

**TO CNMV (SPANISH SECURITIES
EXCHANGE COMMISSION)**

Banco Bilbao Vizcaya Argentaria, S.A. (BBVA), pursuant to the provisions of the Spanish Securities Market Act, hereby proceeds by means of the present document to notify the following

RELEVANT EVENT

BBVA notes the announcements made today by the European Banking Authority (EBA) and competent National Supervisor regarding the capital exercise, which demonstrate the following result for BBVA:

The capital exercise proposed by the EBA and agreed by the Council on October the 26th 2011 requires banks to strengthen their capital positions by building up a temporary capital buffer against sovereign debt exposures to reflect current market prices. In addition, it requires them to establish a buffer such that the Core Tier 1 capital ratio reaches a level of 9% by the end of June 2012. The amount of any final capital buffer identified is based on September 2011 figures, and constitutes an exceptional and temporary buffer. The amount of the sovereign capital buffer will not be revised.

Following completion of the capital exercise conducted by the European Banking Authority, in close cooperation with the competent national authority, and conducted to 71 banks across Europe, the exercise has determined that for BBVA:

The final quantification of the capital buffer as of September 2011, in line with BBVA's estimation after the preliminary release, is €6,329 mn which must be addressed by end June 2012. Of this buffer, €2,313 mn corresponds to the sovereign buffer.

BBVA will ensure that by the end of June 2012 the bank will adhere to the 9% Core Tier 1 capital ratio and, to this end, submit a plan to the national supervisory authority. In this plan the bank will set out the proposed mix of actions to meet the required 9% target thereby bringing the extra buffer required to zero by June 2012. The plan – to be submitted by January the 20th 2012 – will be discussed with the national competent authorities, in consultation with the relevant college of supervisors and the EBA.

BBVA has already adopted measures to address the capital buffer required by the EBA. Amid them, the exchange offer of preferred shares for mandatory convertibles announced on November the 22nd. In addition, BBVA will meet the requirements established by the EBA through a combination of organic capital generation and other measures of balance-sheet management. As stated in the relevant event released on October the 27th 2011, BBVA rules out in any case the use of public support.

Notes

Find attached detailed information of the results of the EBA exercise. Further information could also be consulted on the EBA website (www.eba.europa.eu).

Composition of capital as of 30 September 2011 (CRD3 rules)

Name of the bank:

F) Hybrid instruments not subscribed by government	5,157		Net amount included in T1 own funds (COREP line 1.1.4.1a + COREP lines from 1.1.2.2***01 to 1.1.2.2***05 + COREP line 1.1.5.2a (negative amount)) not subscribed by government
Tier 1 Capital (E+F) (Total original own funds for general solvency purposes)	31,136	9.34%	COREP CA 1.4 = COREP CA 1.1 + COREP CA 1.3.T1* (negative amount)
RWA as of end September 2011 including add-on for CRD3 ⁽²⁾	333,283		
Of which: RWA add-on for CRD III as of end September 2011 ⁽²⁾	7,722		
Sovereign Capital buffer			
G) Prudential filter (AFS sovereign assets in EEA as of 30th September 2011) (-/+)	878		Please report the prudential filter as a positive number if the AFS revaluation reserve for sovereign assets is negative. Please report the prudential filter as a negative number if the AFS revaluation reserve is positive. If the bank does not apply a prudential filter on AFS sovereign assets, please fill in zero.
H) Difference between the book value and the fair value of sovereign assets (Bonds and Loans and advances) in the HTM and Loans & Receivables portfolios (3).	1,435		Difference between the book value and the fair value at the reference date. Please provide a positive number if the book value is larger than the fair value of sovereign assets. Please provide a negative number if the book value is smaller than the fair value of the sovereign assets.
Sovereign capital buffer for exposures in EEA (G+H)	2,313	0.69%	Sum of Prudential filter and valuation. If negative it is set to 0
Overall Shortfall after including sovereign capital buffer	6,329	1.90%	9%RWA-(Core Tier 1 including existing government support measures-Sovereign capital buffer for exposures in EEA); if >0.

Notes and definitions

(1) The amount is already included in the computation of the eligible capital and reserves and it is provided separately for information purposes.

(2) According with CRD3 it can include also 50% securitisation exposures in the trading book subject to 1250% risk weight and not included in RWA.

(3) It includes also possible differences between the book value and the fair value of: i) direct sovereign exposures in derivatives; ii) indirect sovereign exposures in the banking and trading book

Exposures to sovereigns (central, regional and local governments) in EEA, as of 30 September 2011, mln EUR

Notes and definitions

(1) The exposures reported cover only exposures to central, regional and local governments on immediate borrower basis, and do not include exposures to other counterparties with full or partial government guarantees

(2) The banks disclose the exposures in the "Financial assets held for trading" portfolio after offsetting the cash short positions having the same maturities.

(3) The exposures reported include the positions towards counterparties (other than sovereign) on sovereign credit risk (i.e. CDS, financial guarantees) booked in all the accounting portfolio (on-off balance sheet). Irrespective of the denomination and or accounting classification of the positions the economic substance over the form must be used as a criteria for the identification of the exposures to be included in this column. This item does not include exposures to counterparties (other than sovereign) with full or partial government guarantees by central, regional and local governments

(4) According with CEBS Guidelines on prudential filters it is required a consistent treatment of gains and losses resulting from a transaction whereby a cash flow hedge is created for an available for sale instrument: i.e. if the gains on the hedged item are recognised in additional own funds, so should the results of the corresponding cash flow hedging derivative. Moreover if fair-value hedging contracts on sovereign assets are taken in consideration for the computation of the prudential filters (before their removal), the FV of such contracts must be reported in the column AB.

(5) Please report gross and net direct positions before eventual write-off (PSI); in the column provisions must be included eventual write-off (PSI).

Composition of RWA as of 30 September 2011

Name of the bank:

ES060

BANCO BILBAO VIZCAYA ARGENTARIA S.A. (BBVA)

(in million Euro)

	Rules at the end of September	CRD 3 rules
Total RWA ⁽¹⁾	325,561	333,283
RWA for credit risk	279,476	279,476
RWA Securitisation and re-securitisations	5,708	5,708
RWA Other credit risk	273,768	273,768
RWA for market risk	10,355	18,077
RWA operational risk	35,730	35,730
Transitional floors ⁽²⁾	-	-
RWA Other	-	-

Notes and definitions

(1) The RWA calculated according to CRD III can be based on models that have not yet been approved by the National Supervisory Authority.

(2) All IRB/AMA banks in the exercise have applied transitional floor which assess the impact 80% of the Basel 1 requirements. However, wide divergences in national approaches to the floors means that two main approaches have been identified as set out in the methodological note. The transitional floor has been applied according to the following approach:

option 1

CDS and other contract Sovereign exposures (central, regional and local governments) in EEA towards other counterparties, as of 30 September 2011, mln EUR

Name of the bank: ES060 BANCO BILBAO VIZCAYA ARGENTARIA S.A. (BBVA)

(1) It includes credit derivatives and other credit risk transfer contracts/instruments that irrespective of the denomination represent indirect exposures (as protection seller/buyer) on sovereign risk (reference entity)

(2) The country identifies the reference entity single name of the CDS and other contracts.

(3) Notional amounts outstanding: Nominal or notional amounts outstanding are defined as the gross nominal or notional value of all contracts concluded and not yet settled on the reporting date. For contracts with variable nominal or notional principal amounts, the basis for reporting is the nominal or notional principal amounts at the time of reporting.
