million recorded for the six months ended June 30, 2009. This increase is mainly due to pricing policies and the management of customer spreads, designed to transfer the greater cost of credit and liquidity risk to asset operations, contain the cost of funds and optimize their structure, and select products or segments with a greater risk-adjusted return. The increase is also due to the management of structural interest-rate and liquidity risks in the euro balance sheet, characterized by anticipation and governed by prudential criteria designed to generate a sound balance sheet, with a low level of leverage and reduced risk profile.
- The balance of "Dividend income" for the six months ended June 30, 2010 was €257 million, a 3.4% increase over the €248 million recorded for the six months ended June 30, 2009. This increase was the result of the increased dividends received from Telefónica. It was partly offset by the fact that the dividends of some Spanish companies, which were normally paid in January each year, were paid this time in December 2009.
- The balance of "Share of profit or loss of entities accounted for using the equity method" for the six months ended June 30, 2010 was €151 million, compared with €27million recorded for the six months ended June 30, 2009, mainly due to the increase in the contribution of China National Citic Bank (CNCB).
- The balance of "Net fees and commissions" the six months ended June 30, 2010 was €2,272 million, a 4.2% increase over the €2,181 million recorded for the six months ended June 30, 2009, due stable fees for mutual funds and pensions, and the increase of fees linked to banking services and asset custody.
- The balance of "Net gains (losses) on financial assets and liabilities and net exchange differences" for the six months ended June 30, 2010 was €1,123 million, a 40.6% increase over €799 million recorded for the six months ended June 30, 2009, due mainly to the positive effect of the devaluation of the bolivar on some positions and the management of COAP portfolios to adjust their duration and take advantage of market volatility in sovereign debt markets to make gains through the sale of certain financial instruments.
- The balance of "Other operating income and expenses" for the six months ended June 30, 2010 was €140 million, a 47.9% decrease of €268 million recorded for the six months ended June 30, 2009, mainly as a result of the adjustment for the hyperinflation in Venezuela. There was also an effect from the provision to deposit guarantee funds made in various countries in which the Group operates.

As a result, the balance of "**Gross income**" for the six months ended June 30, 2010 was €10,880 million, a 4.8% increase from €10,380 million for the six months ended June 30, 2009.

The balance of "Operating expenses" " for the six months ended June 30, 2010 amounted €4,380 million, a 7.1% increase compared with €4,088 million for the six months ended June 30, 2009, partly due to exchange-rate effects. This increase was also the result of greater rental costs following the sale and leaseback operation on properties in Spain carried out in September 2009; and on the positive outlook for the Group's business, which has maintained the transformation plans and boosted investment in growth plans that are being implemented in different units.

As a result of the foregoing, the **"Operating income"** for the six months ended June 30, 2010 was €6,500 million, a 3.3% increase from the 6,292 million recorded for the six months ended June 30, 2009.

- The balance of "Impairment losses on financial assets (net)" for the six months ended June 30, 2010 was €2,419 million, a 24.4% increase over the €1,945 million recorded for the six months ended June 30, 2009, mainly as a result of increased loan-loss provisions determined collectively which have been made to increase the Group's coverage.
- The balance of "**Provisions (net)**" for the six months ended June 30, 2010 was €270 million, an increase of 76.8% on the €153 million for the six months ended June 30, 2009, mainly due to greater provisions determined collectively for contingent exposures and commitments.
- The balance of "Other gains (losses)" for the six months ended June 30, 2010 was a loss of €160 million, a fall of 16.7% on the loss of €192 million for the six months ended June 30, 2009. This figure

includes the loan-loss provisions for foreclosures and real estate assets that have been carried out to maintain the coverage of these assets after the deterioration related to the real-estate business.

- As a result, the balance of "Income before tax" for the six months ended June 30, 2010 was €3,651 million, an increase of 8.8% over the €4,003 million for the six months ended June 30, 2009.
- The balance of "Income tax" for the six months ended June 30, 2010 was €941 million, a fall of 2.1% on the €961 million for the six months ended June 30, 2009. The slight increase was mainly due to the rise in the tax rate in Mexico starting as of January 1, 2010.

As a result, "**Net income** for the six months ended June 30, 2010 was €2,710 million, a fall of 10.9% on the €3,042 million for the six months ended June 30, 2009.

• "Net income attributed to non-controlling interests" for the six months ended June 30, 2010 was €183 million, a fall of 24.7% on the €243 million for the six months ended June 30, 2009, mainly due to the effect of the appreciation in the euro against foreign currencies.

Finally, the balance of "**Net income attributed to parent company**" for the six months ended June 30, 2010 was €2,527 million, a fall of 9.7% on the €2,799 million for the six months ended June 30, 2009.

Earnings per share (EPS) for the six months ended June 30, 2010 were €0.66 per share, a fall of 13.3% on the €0.76 per share for the six months ended June 30, 2009. The fall is greater than that registered in "Net income attributed to parent company", mainly due to the effect of the issue of convertible bonds in September 2009 (see Note 5).

Return on equity (ROE) for the six months ended June 30, 2010 was 17.9%, with a fall on the 21.5% for the six months ended June 30, 2009, but an increase on the figure of 16.0% at the close of 2009.

The **return on total average assets (ROA)** for the six months ended June 30, 2010 was 0.99%, less than the 1.12% for the six months ended June 30, 2009, but an increase on the figure of 0.85% at the close of 2009.

The **efficiency ratio** for the six months ended June 30, 2010 was 40.3%, compared with the figure of 39.4% for the six months ended June 30, 2009 and on the 40.4% at the close of 2009.

4. SUMMARIZED INTERIM CONSOLIDATED BALANCE SHEETS AND KEY OPERATIONAL FIGURES

The Group's summarized interim consolidated balance sheets as of June 30, 2010 and December 31, 2009 are as follows:

_	Millions of E	uros

TOTAL EQUITY	32,852	30,763	6.
TOTAL LIABILITIES AND EQUITY	568,917	535,065	6.:

- As of June 30, 2010, the "Total Group Assets" were €568,917 million, a 6.3% increase from the €535,065 million as of December 31, 2009. Exchange-rate movements have had a positive effect on the year-on-year comparison, as the appreciation of the main currencies in the currencies in which the Group operates (mainly dollars and Mexican pesos) against the euro more than offset the impact of the devaluation of the Venezuelan bolivar.
- As of June 30, 2010, the "Loans and receivables" balance was €361,766 million, a 4.5% increase over the €346,117 million recorded as of December 31, 2009. This change is basically the result of "Loans and advances to customers", which amounted to €339,259 million as of June 30, 2010, an increase of 4.9% over the €323,442 million as of December 31, 2009. In the second quarter, there appears to have been a change in the trend of declining business activity that started in 2007, as can be seen by the positive performance of the loans and receivables, with progress in practically all the business areas.
- As of June 30, 2010, the "Financial liabilities at amortized cost" balance was €466,329 million, an increase of 4.1% over the €447,936 million as of December 31, 2009. Specifically, "Customer deposits", which accounts for 55% of this heading, amounted to €257,830 million as of June 30, 2010, an increase of 1.4% over the €254,183 million as of December 31, 2009.
- As of June 30, 2010, total customer funds, both those on and off the balance sheet (customer deposits, debt certificates, subordinated liabilities, mutual funds, pension funds and customer portfolios) stood at €508,659 million, a very similar figure to the €509,104 million as of December 31, 2009. The funds on balance fell by 2.4%. However, funds off-balance increased 6.1%, due to the positive performance of pension fund assets.

5. BUSINESS PERFORMANCE: RESULTS AND ACTIVITY BY BUSINESS AREA

The breakdown of "Net income attributed to parent company" for the six months ended June 30, 2010 and for the six months ended June 30, 2009 by the different areas in the Group was as follows:

	Millions of Eu	Millions of Euros		
	June 2010	June 2009	% Change	
Spain and Portugal	1,186	1,212	(2.2	
Mexico	798	726	10.	
South America	453	421	7.0	
The United States	144	138	3.9	
WB&AM	532	477	11.4	
Corporate Activities	(586)	(175)	232.	
Total	2,527	2,799	(9.7	

The explanations for the changes in the income statement and the main figures on the balance sheet for each of the business areas are given below.

NPL Coverage Ratio	47.8%	47.7%	

The changes in the principal headings of the income statement in this business area were:

- "Net interest income" for the six months ended June 30, 2010 totaled €2,446 million, an increase of 0.6% from €2,432 million recorded for the six months ended June 30, 2009. This increase is mainly due to pricing policy and the management of customer spreads, designed to transfer the greater cost of credit and liquidity risk to asset operations and contain the cost of funds, as well as growing in products with a greater customer loyalty, such as residential mortgages and current and savings accounts.
- The balance of "Fee and commission income" for the six months ended June 30, 2010 was €719 million, a 4.8% decrease over the €756 million recorded for the six months ended June 30, 2009, in line with the continued weakness of banking activity and the moderate movement of funds in the reference market in the area.
- The balance of "Net gains (losses) on financial assets and liabilities and net exchange differences" for the six months ended June 30, 2010 was €102 million a 6.5% decrease over the €109 million recorded for the six months ended June 30, 2009, primarily in the context of a market that was more negative than 12 months earlier.
- The balance of "Other operating income and expenses" for the six months ended June 30, 2010 was €192 million, a 17.9% decrease compared with the €234 million for the six months ended June 30, 2009, also in line with the weakness mentioned in banking activity.

As a result, the "Gross income" for the six months ended June 30, 2010 was €3,460 million, a 2.0% decrease from €3,532 million for the six months ended June 30, 2009.

• The balance of "Operating expenses" for the six months ended June 30, 2010 was €1,260 million, a 1.5% decrease compared with the €1,279 million recorded for the six months ended June 30, 2009. In the last 12 months the area has reduced its staff by nearly 200 in Spain, and the number of offices in 122. It is important to note that the area has already carried out most of its transformation.

As a result of the foregoing, the **"Operating income"** for the six months ended June 30, 2010 was €2,200 million, a 2.3% decrease from of €2,252 million recorded for the six months ended June 30, 2009.

- The balance of "Impairment losses on financial assets (net)" for the six months ended June 30, 2010 was €501 million, similar to the figure of €504 million for the six months ended June 30, 2009.
- The balance of "**Provisions (net)**" and "**Other gains (losses)**" for the six months ended June 30, 2010 was €6 million, which compares with losses of €22 million recorded for the six months ended June 30, 2009.

As a result, the balance of "**Income before tax**" for the six months ended June 30, 2010 was €1,694 million, a 1.9% decrease over the €1,727 million recorded for the six months ended June 30, 2009.

• The balance of **Income tax**" for the six months ended June 30, 2010 was €508 million, compared with €515 million for the six months ended June 30, 2009, a year-on-year fall of 1.3%.

As a result, "**Net income**" for the six months ended June 30, 2010 was €1,186 million, a fall of 2.2% on the €1,212 million for the six months ended June 30, 2009.

The changes in the principal headings of activity in this area of business were as follows:

- As of June 30, 2010, the "Loan and advances to customers (gross)" balance was €207,082 million, up 0.1% on the €206,909 million as of December 31, 2009, breaking a series of several quarters of falls. BBVA continues to grow in mortgage lending to the household segment and is growing selectively in the corporate segment.
- As of June 30, 2010, the NPL ratio in Spain for residential mortgage loans was 3.0%, compared with 2.9% at the close of 2009. As of June 30, 2010, the NPL ratio in Spain for developer's mortgage loans was 16.9% (17.01% at the close of 2009). However, without taking into account doubtfuls (customers who at the date of these financial statements were not in doubtfuls or default, but showed impaired risks) it would have been only 10.1%. Mortgage loans to developers only represent 7.7% of loans in the area of Spain and Portugal, and are 50% guaranteed with completed homes, 21% with work underway and only 29% with land. In addition, the coverage of these loans is much higher than the value of the debt pending collection.
- As of June 30, 2010, total customer funds, both on-balance and off-balance, including mutual funds, pension funds and deposits, were €139,055 million, a 4.2% decrease from the €154,154 million recorded as of December 31, 2009, due primarily to the drop off-balance funds as a result of the negative performance of the markets, particularly in the second quarter of 2010.

A year-on-year comparison of the financial statements for this area is skewed by the appreciation of the Mexican peso with respect to the euro, both in terms of period-end and average exchange rates; hence, for the most important figures, the percentage change against a constant exchange rate is indicated.

The changes in the principal headings of the income statement in this business area were:

- The balance of "Net interest income" for the six months ended June 30, 2010 was €1,817 million, an increase of 7.8% over the €1,686 million recorded for the six months ended June 30, 2009. This increase is mainly due to the exchange-rate effect mentioned above (at constant exchange rates there would have been a fall of 1.8%).
- The balance of "Net fees and commissions" for the six months ended June 30, 2010 was €596 million, an increase of 11.3% over the €535 million recorded for the six months ended June 30, 2009, primarily as a result of the exchange-rate effect mentioned above (at constant exchange rates the increase would have been 1.4%, and it is due to greater fees charged in the pension fund administration business- Afore BBVA Bancomer and the activity in investment companies).
- The balance of "Net gains (losses) on financial assets and liabilities and net exchange differences for the six months ended June 30, 2010 was €223 million, an increase of 5.3% over the €221 million recorded for the six months ended June 30, 2009, primarily as a result of market the exchange-rate

effect mentioned above (at constant exchange rates there would have been a fall of 4.0% due basically to market volatility).

• The balance of "Other income/expenses" for the six months ended June 30, 2010 was €79 million, a 23.6% increase from the €64 million recorded for the six months ended June 30, 2009, mainly due to growth in the insurance business.

As a result of the foregoing, "**Gross income**" for the six months ended June 30, 2010 amounted €2,725 million a 8.7% increase from the €2,506 million recorded for the six months ended June 30, 2009 (a fall of 1.0% at constant exchange rates).

• The balance of "Operating expenses" for the six months ended June 30, 2010 was €930 million, an increase of 18.1% over the €787 million recorded for the six months ended June 30, 2009 (+7.6% at constant exchange rates), mainly due to the growth and transformation plan for the next three years.

As a result of the foregoing, the "**Operating income**" for the six months ended June 30, 2010 was €1,795 million, an increase of 4.4% over the €1,719 million recorded for the six months ended June 30, 2009 (-4.9% at constant exchange rates).

- The balance of "Impairment losses on financial assets (net)" for the six months ended June 30, 2010 was down by 11.3% to €656 million, compared to the €740 million recorded for the six months ended June 30, 2009, mainly due to signs of recovery in economic conditions in Mexico.
- The balance of "**Provisions (net)**" and "**Other gains (losses)**" for the six months ended June 30, 2010 was a loss of €39 million, compared with a loss of €15 million for the six months ended June 30, 2009, mainly due to provisions for credit-card fraud.

As a result of the foregoing, the "**Income before tax**" for the six months ended June 30, 2010 was €1,100 million, an increase of 14.1% over the €964 million recorded for the six months ended June 30, 2009.

• The balance of "Income tax" for the six months ended June 30, 2010 was €300 million, an increase of 26.7% over the €237 million recorded for the six months ended June 30, 2009, mainly due to the increase in the tax rate in Mexico starting as of January 1, 2010.

As a result, "**Net income**" for the six months ended June 30, 2010 was €800 million, an increase of 10.0% over the €727 million recorded for the six months ended June 30, 2009.

"Net income attributed to parent company" for the six months ended June 30, 2010 was €798 million, also up 10.0% over the €726 million recorded for the six months ended June 30, 2009, mainly due to the exchange-rate effect already mentioned, as without this effect on the currency the increase would have been only 0.2%.

The changes in the principal headings of activity in this area of business were as follows:

- As of June 30, 2010, the balance of "Loans and advances to customers (gross)" amounted to €35.648 million, 22.9% more than the €28,996 million as of December 31, 2009, mainly due to the exchange-rate effect mentioned above (at constant exchange rates the increase would have been 2.2%).
- As of June 30, 2010, total customer funds, both on-balance and off-balance, including mutual funds, pension funds and other funds, amounted to €67,215 million, an increase of 24.2% over the €54,098 million as of December 31, 2009, due primarily to the exchange-rate effect (at a constant exchange rate the increase would have been 3.3%).

The year-on-year comparison of the financial statements in the area is affected by the devaluation of the Venezuelan strong bolivar against the euro, and by the appreciation of the Argentinean peso in average exchange rates. The rest of the currencies were appreciated, in period-end and average exchange rates. For the most important transactions, a reference is given to the percentage change at constant exchange rates.

The changes in the principal headings of the income statement in this business area were:

- The balance of "Net interest income" for the six months ended June 30, 2010 was €1,197 million, a 3.0% decrease compared with the €1,235 million recorded for the six months ended June 30, 2009. This fall is mainly due to the exchange-rate effect (at constant exchange rates there would have been an increase of 12.3%, mainly as a result of increased volume of customer finance during the period in all geographical regions of this business area.
- The balance of "**Net fees and commissions**" for the six months ended June 30, 2010 was €457 million, a 7.0% increase of on the €427 million for the six months ended June 30, 2009, due basically to fees charged for transactional services, and the incipient recovery of fees related to securities and the wholesale businesses.
- The balance of "Net gains (losses) on financial assets and liabilities and net exchange differences" for the six months ended June 30, 2010 was €277 million, an increase of 4.8% over the €265 million recorded for the six months ended June 30, 2009, primarily as a result of the valuation of U.S. dollar positions from Venezuela due to the devaluation of the Venezuelan strong bolivar and the appreciation of the dollar against the euro.

• The balance of "Other operating income and expenses" for the six months ended June 30, 2010 was a loss of €87 million, a 14.5% decrease compared to the loss €102 million recorded for the six months ended June 30, 2009. This heading includes the adjustment for hyperinflation in Venezuela.

As a result of the foregoing, the balance of "Gross income" for the six months ended June 30, 2010 was €1,844 million, an increase of 1.1% over the €1,824 million recorded for the six months ended June 30, 2009.

• The balance of "Operating expenses" for the six months ended June 30, 2010 was €785 million, an increase of 2.8% over the €763 million recorded for the six months ended June 30, 2009, mainly due to the exchange-rate effect mentioned above (at constant exchange rates the increase would have been 12.2%). However, this increase is below the average rate of inflation in the countries in the region.

As a result of the foregoing, the "**Operating income**" for the six months ended June 30, 2010 was €1,059 million, slight fall of 0.2% over the €1,061 million recordedfor the six months ended June 30, 2009 (at constant exchange rates there would have been a rise of 4.6%).

- The balance of "Impairment losses on financial assets (net)" for the six months ended June 30, 2010 was €214 million, an increase of 0.4% on the €215 million recorded for the six months ended June 30, 2009, as the recovery in the economy is not leading to lower quality assets in the area.
- The balance of "Provisions (net)" and "Other gains (losses)" for the six months ended June 30, 2010 was €13 million of various provisions, compared to a net of -€8 million for the six months ended June 30, 2009

As a result of the foregoing, "Income before tax" for the six months ended June 30, 2010 amounted to €832 million, a slight fall of 0.8% compared with €839 million for the six months ended June 30, 2009, due to exchange-rate movements, as without their effect the growth would have been 6.5%.

• The balance of "Income tax" for the six months ended June 30, 2010 was €185 million, a fall of 8.6% on the €203 million for the six months ended June 30, 2009.

The balance of "**Net income**" for the six months ended June 30, 2010 was €647 million, an increase of 1.7% over the €636 million recorded for the six months ended June 30, 2009 (at constant exchange rates the increase would have been 10.1%).

• "Net income attributed to non-controlling interests" for the six months ended June 30, 2010 was €194 million, a fall of 9.7% on the €214 million for the six months ended June 30, 2009, mainly due to the exchange rate (at constant exchange rates the increase would have been 4.0%).

In all, the "**Net income attributed to parent company**" for the six months ended June 30, 2010 was €453 million, an increase of 7.6% on the figure of €421 million for the six months ended June 30, 2009 (at constant exchange rates the increase would have been 12.9%).

The changes in the principal headings of activity in this area of business were as follows:

- As of December 31, 2009, the "*Loan and advances to customers (gross)*" balance was €28,783 million, up 9.8% on the figure of €26,223 million as of December 31, 2009, due to the recovery in the economy that has taken place so far in 2010.
- As of June 30, 2010, total customer funds, both on-balance and off-balance, including mutual funds, pension funds and other funds, amounted to €80,173 million, an increase of 15.3% on the €70,248 million as of December 31, 2009, due primarily to the positive performance of assets in mutual funds, and above all in pension funds. There was also a positive performance in lower-cost balance-sheet funds, such as current and savings accounts.

The dollar has appreciated against the euro at the period-end exchange rates, but it has remained at practically the same levels for the last year at the average rates. This has resulted in a slightly positive exchange-rate effect in the figures on the income statement and more significant in business activity.

Another important event took place as of August 21, 2009, when BBVA Compass bought certain assets and liabilities of Guaranty Bank (Guaranty) from the Federal Deposit Insurance Corporation (FDIC). The purchase of Guaranty provided the Group with \$7,500 million in loans and receivables and \$11,400 million in customer funds.

Considering the above, the changes in the principal headings of income statement of this business area were:

- The balance of "Net interest income" for the six months ended June 30, 2010 was €919 million, an increase of 11.7% over the €823 million recorded for the six months ended June 30, 2009, mainly due to the increase in volume of business resulting from the acquisition of the assets and liabilities of Guaranty Bank, as mentioned above.
- The balance of "**Net fees and commissions**" for the six months ended June 30, 2010 was €334 million, an increase of 9.3% over the €306 million recorded for the six months ended June 30, 2009, also due to the integration of Guaranty.
- The balance of "Net gains (losses) on financial assets and liabilities and net exchange differences" for the six months ended June 30, 2010 was €72 million, a fall of 18.5% over the €88 million recorded for the six months ended June 30, 2009, primarily as a result of falling activity.

• The balance of "Other operating income and expenses" for the six months ended June 30, 2010 was a loss of €19 million, a fall of 16.8% compared with the loss of €23 million for the six months ended June 30, 2009, due to a reduction in allocations to the deposit guarantee fund in the United States.

As a result, the balance of "Gross income" for the six months ended June 30, 2010 was €1,306 million, an increase of 9.4% over the €1,194 million recorded for the six months ended June 30, 2009.

• The balance "Operating expenses" for the six months ended June 30, 2010 was €751 million, an increase of 10.9% over the €677 million recorded for the six months ended June 30, 2009, mainly due to the acquisition of Guaranty Bank mentioned above.

As a result of the foregoing, the "Operating income" for the six months ended June 30, 2010 was €555 million, an increase of 7.4% over the €516 million recorded for the six months ended June 30, 2009.

- The balance of "Impairment losses on financial assets (net)" for the six months ended June 30, 2010 was €336 million, an increase of 14.7% over the €293 million recorded for the six months ended June 30, 2009, due mainly to the increase in impaired assets arising from the economic situation. However, it is important to note that the rate of growth of this item is slowing if compared with a year previously.
- The balance of "**Provisions (net)**" and "**Other gains (losses)**" for the six months ended June 30, 2010 was of provisions of €17 million, a fall of 20% on the provisions of €20 million for the six months ended June 30, 2009.

As a result of the foregoing, the balance of "**Income before tax**" for the six months ended June 30, 2010 was €202 million, a fall of 0.3% over the €203 million for the six months ended June 30, 2009.

• The balance of "**Income tax**" for the six months ended June 30, 2010 was €58 million, a fall of 9.2% on the €64 million for the six months ended June 30, 2009.

In all, the "**Net income attributed to parent company**" for the six months ended June 30, 2010 was €144 million, an increase of 3.9% on the figure of €138 million for the six months ended June 30, 2009 (at constant exchange rates the increase would have been a fall of 2.1%).

The changes in the principal headings of activity in this area of business were as follows:

- As of June 30, 2010, the balance of "Loans and advances to customers (gross)" amounted to
 €45,270 million, 10.1% more than the €41,122 million as of December 31, 2009, mainly due to the
 exchange-rate movements since then (at constant exchange rates there would have been a fall of
 6.2%).
- As of June 30, 2010, total customer funds were €56,682 million, a fall of 7.0% compared with the figure of €60,963 million as of December 31, 2009, due mainly to the maturity of some deposit certificates.

NPL Coverage Ratio	60.4%	47.7%		

The changes in the principal headings of the income statement in this business area were:

- "Net interest income" and "Net income from financial operations and net exchange differences" should be examined together for the purposes of management due to offsets between the two in given market transactions. The aggregate balance of these two items for the six months ended June 30, 2010 was €456 million, a 14.2% decrease from the €532 million recorded for the six months ended June 30, 2009. This fall is mainly due to an environment of high market volatility, which has led to worse trading income as credit spreads narrowed in the south of Europe, despite the good performance of commercial activity with customers in Global Markets.
- The balance of "Net fees and commissions" for the six months ended June 30, 2010 was €258 million, an increase of 9.7% over the €235 million recorded for the six months ended June 30, 2009, mainly because activity in the area has been focused on customers with a high business potential.
- The balance of "Other operating income and expenses" for the six months ended June 30, 2010 was €220 million, an increase of 60.1% on the €137 million for the six months ended June 30, 2009, mainly due to the earnings from banks accounted for using the equity method (the increased holding in China National Citic Bank (CNCB)).

As a result, the balance of "Gross income" for the six months ended June 30, 2010 was €934 million, an increase of 3.3% over the €904 million recorded for the six months ended June 30, 2009.

• The balance of "Operating expenses" for the six months ended June 30, 2010 was €244 million, an increase of 4.0% over the €234 million for the six months ended June 30, 2009.

As a result of the foregoing, the **"Operating income"** for the six months ended June 30, 2010 was €690 million, an increase of 3.0% on the figure of €670 million for the six months ended June 30, 2009.

- The balance of "Impairment losses on financial assets (net)" for the six months ended June 30, 2010 was €11 million, with a 13.0% decrease from the €13 million recorded for the six months ended June 30, 2009, due mainly to reduced lending, as well as a focus on customers with a higher credit quality.
- The balance of "**Provisions (net)**" and "**Other gains (losses)**" for the six months ended June 30, 2010 was a recovery of €2 million.

As a result of the foregoing, the balance of "Income before tax" for the six months ended June 30, 2010 was €681 million, an increase of 3.7% over the €657 million recorded for the six months ended June 30, 2009.

• The balance of "Share of profit or loss of entities accounted for using the equity method" for the six months ended June 30, 2010 was €149 million, a fall of 15.9% over the €177 million recorded for the six months ended June 30, 2009, due to the favorable tax effect from the result of entities accounted for using the equity method.

In all, both the "**Net income**" and the "**Net income attributed to parent company**" " for the six months ended June 30, 2010 was €532 million. This was an increase of 10.9% over €480 million recorded for the six months ended June 30, 2009 in the case of net income, and of 11.4% on €477 million for net income attributed to parent company.

The changes in the principal headings of activity in this area of business were as follows:

- As of June 30, 2010, the "Loans and advances to customers (gross)" balance was €32,502 million, an increase of 4.6% from €31,058 million recorded as of December 31, 2009. The increase was extremely focused on the Corporate and Investment Banking unit, which concentrates on customers with a high credit quality, with whom commercial relations are being fostered.
- As of June 30, 2010, total customer funds, both those included on the balance and off-balance funds (comprising mutual funds, pension funds and other funds), were €42,705 million a 2.8% decrease on the €43,926 million as of December 31, 2009, due primarily to the high rate of maturities in some funds and difficult market conditions.

Corporate Activities

NET INCOME ATTRIBUTED TO PARENT COMPANY	(586)	(176)	232.1

The changes in the principal headings of the income statement in this business area were:

- The balance of "Net interest income" for the six months ended June 30, 2010 was €138 million, a 25.6% decrease from the €186 million recorded for the six months ended June 30, 2009. This fall is mainly due to the exhaustion of decline in interest rates in the euro zone.
- The balance of "**Net fees and commissions**" for the six months ended June 30, 2010 was -€91 million, an increase of 17.8% in fees, compared with the figure of -€77 million for the six months ended June 30, 2009.
- The balance of "Net gains (losses) on financial assets and liabilities and net exchange differences" for the six months ended June 30, 2010 was €401 million, compared with €79 million recorded for the six months ended June 30, 2009, primarily as a result of rotation in the sovereign bond portfolio, taking advantage of the volatile markets to achieve results.
- The balance of "Other operating income and expenses" for the six months ended June 30, 2010 was €163 million, a 30.1% decrease over the €233 million recorded for the six months ended June 30, 2009.

As a result of the foregoing, the balance of "Gross income" for the six months ended June 30, 2010 was €611 million, an increase of 45.3% over the €420 million recorded for the six months ended June 30, 2009.

• The balance "Operating expenses" for the six months ended June 30, 2010 was €410 million, an increase of 18.3% on the €346 million recorded for the six months ended June 30, 2009, mainly due to the costs of developing the new technological platform.

As a result of the foregoing, the **"Operating income"** for the six months ended June 30, 2010 was €201 million compared with the €74 million recorded for the six months ended June 30, 2009.

- The balance of "Impairment losses on financial assets (net)" for the six months ended June 30, 2010 was €701 million, compared with €181 million recorded for the six months ended June 30, 2009, mainly as a result of increased loan-loss provisions determined collectively thanks to the Group's operating result, with the goal of continuing to improve BBVA's coverage.
- The balance of "Provisions (net)" and "Other gains (losses)" for the six months ended June 30, 2010 amounted to -€358 million, an increase of 27.9% on the -€280 million recorded for the six months ended June 30, 2009, mainly due to continuing provisions for foreclosed assets and real estate assets designed to maintain coverage at an adequate level.

As a result of the foregoing, the balance of "Income before tax" for the six months ended June 30, 2010 was €858 million, compared with a loss of €386 million recorded for the six months ended June 30, 2009.

• The balance of "**Income tax**" for the six months ended June 30, 2010 was €260 million, compared with €235 million recorded for the six months ended June 30, 2009.

As a result, "**Net income**" for the six months ended June 30, 2010 was a loss of €598 million, compared with a loss of €151 million recorded for the six months ended June 30, 2009.

• The "Net income attributed to non-controlling interests" for the six months ended June 30, 2010 was €12 million, compared with a loss of €25 million recorded for the six months ended June 30, 2009.

Finally, the balance of "**Net income attributed to parent company**" for the six months ended June 30, 2010 was a loss of €586 million, compared with a loss of €176 million recorded for the six months ended June 30, 2009.

6. RISK EXPOSURE

The BBVA Group's system of risk management and risk exposure is described in Note 7 "Risk exposure" in the accompanying interim consolidated financial statements.

Exposure to subprime credit risk

The application across the BBVA Group of prudent risk policies has resulted in very limited exposure to subprime credit risk with respect to mortgage loans, mortgage-backed securities and other securitized financial instruments originated in the United States.

The Group's banks have not originated risk products specifically for the subprime segment. However, the financial crisis that began in the United States in 2007, and the consequent decline in economic conditions and increased inability to pay on the part of certain borrowers, has implied a downgrade in their respective credit ratings. It is important to note, however, that the classification of a financial instrument as a subprime credit risk does not necessarily signify that such financial instrument is either past due or impaired or that we have not assigned such financial instrument a "high" or "very high" estimate of recoverability.

As of June 30, 2010, the amount of home mortgage credit risk transactions corresponding to customers in the United States whose credit quality had dropped below the "subprime" level totaled €592 million, 0.17% of the Group's total customer credit risk (€513 million and 0.16% respectively as of December 31, 2009). Of this amount, as of June 30, 2010, only €65 million were past due or impaired (€66 million as of December 31, 2009).

In addition, as of June 30, 2010, the net carrying amount of structured credit instruments with underlying subprime assets amounted to €14 million (see Note 8), of which 83% have a high credit rating from the main rating agencies operating in the market (€13 million and 85% respectively, as of December 31, 2009).

Structured credit instruments

As of June 30, 2010, the carrying amount of structured credit instruments in the Group was €3,644 million, of which the majority is guaranteed by agencies and insurance companies. Of this total, €171 million were recognized under "Financial assets held for trading", €361 million under "Financial instruments at fair value through profit or loss" and €3,112 million under "Available for sale financial assets".

The valuation methods of this kind of financial product are described in Note 8, "Fair value of financial instruments" in the accompanying consolidated financial accounts.

7. THE GROUP'S CAPITAL BASE

The BBVA Group's **capital base**, calculated according to rules defined in accordance with the **Basel II** capital accord, was €39,286 million as of June 30, 2010, 0.4% down on the figure as of December 31, 2009, mainly due to the greater contribution of Core Capital.

The risk-weighted assets (APR) have increased 6.4% over the period to €309,617 million as of June 30, 2010, due mainly to the appreciation of currencies on the Group's non-euro positions. Excess of capital resources over the 8.0% of risk-weighted assets required by the regulation stood at €14,517 million.

Core capital as of June 30, 2010 stood at €24,929 million, more than €1,738 million higher than the figure as of December 31, 2009, due primarily to withheld attributable profit, which has absorbed the impact of the purchase of the additional share of CNCB during the half year. It represents 8.1% of risk-weighted assets, compared to 8.0% as of December 31, 2009.

Adding preference shares to core capital, Tier I as of June 30, 2010 stood at €28,351 million, 9.2% of the risk-weighted assets. This is a fall of 20 basis points on the figure as of December 31, 2009. Preference shares amount to 18.4% of the total core capital (Tier I).

Other eligible capital (Tier II) mainly consists of subordinated debt, latent capital gains and excess generic provisions up to the limit set forth in the regulations. At June 30, 2010, Tier II stood at €10,935 million, i.e. 3.5% of risk-weighted assets. The changes in Tier I and Tier II can basically be explained by the increase in deductions in the holdings in financial institutions due to purchase of the additional holding in CNCB and the reduction in latent gains as a result of the behavior of the financial markets during the period.

Aggregating Tier I and Tier II, as of June 30, 2010, gives a **BIS** total capital ratio of 12.7%, compared with 13.6% as of December 31, 2009.

8. COMMON STOCK AND TREASURY STOCK

Information about common stock and transactions with treasury stock are shown in Notes 27 and 30 in the accompanying interim consolidated financial statements.

9. APPLICATION OF EARNINGS

Information about application of earnings is broken down in Note 4 in the accompanying interim consolidated financial statements.

10. CORPORATE GOVERNANCE

In accordance with the provisions of Article 116 of the Spanish Securities Market Act, the BBVA Group has prepared the Annual Corporate Governance Report for 2009, following the content guidelines set down in Order ECO 3722/2003 dated December 26 and in the CNMV Circular 4/2007, dated December 27, including a section detailing the degree to which the Bank is compliant with existing corporate governance recommendations in Spain.

In addition, all the disclosure required by article 117 of the Spanish Securities Market Law, as enacted by Law 26/2003 and by Order ECO 3722/2003 dated December 26, can be accessed on BBVA's webpage at www.bbva.es in the section entitled "Corporate Governance.

11. SUBSEQUENT EVENTS

Amendment of the Bank of Spain Circular 4/2004

As of July 13, 2010, the Bank of Spain Circular 3/2010 of June 29 was published in the *Boletín Oficial del Estado* (BOE). The Circular introduced a modification to Circular 4/2004 with regard to hedging for impairment losses on credit risk (non-performing loan provisions) by Spanish credit institutions.

The Bank of Spain has modified and updated certain parameters established by Annex IX of said Circular to adjust them to the experience and information of the Spanish banking sector as a whole following the financial crisis of the past few years.

The modification to the Circular will enter into force as of September 30, 2010. At the date of preparation of these consolidated interim financial statements, the Group is assessing the impact of this modification, which it anticipates will not be substantial; whatever the case, any such impact will be absorbed by the funds for impairment losses.
