E&S independent review	Yes

[Definitions...](#)

Description

The project consists in the purchase, operation and maintenance of a LNG plant that has been operating since August 2006, which receives, stores, and safely regasifies liquefied natural gas. The plant has a regasifying capacity of 760 million cubic feet per day, with a potential for 1,200 million cubic feet per day. The majority of engineering was carried out in Mexico.
